Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2003 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Acids

Modeling Water and Sulfuric Acid Transport through Coated Cement Concrete. — J. Liu and C. Vipulanandan; 129(4), 426-37 (2003).

Active control

Experiments on a Full-Scale Building Model using Modified Sliding Mode Control. — Jong-Cheng Wu; 129(4), 363-72 (2003).

Instantaneous Optimal Wilson-Θ Control Method. — O. Bahar, M. R. Banan, M. Mahzoon, and Y. Kitagawa; 129(11), 1268-76 (2003).

Aerodynamics

Aeroelastic Balance. — Yin Zhou and Ahsan Kareem; 129(3), 283-92 (2003).

Aeroelastic Analysis of Bridges: Effects of Turbulence and Aerodynamic Nonlinearities. — Xinzhong Chen and Ahsan Kareem; 129(8), 885-95 (2003).

Aeroelasticity

Curve Veering of Eigenvalue Loci of Bridges with Aeroelastic Effects. — Xinzhong Chen and Ahsan Kareem; 129(2), 146-59 (2003).

Aeroelastic Balance. — Yin Zhou and Ahsan Kareem; 129(3), 283-92 (2003).

Algorithms

Algorithm for Generating Samples of Homogeneous Gaussian Fields. — Mircea Grigoriu; 129(1), 43-9 (2003).

Damage Detection based on Single-Input-Single-Output Measurements. — P. J. Fanning and E. P. Carden; 129(2), 202-9 (2003).

Substructural Identification Method without Interface Measurement. — C. G Koh and K. Shankar; 129(7), 769-76 (2003).

Nonlinear Error Propagation Analysis for Explicit Pseudodynamic Algorithm. — Shuenn-Yih Chang; 129(8), 841-50 (2003).

Subset Simulation and its Application to Seismic Risk Based on Dynamic Analysis. — S. K. Au and J. L. Beck; 129(8), 901-17 (2003).

Computational Analysis of Quality Reduction during Drying of Lumber due to Irrecoverable Deformation. II: Algorithmic Aspects and Practical Application. — Peter Mackenzie-Helnwein and Antti Hanhijärvi; 129(9), 1006-16 (2003).

Particle Image Velocimetry System with Self-Organized Feature Map Algorithm. — Yuhai Chen and Allen T. Chwang; 129(10), 1156-63 (2003).

Instantaneous Optimal Wilson-Θ Control Method. — O. Bahar, M. R. Banan, M. Mahzoon, and Y. Kitagawa; 129(11), 1268-76 (2003).

Non-Gaussian Simulation: Cumulative Distribution Function Map-Based Spectral Correction. — Forrest Masters and Kurtis R. Gurley; 129(12), 1418-28 (2003).

Analysis

Dynamics of Cable Structures. — K. Yu. Volokh, O. Vilnay, and I. Averbuh; 129(2), 175-80 (2003).

Analytical techniques

Two Main Methods for Yield Line Analysis of Slabs. — Valentín Quintas; 129(2), 223-31 (2003).

Anisotropic materials

Poromechanics of Anisotropic Hollow Cylinders. — Mazen Kanj, Younane Abousleiman, and Roger Ghanem; 129(11), 1277-87 (2003).

Anisotropy

Effects of Cross Anisotropy on Three-Dimensional Behavior of Sand. I: Stress–Strain Behavior and Shear Banding. — Andrei V. Abelev and Poul V. Lade; 129(2), 160-6 (2003).

Effects of Cross Anisotropy on Three-Dimensional Behavior of Sand. II: Volume Change Behavior and Failure. — Poul V. Lade and Andrei V. Abelev; 129(2), 167-74 (2003).

Arches

Shapes of Submerged Funicular Arches. — T. C. Fung; 129(1), 120-5 (2003).

Asphalt pavements

Finite Element Studies of Asphalt Concrete Pavement Reinforced with Geogrid. — Hoe I. Ling and Huabei Liu; 129(7), 801-11 (2003).

Automatic identification systems

Particle Image Velocimetry System with Self-Organized Feature Map Algorithm. — Yuhai Chen and Allen T. Chwang; 129(10), 1156-63 (2003).

Axial compression

Buckling and Postbuckling of Antisymmetrically Laminated Cross-ply Shear-Deformable Cylindrical Shells under Axial Compression. — Jianwu Zhang, Yanhai Xu, and Jinsong Wu; 129(1), 107-16 (2003).

Axial loads

Stability Criteria for Euler Columns with Intermediate and End Axial Loads. — C. M. Wang, C. Y. Wang, and I. M. Nazmul; 129(4), 468-72 (2003).

Creep Analysis of Axially Loaded Fiber Reinforced Polymer-Confined Concrete Columns. — Wassim Naguib and Amir Mirmiran; 129(11), 1308-19 (2003).

Banding

Control of Wave Propagation in Sandwich Plate Rows with Periodic Honeycomb Core. — Massimo Ruzzene and Panos Tsopelas; 129(9), 975-86 (2003).

Barriers

Flexible Porous Wave Barrier for Enhanced Wetlands Habitat Restoration. — A. N. Williams and K. H. Wang; 129(1), 1-8 (2003).

Base isolation

Moment Equation Analysis of Base-Isolated Buildings Subjected to Support Motion. — Giulio Fatica and Claudio Floris; 129(1), 94-106 (2003).

"Biaxiality Effect" on the Energy Dissipated by Elastoplastic Base-Isolators. — Mauro Sassu; 129(6), 607-12 (2003).

Bayesian analysis

Updating Properties of Nonlinear Dynamical Systems with Uncertain Input. — Ka-Veng Yuen and James L. Beck; 129(1), 9-20 (2003).

Beam columns

Hybrid Beam-Column Element with End Frictional Joints. — S. S. Law, Z. M. Wu, and S. L. Chan; 129(5), 564-70 (2003).

Beams

Vibration of Timoshenko Beams with Internal Hinge. — Y. Y. Lee, C. M. Wang, and S. Kitipornchai; 129(3), 293-301 (2003).

Considerations of Multimode Structural Response for Near-Field Earthquakes. — Ching-Tung Huang; 129(4), 458-67 (2003).

Asymptotic Matching Analysis of Scaling of Structural Failure Due to Softening Hinges. I: Theory. — Zdeněk P. Bažant; 129(6), 641-50 (2003).

Asymptotic Matching Analysis of Scaling of Structural Failure Due to Softening Hinges. II: Implications. — Zdeněk P. Bažant; 129(6), 651-4 (2003).

Interactive Failure of Two Impacting Beams. — Xiaoqing Teng and Tomasz Wierzbicki; 129(8), 918-26 (2003).

Potential for Structural Failure in the Seismic Near Field. — Matthew W. Roberts and Loren D. Lutes; 129(8), 927-34 (2003).

Fracture Model for Flexural Failure of Beams Retrofitted with CARDIFRC. — Farshid Jandaghi Alaee and Bhushan Lal Karihaloo; 129(9), 1028-38 (2003).

Vibratory Characteristics of Timoshenko Beams with Arbitrary Number of Cracks. — Q. S. Li; 129(11), 1355-9 (2003).

Numerical Evaluation of Uniform Beam Modes. — Yu Tang; 129(12), 1475-7 (2003).

Bearing capacity

Finite Element Studies of Asphalt Concrete Pavement Reinforced with Geogrid. — Hoe I. Ling and Huabei Liu; 129(7), 801-11 (2003).

Tension Buckling in Multilayer Elastomeric Bearings. — James M. Kelly; 129(12), 1363-8 (2003).

Beds
Fluctuations of Turbulent Bed Shear Stress. — Nian-Sheng Cheng and Adrian Wing-Keung Law; 129(1), 126-30 (2003).
Effects of Weakly Nonlinear Water Waves on Soft Poroelastic Bed with Finite Thickness. — Ping-cheng Hsieh and Liang-hsiung Huang; 129(2), 210-22 (2003).
Laminar Water Wave and Current Passing Over Porous Bed. — Ping-cheng Hsieh, Hsi-heng Dai, and Liang-hsiung Huang; 129(6), 655-64 (2003).

Bench marks
Sliding Mode Control of Cable-Stayed Bridge Subjected to Seismic Excitation. — Seok J. Moon, Lawrence A. Bergman, and Petros G. Voulgaris; 129(1), 71-8 (2003).

Bending
Dynamic Bending Strains in Planar Trusses with Pinned or Rigid Joints. — Y.-H. Pao and G. Sun; 129(3), 324-32 (2003).

Bolted joints
Hybrid Beam-Column Element with End Frictional Joints. —S. S. Law, Z. M. Wu, and S. L. Chan; 129(5), 564-70 (2003).

Bond stress
Scale Transition in Steel-Concrete Interaction. I: Model. — Roman Lackner and Herbert A. Mang; 129(4), 393-402 (2003).

Bonding
Heterogeneous Strain and Bonded Granular Structure Change in Triaxial Specimen Studied by Computer Tomography. —C. S. Chang, T. Matsushima, and X. Lee; 129(11), 1295-307 (2003).

Boundary conditions
Second-Order Radiation Boundary Condition for Water Wave Simulation with Large Angle Incidence. — Tai-Wen Hsu, Yuan-Jyh Lan, Ting-Kuei Tsay, and Kuei-Pin Lin; 129(12), 1429-38 (2003).

Boundary element methods
Nonlinear Response of Fluid-Filled Membrane in Gravity Waves. —Amal C. Phadke and Kwok Fai Cheung; 129(7), 739-50 (2003).

Boundary layer
Postbuckling of Pressure-Loaded Functionally Graded Cylindrical Panels in Thermal Environments. — Hui-Shen Shen and Andrew Y. T. Leung; 129(4), 414-25 (2003).
Particle Image Velocimetry Measurements within a Laboratory-Generated Swash Zone. —Edwin A. Cowen, In Mei Sou, Philip L.-F. Liu, and Britt Raubenheimer; 129(10), 1119-29 (2003).

Boundary processes
Effects of Weakly Nonlinear Water Waves on Soft Poroelastic Bed with Finite Thickness. —Ping-cheng Hsieh and Liang-hsiung Huang; 129(2), 210-22 (2003).

Bounding surface
Inelastic Cyclic Model for Steel Braces. —Jun Jin and Sherif El-Tawil; 129(5), 548-57 (2003).

Box beams
Matrix Analysis of Shear Lag and Shear Deformation in Thin-Walled Box Beams. —Yaping Wu, Shizhong Liu, Yuanlin Zhu, and Yuanming Lai; 129(8), 944-50 (2003).

Bracing
Inelastic Cyclic Model for Steel Braces. —Jun Jin and Sherif El-Tawil; 129(5), 548-57 (2003).

Breaking waves
Laboratory Measurements of Void Fraction and Turbulence in the Bore Region of Surf Zone Waves. — Daniel T. Cox and Sungwon Shin; 129(10), 1197-205 (2003).

Bridge decks
Dynamic Behavior of Orthotropic Rectangular Plates under Moving Loads. — X. Q. Zhu and S. S. Law; 129(1), 79-87 (2003).

Bridges
Aeroelastic Analysis of Bridges: Effects of Turbulence and Aerodynamic Nonlinearities. — Xinzhong Chen and Ahsan Kareem; 129(8), 885-95 (2003).

Bridges, cable-stayed
Sliding Mode Control of Cable-Stayed Bridge Subjected to Seismic Excitation. — Seok J. Moon, Lawrence A. Bergman, and Petros G. Voulgaris; 129(1), 71-8 (2003).

Bridges, concrete
Effects of Seismically Induced Pounding at Expansion Joints of Concrete Bridges. — Sang-Hoon Kim and Masanobu Shinozuka; 129(11), 1225-34 (2003).

Bridges, span
Curve Veering of Eigenvalue Loci of Bridges with Aeroelastic Effects. —Xinzhong Chen and Ahsan Kareem; 129(2), 146-59 (2003).

Buckling
Buckling and Postbuckling of Antisymmetrically Laminated Cross-ply Shear-Deformable Cylindrical Shells under Axial Compression. —Jianwu Zhang, Yanhai Xu, and Jinsong Wu; 129(1), 107-16 (2003).
Effect of Base Fixity on Buckling of Heavy Column with End Load. —C. Y. Wang; 129(1), 117-9 (2003).
Exact Solutions for Buckling of Multispan Rectangular Plates. —Y. Xiang; 129(2), 181-7 (2003).
Buckling of Columns with Intermediate Elastic Restraint. — C. M. Wang and I. M. Nazmul; 129(2), 241-4 (2003).
Large-Deflection Deformation of Ferromagnetic Plates in Magnetic Fields. —Xiaojing Zheng and Xingzhe Wang; 129(2), 245-8 (2003).
Vibration of Timoshenko Beams with Internal Hinge. — Y. Y. Lee, C. M. Wang, and S. Kitipornchai; 129(3), 293-301 (2003).
Stability Criteria for Euler Columns with Intermediate and End Axial Loads. —C. M. Wang, C. Y. Wang, and I. M. Nazmul; 129(4), 468-72 (2003).
Inelastic Cyclic Model for Steel Braces. —Jun Jin and Sherif El-Tawil; 129(5), 548-57 (2003).
Ritz Buckling Analysis of Rectangular Plates with Internal Hinge. —Y. Xiang, C. M. Wang, C. Y. Wang, and G. H. Su; 129(6), 683-8 (2003).
Plastic Torsional Buckling of Cruciform Compression Members. —Nicos Makris; 129(6), 689-96 (2003).
Nonlinear Buckling Simulations of Imperfect Shell Domes by Mixed Finite Elements. —Manabu Uchiyama and Seishi Yamada; 129(7), 707-14 (2003).
Exact Buckling Solutions For Rectangular Plates Under Intermediate and End Uniaxial Loads. —Y. Xiang, C. M. Wang, and S. Kitipornchai; 129(7), 835-8 (2003).
Buckling of Vertical Cylindrical Shells Under Combined End Pressure and Body Force. —C. W. Lim, Y. F. Ma, S. Kitipornchai, C. M. Wang, and R. K. K. Yuen; 129(8), 876-84 (2003).
Imperfection Sensitivity of Laminated Cylindrical Shells According to Different Shell Theories. — Izhak Sheinman and Yiska Goldfeld; 129(9), 1048-53 (2003).
Dynamic Stability of Laminated Composite Curved Panels with Cutouts. — S. K. Sahu and P. K. Datta; 129(11), 1245-53 (2003).
Elastic Stability and Second-Order Analysis of Three-Dimensional Frames: Effects of Column Orientation. — J. Darío Aristizábal-Ochoa; 129(11), 1254-67 (2003).
Thermal Postbuckling of Uniform Columns on Elastic Foundation—Intuitive Solution. — G. Venkateswara Rao and K. Kanaka Raju; 129(11), 1351-4 (2003).
Tension Buckling in Multilayer Elastomeric Bearings. — James M. Kelly; 129(12), 1363-8 (2003).
Numerical Evaluation of Uniform Beam Modes. — Yu Tang; 129(12), 1475-7 (2003).

Buffeting
Aeroelastic Analysis of Bridges: Effects of Turbulence and Aerodynamic Nonlinearities. —Xinzhong Chen and Ahsan Kareem; 129(8), 885-95 (2003).

Buildings
Moment Equation Analysis of Base-Isolated Buildings Subjected to Support Motion. —Giulio Fatica and Claudio Floris; 129(1), 94-106 (2003).
Experiments on a Full-Scale Building Model using Modified Sliding Mode Control. —Jong-Cheng Wu; 129(4), 363-72 (2003).
Dynamics of a Class of Horizontal Setback Buildings. — Sudhir K. Jain and Chandrashekhar K. Jain; 129(9), 1092-103 (2003).

Buildings, high-rise
Aeroelastic Balance. —Yin Zhou and Ahsan Kareem; 129(3), 283-92 (2003).
Considerations of Multimode Structural Response for Near-Field Earthquakes. —Ching-Tung Huang; 129(4), 458-67 (2003).

Buoyant jets
Experimental Study of a Horizontal Jet in a Wavy Environment. —Nobuhito Mori and Kuang-An Chang; 129(10), 1149-55 (2003).
Combined Particle Image Velocimetry/Planar Laser Induced Fluorescence for Integral Modeling of Buoyant Jets. —Adrian Wing-Keung Law, Hongwei Wang, and Herlina; 129(10), 1189-96 (2003).

Cables
Dynamics of Cable Structures. —K. Yu. Volokh, O. Vilnay, and I. Averbuh; 129(2), 175-80 (2003).
Wavelet-Galerkin Method for Free Vibrations of Elastic Cable. —M. AL-Qassab and S. Nair; 129(3), 350-7 (2003).
Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. II: Application to Taut Cables. —Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 526-38 (2003).

Cements
Micromechanical Modeling of Filament Wound Cement-Based Composites. —B. Mobasher; 129(4), 373-82 (2003).
Numerical Modeling of Coupled Hygromechanical

Degradation of Cementitious Materials. — Günther Meschke and Stefan Grasberger; 129(4), 383-92 (2003).
Modeling Water and Sulfuric Acid Transport through Coated Cement Concrete. — J. Liu and C. Vipulanandan; 129(4), 426-37 (2003).

Clay soils
Rate-Dependent Hyperplasticity with Internal Functions. — A. M. Puzrin and G. T. Houlsby; 129(3), 252-63 (2003).

Clays
Three-Dimensional Discrete Element Method of Analysis of Clays. — M. Yao and A. Anandarajah; 129(6), 585-96 (2003).

Coastal environment
Incipient Motion of Bivalve Shells on Sand Beds under Flowing Water. — Subhasish Dey; 129(2), 232-40 (2003).

Coating
Modeling Water and Sulfuric Acid Transport through Coated Cement Concrete. — J. Liu and C. Vipulanandan; 129(4), 426-37 (2003).

Cohesive soils
Three-Dimensional Discrete Element Method of Analysis of Clays. —M. Yao and A. Anandarajah; 129(6), 585-96 (2003).

Collapse
Scale Transition in Steel-Concrete Interaction. II: Applications. — Roman Lackner and Herbert A. Mang; 129(4), 403-13 (2003).

Collapse loads
Stability of Stiffened Plates with Initial Imperfections. — P. Alagusundaramoorthy, S. Aruljayachandran, and R. Sundaravadivelu; 129(7), 751-8 (2003).

Columns
Effect of Base Fixity on Buckling of Heavy Column with End Load. —C. Y. Wang; 129(1), 117-9 (2003).
Buckling of Columns with Intermediate Elastic Restraint. — C. M. Wang and I. M. Nazmul; 129(2), 241-4 (2003).
Stability Criteria for Euler Columns with Intermediate and End Axial Loads. —C. M. Wang, C. Y. Wang, and I. M. Nazmul; 129(4), 468-72 (2003).
Plastic Torsional Buckling of Cruciform Compression Members. —Nicos Makris; 129(6), 689-96 (2003).
Elastic Stability and Second-Order Analysis of Three-Dimensional Frames: Effects of Column Orientation. —J. Darío Aristizábal-Ochoa; 129(11), 1254-67 (2003).
Thermal Postbuckling of Uniform Columns on Elastic Foundation—Intuitive Solution. —G. Venkateswara Rao and K. Kanaka Raju; 129(11), 1351-4 (2003).
Seismic Design of Structures by Bundled Columns. —G. D. Hahn and B. P. Champlin; 129(12), 1466-74 (2003).

Composite materials
Creep of Polymer Matrix Composites. I: Norton/Bailey Creep Law for Transverse Isotropy. —D. N. Robinson, W. K. Binienda, and M. B. Ruggles; 129(3), 310-7 (2003).
Creep of Polymer Matrix Composites. II: Monkman-Grant Failure Relationship for Transverse Isotropy. —W. K. Binienda, D. N. Robinson, and M. B. Ruggles; 129(3), 318-23 (2003).
Micromechanical Modeling of Filament Wound Cement-Based Composites. — B. Mobasher; 129(4), 373-82 (2003).
Dynamic Stability of Laminated Composite Curved Panels with Cutouts. — S. K. Sahu and P. K. Datta; 129(11), 1245-53 (2003).

Composites
Analysis of Heterogeneous Composites Based on Moving-Window Techniques. — L. L. Graham-Brady, E. F. Siragy, and S. C. Baxter; 129(9), 1054-64 (2003).

Compression
Behavior of Concrete Driven by Uniaxially Embedded Shape Memory Alloy Actuators. — Zongcai Deng, Qingbin Li, Anquan Jiu, and Lei Li; 129(6), 697-703 (2003).
Nonlinear Creep Damage Model for Concrete under Uniaxial Compression. — Claudio Mazzotti and Marco Savoia; 129(9), 1065-75 (2003).

Computation
Decontamination of Radionuclides from Concrete by Microwave Heating. II: Computations. — Goangseup Zi and Zdeněk P. Bažant; 129(7), 785-92 (2003).
Computational Analysis of Quality Reduction during Drying of Lumber due to Irrecoverable Deformation. I: Orthotropic Viscoelastic-Mechanosorptive-Plastic Material Model for the Transverse Plane of Wood. —Antti Hanhijärvi and Peter Mackenzie-Helnwein; 129(9), 996-1005 (2003).
Computational Analysis of Quality Reduction during Drying of Lumber due to Irrecoverable Deformation. II: Algorithmic Aspects and Practical Application. —Peter Mackenzie-Helnwein and Antti Hanhijärvi; 129(9), 1006-16 (2003).
Stress Solution of Multiple Elliptic Hole Problem in Plane Elasticity. —L. Q. Zhang, Z. Q. Yue, C. F. Lee, L. G. Tham, and Z. F. Yang; 129(12), 1394-407 (2003).

Computer analysis
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: I. Theory. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1439-48 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: II. Computation and Validation. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1449-58 (2003).

Computer applications
Elastic Stability and Second-Order Analysis of Three-Dimensional Frames: Effects of Column Orientation. —J. Darío Aristizábal-Ochoa; 129(11), 1254-67 (2003).

Concrete
Cohesive Fracturing and Stresses Caused by Hydration Heat in Massive Concrete Wall. —Zdeněk P. Bažant, Jin-Keun Kim, and Sang-Eun Jeon; 129(1), 21-30 (2003).
Scale Transition in Steel-Concrete Interaction. I: Model. — Roman Lackner and Herbert A. Mang; 129(4), 393-402 (2003).
Modeling Water and Sulfuric Acid Transport through Coated Cement Concrete. —J. Liu and C. Vipulanandan; 129(4), 426-37 (2003).
Behavior of Concrete Driven by Uniaxially Embedded Shape Memory Alloy Actuators. —Zongcai Deng, Qingbin Li, Anquan Jiu, and Lei Li; 129(6), 697-703 (2003).
Decontamination of Radionuclides from Concrete by Microwave Heating. I: Theory. — Zdeněk P. Bažant and Goangseup Zi; 129(7), 777-84 (2003).
Decontamination of Radionuclides from Concrete by Microwave Heating. II: Computations. — Goangseup Zi and Zdeněk P. Bažant; 129(7), 785-92 (2003).
Nonlinear Creep Damage Model for Concrete under Uniaxial Compression. — Claudio Mazzotti and Marco Savoia; 129(9), 1065-75 (2003).
Perforation Thickness and Ballistic Limit of Concrete Target Subjected to Rigid Projectile Impact. — Q. M. Li and D. J. Tong; 129(9), 1083-91 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: I. Theory. — Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1439-48 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: II. Computation and Validation. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1449-58 (2003).

Concrete columns
Creep Analysis of Axially Loaded Fiber Reinforced Polymer-Confined Concrete Columns. —Wassim Naguib and Amir Mirmiran; 129(11), 1308-19 (2003).

Concrete structures
Coupled Mechanical and Chemical Damage in Calcium Leached Cementitious Structures. —Caroline Le Bellégo, Gilles Pijaudier-Cabot, Bruno Gérard, Jean-François Dubé, and Laurent Molez; 129(3), 333-41 (2003).
Damage Detection in Concrete by Fourier and Wavelet Analyses. —Hani Melhem and Hansang Kim; 129(5), 571-7 (2003).

Concrete, reinforced
Scale Transition in Steel-Concrete Interaction. II: Applications. — Roman Lackner and Herbert A. Mang; 129(4), 403-13 (2003).
Constitutive Model for Concrete with Embedded Sets of Reinforcement. —S. Pietruszczak and A. Winnicki; 129(7), 725-38 (2003).

Connections, semi-rigid
Hybrid Beam-Column Element with End Frictional Joints. —S. S. Law, Z. M. Wu, and S. L. Chan; 129(5), 564-70 (2003).

Constitutive models
Constitutive Model for Concrete with Embedded Sets of Reinforcement. —S. Pietruszczak and A. Winnicki; 129(7), 725-38 (2003).
Pressure-Level Dependency and Densification Behavior of Sand Through Generalized Plasticity Model. — Hoe I. Ling and Huabei Liu; 129(8), 851-60 (2003).
Analysis of Heterogeneous Composites Based on Moving-Window Techniques. —L. L. Graham-Brady, E. F. Siragy, and S. C. Baxter; 129(9), 1054-64 (2003).
Electrorheological and Magnetorheological Duct Flow in Shear-Flow Mode Using Herschel-Bulkley Constitutive Model. —Joko Widjaja, Bijan Samali, and Jianchun Li; 129(12), 1459-65 (2003).

Contacts
Modified Shear Spring Formulation for Discontinuous Deformation Analysis of Particulate Media. — Catherine O'Sullivan and Jonathan D. Bray; 129(7), 830-4 (2003).

Contaminants
Decontamination of Radionuclides from Concrete by Microwave Heating. I: Theory. — Zdeněk P. Bažant and Goangseup Zi; 129(7), 777-84 (2003).
Decontamination of Radionuclides from Concrete by Microwave Heating. II: Computations. — Goangseup Zi and Zdeněk P. Bažant; 129(7), 785-92 (2003).

Contamination
Decontamination of Radionuclides from Concrete by Microwave Heating. I: Theory. — Zdeněk P. Bažant and Goangseup Zi; 129(7), 777-84 (2003).
Decontamination of Radionuclides from Concrete by Microwave Heating. II: Computations. — Goangseup Zi and Zdeněk P. Bažant; 129(7), 785-92 (2003).

Continuous beams
Response of Continuous System with Stochastically Varying Surface Roughness to Moving Load. — Christian A. Schenk and Lawrence A. Bergman; 129(7), 759-68 (2003).
Concentrations of Pressure Between an Elastically Supported Beam and a Moving Timoshenko-Beam. — Eugenia C. Cojocaru, Hans Irschik, and Kurt Schlacher; 129(9), 1076-82 (2003).

Control methods
Instantaneous Optimal Wilson-Θ Control Method. —O. Bahar, M. R. Banan, M. Mahzoon, and Y. Kitagawa; 129(11), 1268-76 (2003).

Cooling towers
Scale Transition in Steel-Concrete Interaction. II: Applications. — Roman Lackner and Herbert A. Mang; 129(4), 403-13 (2003).

Cores
Control of Wave Propagation in Sandwich Plate Rows with Periodic Honeycomb Core. —Massimo Ruzzene and Panos Tsopelas; 129(9), 975-86 (2003).

Coriolis
Dean Equations Extended to a Rotating Helical Pipe Flow. —Jinsuo Zhang and Benzhao Zhang; 129(7), 823-9 (2003).

Correlation
First- and Higher-Order Correlation Detection Using Wavelet Transforms. —K. Gurley, T. Kijewski, and A. Kareem; 129(2), 188-201 (2003).

Coupling
Thermochemomechanical Assessment of Ground Improvement by Jet Grouting in Tunneling. —Christian Pichler, Roman Lackner, Yvonne Spira, and Herbert A. Mang; 129(8), 951-62 (2003).
Analytical Solution for Fluid-Structure Interaction in Liquid-Filled Pipes Subjected to Impact-Induced Water Hammer. —Q. S. Li, Ke Yang, and Lixiang Zhang; 129(12), 1408-17 (2003).

Crack propagation
Asymptotic Matching Analysis of Scaling of Structural Failure Due to Softening Hinges. I: Theory. —Zdeněk P. Bažant; 129(6), 641-50 (2003).
Analytical Prediction of Fatigue Crack Propagation in Metals. — D. V. Ramsamooj; 129(6), 672-82 (2003).

Cracking
Cohesive Fracturing and Stresses Caused by Hydration Heat in Massive Concrete Wall. — Zdeněk P. Bažant, Jin-Keun Kim, and Sang-Eun Jeon; 129(1), 21-30 (2003).
Coupled Mechanical and Chemical Damage in Calcium Leached Cementitious Structures. — Caroline Le Bellégo, Gilles Pijaudier-Cabot, Bruno Gérard, Jean-François Dubé, and Laurent Molez; 129(3), 333-41 (2003).
Energy Release Rate due to Friction at Bimaterial Interface in Dams. — V. Sujatha and J. M. Chandra Kishen; 129(7), 793-800 (2003).
Vibratory Characteristics of Timoshenko Beams with Arbitrary Number of Cracks. — Q. S. Li; 129(11), 1355-9 (2003).

Creep
Creep of Polymer Matrix Composites. I: Norton/Bailey Creep Law for Transverse Isotropy. — D. N. Robinson, W. K. Binienda, and M. B. Ruggles; 129(3), 310-7 (2003).
Creep of Polymer Matrix Composites. II: Monkman-Grant Failure Relationship for Transverse Isotropy. —W. K. Binienda, D. N. Robinson, and M. B. Ruggles; 129(3), 318-23 (2003).
Nonlinear Creep Damage Model for Concrete under Uniaxial Compression. —Claudio Mazzotti and Marco Savoia; 129(9), 1065-75 (2003).
Creep Analysis of Axially Loaded Fiber Reinforced Polymer-Confined Concrete Columns. —Wassim Naguib and Amir Mirmiran; 129(11), 1308-19 (2003).

Curvature
Dean Equations Extended to a Rotating Helical Pipe Flow. —Jinsuo Zhang and Benzhao Zhang; 129(7), 823-9 (2003).

Cyclic loads
Inelastic Cyclic Model for Steel Braces. —Jun Jin and Sherif El-Tawil; 129(5), 548-57 (2003).
Hybrid Beam-Column Element with End Frictional Joints. —S. S. Law, Z. M. Wu, and S. L. Chan; 129(5), 564-70 (2003).
"Biaxiality Effect" on the Energy Dissipated by Elastoplastic Base-Isolators. —Mauro Sassu; 129(6), 607-12 (2003).
Pressure-Level Dependency and Densification Behavior of Sand Through Generalized Plasticity Model. — Hoe I. Ling and Huabei Liu; 129(8), 851-60 (2003).

Cylinders
Convection Velocity of Vortex Structures in the Near Wake of a Circular Cylinder. —Chang Lin and Shih-Chun Hsieh; 129(10), 1108-18 (2003).
Poromechanics of Anisotropic Hollow Cylinders. —Mazen Kanj, Younane Abousleiman, and Roger Ghanem; 129(11), 1277-87 (2003).
Investigation of Two- and Three-Dimensional Models of Transitional Flow Past a Square Cylinder. — A. K. Saha, K. Muralidhar, and G. Biswas; 129(11), 1320-9 (2003).

Cylindrical shells
Buckling and Postbuckling of Antisymmetrically Laminated Cross-ply Shear-Deformable Cylindrical Shells under Axial Compression. —Jianwu Zhang, Yanhai Xu, and Jinsong Wu; 129(1), 107-16 (2003).
Buckling of Vertical Cylindrical Shells Under Combined End Pressure and Body Force. — C. W. Lim, Y. F. Ma, S. Kitipornchai, C. M. Wang, and R. K. K. Yuen; 129(8), 876-84 (2003).
Imperfection Sensitivity of Laminated Cylindrical Shells According to Different Shell Theories. — Izhak Sheinman and Yiska Goldfeld; 129(9), 1048-53 (2003).

Dam foundations
Energy Release Rate due to Friction at Bimaterial Interface in Dams. — V. Sujatha and J. M. Chandra Kishen; 129(7), 793-800 (2003).

Damage
Damage Detection based on Single-Input-Single-Output Measurements. — P. J. Fanning and E. P. Carden; 129(2), 202-9 (2003).
Coupled Mechanical and Chemical Damage in Calcium Leached Cementitious Structures. — Caroline Le Bellégo, Gilles Pijaudier-Cabot, Bruno Gérard, Jean-François Dubé, and Laurent Molez; 129(3), 333-41 (2003).
Damage Detection in Concrete by Fourier and Wavelet Analyses. —Hani Melhem and Hansang Kim; 129(5), 571-7 (2003).
Nonlinear Creep Damage Model for Concrete under Uniaxial Compression. —Claudio Mazzotti and Marco Savoia; 129(9), 1065-75 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: I. Theory. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1439-48 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: II. Computation and Validation. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1449-58 (2003).

Damage assessment
Structural Damage Detection and Assessment from Modal Response. —T. Pothisiri and K. D. Hjelmstad; 129(2), 135-45 (2003).

Damping
Seismic Analysis and Design with Maxwell Dampers. — Mahendra P. Singh, Navin. P. Verma, and Luis M. Moreschi; 129(3), 273-82 (2003).
Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. I: Analysis in Two Degrees of Freedom. — Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 514-25 (2003).
Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. II: Application to Taut Cables. —Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 526-38 (2003).
Earthquake Response of Elastic Single-Degree-of-Freedom Systems with Nonlinear Viscoelastic Dampers. — Wen-Hsiung Lin and Anil K. Chopra; 129(6), 597-606 (2003).
Instantaneous Optimal Wilson-Θ Control Method. —O. Bahar, M. R. Banan, M. Mahzoon, and Y. Kitagawa; 129(11), 1268-76 (2003).
Electrorheological and Magnetorheological Duct Flow in Shear-Flow Mode Using Herschel-Bulkley Constitutive Model. —Joko Widjaja, Bijan Samali, and Jianchun Li; 129(12), 1459-65 (2003).

Dams, concrete
Energy Release Rate due to Friction at Bimaterial Interface in Dams. — V. Sujatha and J. M. Chandra Kishen; 129(7), 793-800 (2003).

Dams, gravity
Energy Release Rate due to Friction at Bimaterial Interface in Dams. — V. Sujatha and J. M. Chandra Kishen; 129(7), 793-800 (2003).

Data analysis
Estimating Uncertainty in the Extreme Value Analysis of Data Generated by a Hurricane Simulation Model. — Stuart Coles and Emil Simiu; 129(11), 1288-94 (2003).

Decomposition
Exact Buckling Solutions For Rectangular Plates Under Intermediate and End Uniaxial Loads. — Y. Xiang, C. M. Wang, and S. Kitipornchai; 129(7), 835-8 (2003).

Deflection
Nonlinear Buckling Simulations of Imperfect Shell Domes by Mixed Finite Elements. — Manabu Uchiyama and Seishi Yamada; 129(7), 707-14 (2003).

Deformation
Large-Deflection Deformation of Ferromagnetic Plates in Magnetic Fields. —Xiaojing Zheng and Xingzhe Wang; 129(2), 245-8 (2003).
Computational Analysis of Quality Reduction during Drying of Lumber due to Irrecoverable Deformation. I: Orthotropic Viscoelastic-Mechanosorptive-Plastic Material Model for the Transverse Plane of Wood. —Antti Hanhijärvi and Peter Mackenzie-Helnwein; 129(9), 996-1005 (2003).
Computational Analysis of Quality Reduction during Drying of Lumber due to Irrecoverable Deformation. II: Algorithmic Aspects and Practical Application. —Peter Mackenzie-Helnwein and Antti Hanhijärvi; 129(9), 1006-16 (2003).

Deformation analysis
Modified Shear Spring Formulation for Discontinuous Deformation Analysis of Particulate Media. — Catherine O'Sullivan and Jonathan D. Bray; 129(7), 830-4 (2003).

Degradation
Aging Approach to Water Effect on Alkali–Silica Reaction Degradation of Structures. —Alexander Steffens, Kefei Li, and Olivier Coussy; 129(1), 50-9 (2003).
Coupled Mechanical and Chemical Damage in Calcium Leached Cementitious Structures. —Caroline Le Bellégo, Gilles Pijaudier-Cabot, Bruno Gérard, Jean-François Dubé, and Laurent Molez; 129(3), 333-41 (2003).
Numerical Modeling of Coupled Hygromechanical Degradation of Cementitious Materials. —Günther Meschke and Stefan Grasberger; 129(4), 383-92 (2003).

Degrees of freedom
Earthquake Response of Elastic Single-Degree-of-Freedom Systems with Nonlinear Viscoelastic Dampers. — Wen-Hsiung Lin and Anil K. Chopra; 129(6), 597-606 (2003).

Densification
Pressure-Level Dependency and Densification Behavior of Sand Through Generalized Plasticity Model. — Hoe I. Ling and Huabei Liu; 129(8), 851-60 (2003).

Design
Design-Oriented Analysis of Structures—Unified Approach. — U. Kirsch; 129(3), 264-72 (2003).

Dewatering
Computational Analysis of Quality Reduction during Drying of Lumber due to Irrecoverable Deformation. I: Orthotropic Viscoelastic-Mechanosorptive-Plastic Material Model for the Transverse Plane of Wood. — Antti Hanhijärvi and Peter Mackenzie-Helnwein; 129(9), 996-1005 (2003).
Computational Analysis of Quality Reduction during Drying of Lumber due to Irrecoverable Deformation. II: Algorithmic Aspects and Practical Application. — Peter Mackenzie-Helnwein and Antti Hanhijärvi; 129(9), 1006-16 (2003).

Diaphragms
Dynamics of a Class of Horizontal Setback Buildings. — Sudhir K. Jain and Chandrashekhar K. Jain; 129(9), 1092-103 (2003).

Differential equations
Concentrations of Pressure Between an Elastically Supported Beam and a Moving Timoshenko-Beam. — Eugenia C. Cojocaru, Hans Irschik, and Kurt Schlacher; 129(9), 1076-82 (2003).

Diffusion
Decontamination of Radionuclides from Concrete by Microwave Heating. I: Theory. —Zdeněk P. Bažant and Goangseup Zi; 129(7), 777-84 (2003).
Decontamination of Radionuclides from Concrete by Microwave Heating. II: Computations. —Goangseup Zi and Zdeněk P. Bažant; 129(7), 785-92 (2003).

Diffusion coefficient
Characterization of Cement-Based Materials Using Diffuse Ultrasound. —Jens Becker, Laurence J. Jacobs, and Jianmin Qu; 129(12), 1478-84 (2003).

Dikes
Analysis of Water Waves Passing Over a Submerged Rectangular Dike. —I-Chi Chan, Liang-Hsiung Huang, and Ping-Cheng Hsieh; 129(6), 613-26 (2003).

Discrete elements
Smooth Convex Three-Dimensional Particle for the Discrete-Element Method. —Matthew R. Kuhn; 129(5), 539-47 (2003).
Three-Dimensional Discrete Element Method of Analysis of Clays. —M. Yao and A. Anandarajah; 129(6), 585-96 (2003).
Modified Shear Spring Formulation for Discontinuous Deformation Analysis of Particulate Media. — Catherine O'Sullivan and Jonathan D. Bray; 129(7), 830-4 (2003).

Displacement
Spline Semidiscretization Analysis for Orthotropic Plates and Shells. —Chunxiang Li, Weijian Si, and Zhenyu Liu; 129(1), 60-70 (2003).
Vibration of Plates with Constrained V-Notches or Cracks. —O. G. McGee, A. W. Leissa, J. W. Kim, and Y. S. Kim; 129(7), 812-22 (2003).

Dissipation
Rate-Dependent Hyperplasticity with Internal Functions. — A. M. Puzrin and G. T. Houlsby; 129(3), 252-63 (2003).

Distribution functions
Non-Gaussian Simulation: Cumulative Distribution Function Map-Based Spectral Correction. — Forrest Masters and Kurtis R. Gurley; 129(12), 1418-28 (2003).

Drag
Numerical Solution of Fully Developed Flow with Vegetative Resistance. — V. S. Neary; 129(5), 558-63 (2003).

Ductility
Effects of Seismically Induced Pounding at Expansion Joints of Concrete Bridges. — Sang-Hoon Kim and Masanobu Shinozuka; 129(11), 1225-34 (2003).

Durability
Aging Approach to Water Effect on Alkali–Silica Reaction Degradation of Structures. — Alexander Steffens, Kefei Li, and Olivier Coussy; 129(1), 50-9 (2003).

Dynamic analysis
Subset Simulation and its Application to Seismic Risk Based on Dynamic Analysis. — S. K. Au and J. L. Beck; 129(8), 901-17 (2003).
Modal Perturbation Method and its Applications in Structural Systems. —Menglin Lou and Genda Chen; 129(8), 935-43 (2003).

Dynamic characteristics
Dynamic Characteristics of Infinite and Finite Railways to Moving Loads. —Yung-Hsiang Chen and Yen-Hui Huang; 129(9), 987-95 (2003).

Dynamic loads
Response of Continuous System with Stochastically Varying Surface Roughness to Moving Load. — Christian A. Schenk and Lawrence A. Bergman; 129(7), 759-68 (2003).
Exact Solution for Dynamic Response of Multi-Degree-of-Freedom Bilinear Hysteretic Systems. — J. L. Liu; 129(11), 1342-50 (2003).

Dynamic response
Concentrations of Pressure Between an Elastically Supported Beam and a Moving Timoshenko-Beam. — Eugenia C. Cojocaru, Hans Irschik, and Kurt Schlacher; 129(9), 1076-82 (2003).
Exact Solution for Dynamic Response of Multi-Degree-of-Freedom Bilinear Hysteretic Systems. — J. L. Liu; 129(11), 1342-50 (2003).

Dynamic stability
Dynamic Stability of Laminated Composite Curved Panels with Cutouts. —S. K. Sahu and P. K. Datta; 129(11), 1245-53 (2003).

Dynamic structural analysis
Effects of Seismically Induced Pounding at Expansion Joints of Concrete Bridges. —Sang-Hoon Kim and Masanobu Shinozuka; 129(11), 1225-34 (2003).

Dynamic tests
Nonlinear Error Propagation Analysis for Explicit Pseudodynamic Algorithm. —Shuenn-Yih Chang; 129(8), 841-50 (2003).
Analytical Modeling, System Identification, and Tracking Performance of Uniaxial Seismic Simulators. — Brian S. Twitchell and Michael D. Symans; 129(12), 1485-8 (2003).

Dynamics
Dynamic Behavior of Orthotropic Rectangular Plates under Moving Loads. —X. Q. Zhu and S. S. Law; 129(1), 79-87 (2003).
Dynamics of Cable Structures. —K. Yu. Volokh, O. Vilnay, and I. Averbuh; 129(2), 175-80 (2003).

Linear Stochastic Dynamical System under Uncertain Load: Inverse Reliability Analysis. — Abhijit Sarkar; 129(6), 665-71 (2003).

Uncertain Dynamical Systems in the Medium-Frequency Range. — C. Soize; 129(9), 1017-27 (2003).

Earthquake excitation

Moment Equation Analysis of Base-Isolated Buildings Subjected to Support Motion. — Giulio Fatica and Claudio Floris; 129(1), 94-106 (2003).

Earthquakes

Considerations of Multimode Structural Response for Near-Field Earthquakes. — Ching-Tung Huang; 129(4), 458-67 (2003).

Earthquake Response of Elastic Single-Degree-of-Freedom Systems with Nonlinear Viscoelastic Dampers. — Wen-Hsiung Lin and Anil K. Chopra; 129(6), 597-606 (2003).

Hilbert-Huang Transform Analysis of Dynamic and Earthquake Motion Recordings. — Ray Ruichong Zhang, Shuo Ma, Erdal Safak, and Stephen Hartzell; 129(8), 861-75 (2003).

Potential for Structural Failure in the Seismic Near Field. —Matthew W. Roberts and Loren D. Lutes; 129(8), 927-34 (2003).

Dynamics of a Class of Horizontal Setback Buildings. — Sudhir K. Jain and Chandrashekhar K. Jain; 129(9), 1092-103 (2003).

Consistent Finite-Element Response Sensitivity Analysis. —J. P. Conte, P. K. Vijalapura, and M. Meghella; 129(12), 1380-93 (2003).

Seismic Design of Structures by Bundled Columns. —G. D. Hahn and B. P. Champlin; 129(12), 1466-74 (2003).

Analytical Modeling, System Identification, and Tracking Performance of Uniaxial Seismic Simulators. — Brian S. Twitchell and Michael D. Symans; 129(12), 1485-8 (2003).

Eigenvalues

Curve Veering of Eigenvalue Loci of Bridges with Aeroelastic Effects. —Xinzhong Chen and Ahsan Kareem; 129(2), 146-59 (2003).

Buckling of Vertical Cylindrical Shells Under Combined End Pressure and Body Force. —C. W. Lim, Y. F. Ma, S. Kitipornchai, C. M. Wang, and R. K. K. Yuen; 129(8), 876-84 (2003).

Modal Perturbation Method and its Applications in Structural Systems. —Menglin Lou and Genda Chen; 129(8), 935-43 (2003).

Elastic foundations

Biparametric Models for Elastic Wedge Foundation. — Joanna Marzęda, Volodymyr Pauk, and Margaret Woźniak; 129(1), 88-93 (2003).

Postbuckling Analysis of Plates Resting on a Tensionless Elastic Foundation. —A. S. de Holanda and P. B. Gonçalves; 129(4), 438-48 (2003).

Concentrations of Pressure Between an Elastically Supported Beam and a Moving Timoshenko-Beam. — Eugenia C. Cojocaru, Hans Irschik, and Kurt Schlacher; 129(9), 1076-82 (2003).

Thermal Postbuckling of Uniform Columns on Elastic Foundation—Intuitive Solution. —G. Venkateswara Rao and K. Kanaka Raju; 129(11), 1351-4 (2003).

Elastic restraints

Buckling of Columns with Intermediate Elastic Restraint. — C. M. Wang and I. M. Nazmul; 129(2), 241-4 (2003).

Elasticity

Large-Deflection Deformation of Ferromagnetic Plates in Magnetic Fields. — Xiaojing Zheng and Xingzhe Wang; 129(2), 245-8 (2003).

Elasticity of Space-Time: Basis of Newton's 2nd Law of Motion. — Kirk C. Valanis; 129(9), 1039-47 (2003).

Stress Solution of Multiple Elliptic Hole Problem in Plane Elasticity. — L. Q. Zhang, Z. Q. Yue, C. F. Lee, L. G. Tham, and Z. F. Yang; 129(12), 1394-407 (2003).

Elastomer

Tension Buckling in Multilayer Elastomeric Bearings. — James M. Kelly; 129(12), 1363-8 (2003).

Embedded foundations

Dynamic Soil Stiffnesses at Side of Embedded Structures with Rectangular Base. — Toyoaki Nogami and Harn S. Chen; 129(8), 963-73 (2003).

Energy dissipation

"Biaxiality Effect" on the Energy Dissipated by Elastoplastic Base-Isolators. —Mauro Sassu; 129(6), 607-12 (2003).

State Space Formulation for Linear Viscoelastic Dynamic Systems with Memory. —A. Palmeri, F. Ricciardelli, A. De Luca, and G. Muscolino; 129(7), 715-24 (2003).

Energy methods

Buckling of Vertical Cylindrical Shells Under Combined End Pressure and Body Force. —C. W. Lim, Y. F. Ma, S. Kitipornchai, C. M. Wang, and R. K. K. Yuen; 129(8), 876-84 (2003).

Energy transfer

Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. I: Analysis in Two Degrees of Freedom. — Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 514-25 (2003).

Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. II: Application to Taut Cables. —Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 526-38 (2003).

Equations of motion

State Space Formulation for Linear Viscoelastic Dynamic Systems with Memory. —A. Palmeri, F. Ricciardelli, A. De Luca, and G. Muscolino; 129(7), 715-24 (2003).

Elasticity of Space-Time: Basis of Newton's 2nd Law of Motion. —Kirk C. Valanis; 129(9), 1039-47 (2003).

Equations of state

State Space Formulation for Linear Viscoelastic Dynamic Systems with Memory. —A. Palmeri, F. Ricciardelli, A. De Luca, and G. Muscolino; 129(7), 715-24 (2003).

Errors

Nonlinear Error Propagation Analysis for Explicit Pseudodynamic Algorithm. —Shuenn-Yih Chang; 129(8), 841-50 (2003).

Estuaries

Field Experiment Study of Transient Stratified Flow in an Estuary. —Wenrui Huang, W. K. Jones, and Q. Yang; 129(10), 1220-3 (2003).

Evaluation

Numerical Evaluation of Uniform Beam Modes. — Yu Tang; 129(12), 1475-7 (2003).

Excitation

Sliding Mode Control of Cable-Stayed Bridge Subjected to Seismic Excitation. — Seok J. Moon, Lawrence A. Bergman, and Petros G. Voulgaris; 129(1), 71-8 (2003).

Refined Solutions of Externally Induced Sloshing in Half-Full Spherical Containers. — S. Papaspyrou, D. Valougeorgis, and S. A. Karamanos; 129(12), 1369-79 (2003).

Expansion joints

Effects of Seismically Induced Pounding at Expansion Joints of Concrete Bridges. — Sang-Hoon Kim and Masanobu Shinozuka; 129(11), 1225-34 (2003).

Experimentation

Experiments on a Full-Scale Building Model using Modified Sliding Mode Control. — Jong-Cheng Wu; 129(4), 363-72 (2003).

Stability of Stiffened Plates with Initial Imperfections. — P. Alagusundaramoorthy, S. Aruljayachandran, and R. Sundaravadivelu; 129(7), 751-8 (2003).

Experimental Study of a Horizontal Jet in a Wavy Environment. —Nobuhito Mori and Kuang-An Chang; 129(10), 1149-55 (2003).

Failures

Effects of Cross Anisotropy on Three-Dimensional Behavior of Sand. I: Stress–Strain Behavior and Shear Banding. —Andrei V. Abelev and Poul V. Lade; 129(2), 160-6 (2003).

Effects of Cross Anisotropy on Three-Dimensional Behavior of Sand. II: Volume Change Behavior and Failure. —Poul V. Lade and Andrei V. Abelev; 129(2), 167-74 (2003).

Creep of Polymer Matrix Composites. II: Monkman-Grant Failure Relationship for Transverse Isotropy. —W. K. Binienda, D. N. Robinson, and M. B. Ruggles; 129(3), 318-23 (2003).

Interactive Failure of Two Impacting Beams. —Xiaoqing Teng and Tomasz Wierzbicki; 129(8), 918-26 (2003).

Fracture Model for Flexural Failure of Beams Retrofitted with CARDIFRC. —Farshid Jandaghi Alaee and Bhushan Lal Karihaloo; 129(9), 1028-38 (2003).

Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: II. Computation and Validation. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1449-58 (2003).

Fatigue

Analytical Prediction of Fatigue Crack Propagation in Metals. —D. V. Ramsamooj; 129(6), 672-82 (2003).

Feedback control

Analytical Modeling, System Identification, and Tracking Performance of Uniaxial Seismic Simulators. — Brian S. Twitchell and Michael D. Symans; 129(12), 1485-8 (2003).

Fiber reinforced polymers

Creep Analysis of Axially Loaded Fiber Reinforced Polymer-Confined Concrete Columns. —Wassim Naguib and Amir Mirmiran; 129(11), 1308-19 (2003).

Field investigations
Field Experiment Study of Transient Stratified Flow in an Estuary. — Wenrui Huang, W. K. Jones, and Q. Yang; 129(10), 1220-3 (2003).

Finite element method
Aging Approach to Water Effect on Alkali–Silica Reaction Degradation of Structures. — Alexander Steffens, Kefei Li, and Olivier Coussy; 129(1), 50-9 (2003).
Structural Damage Detection and Assessment from Modal Response. — T. Pothisiri and K. D. Hjelmstad; 129(2), 135-45 (2003).
Design-Oriented Analysis of Structures—Unified Approach. — U. Kirsch; 129(3), 264-72 (2003).
Numerical Modeling of Coupled Hygromechanical Degradation of Cementitious Materials. — Günther Meschke and Stefan Grasberger; 129(4), 383-92 (2003).
Nonlinear Response of Fluid-Filled Membrane in Gravity Waves. — Amal C. Phadke and Kwok Fai Cheung; 129(7), 739-50 (2003).
Stability of Stiffened Plates with Initial Imperfections. — P. Alagusundaramoorthy, S. Aruljayachandran, and R. Sundaravadivelu; 129(7), 751-8 (2003).
Dynamic Stability of Laminated Composite Curved Panels with Cutouts. —S. K. Sahu and P. K. Datta; 129(11), 1245-53 (2003).
Consistent Finite-Element Response Sensitivity Analysis. — J. P. Conte, P. K. Vijalapura, and M. Meghella; 129(12), 1380-93 (2003).
Second-Order Radiation Boundary Condition for Water Wave Simulation with Large Angle Incidence. — Tai-Wen Hsu, Yuan-Jyh Lan, Ting-Kuei Tsay, and Kuei-Pin Lin; 129(12), 1429-38 (2003).

Finite elements
Nonlinear Buckling Simulations of Imperfect Shell Domes by Mixed Finite Elements. —Manabu Uchiyama and Seishi Yamada; 129(7), 707-14 (2003).
Finite Element Studies of Asphalt Concrete Pavement Reinforced with Geogrid. —Hoe I. Ling and Huabei Liu; 129(7), 801-11 (2003).
Thermal Postbuckling of Uniform Columns on Elastic Foundation—Intuitive Solution. —G. Venkateswara Rao and K. Kanaka Raju; 129(11), 1351-4 (2003).

Floating structures
Non-Gaussian Air Gap Response Models for Floating Structures. —Bert Sweetman and Steven R. Winterstein; 129(3), 302-9 (2003).

Florida
Field Experiment Study of Transient Stratified Flow in an Estuary. —Wenrui Huang, W. K. Jones, and Q. Yang; 129(10), 1220-3 (2003).

Flow
Investigation of Two- and Three-Dimensional Models of Transitional Flow Past a Square Cylinder. — A. K. Saha, K. Muralidhar, and G. Biswas; 129(11), 1320-9 (2003).

Flow characteristics
Cluster Evolution and Flow-Frictional Characteristics under Different Sediment Availabilities and Specific Gravity. —A. N. Papanicolaou and A. Schuyler; 129(10), 1206-19 (2003).

Flow measurement
Measurements of Water Surface Profile and Velocity Field at a Circular Pier. — Kent R. Johnson and Francis C. K. Ting; 129(5), 502-13 (2003).
Convection Velocity of Vortex Structures in the Near Wake of a Circular Cylinder. — Chang Lin and Shih-Chun Hsieh; 129(10), 1108-18 (2003).
Particle Image Velocimetry Measurements within a Laboratory-Generated Swash Zone. — Edwin A. Cowen, In Mei Sou, Philip L.-F. Liu, and Britt Raubenheimer; 129(10), 1119-29 (2003).
Laser-Induced Fluorescence Measurements of a Turbulent Plume. — D. R. Webster, S. Rahman, and L. P. Dasi; 129(10), 1130-7 (2003).
Shallow Turbulent Flows by Video Imaging Method. — J.-B. Zhang and V. H. Chu; 129(10), 1164-72 (2003).
Simultaneous Particle Image Velocimetry and Laser Doppler Velocimetry Measurements of Periodical Oscillatory Horseshoe Vortex System near Square Cylinder-Base Plate Juncture. — Chang Lin, Wen-Jiun Lai, and Kuang-An Chang; 129(10), 1173-88 (2003).
Combined Particle Image Velocimetry/Planar Laser Induced Fluorescence for Integral Modeling of Buoyant Jets. —Adrian Wing-Keung Law, Hongwei Wang, and Herlina; 129(10), 1189-96 (2003).
Field Experiment Study of Transient Stratified Flow in an Estuary. —Wenrui Huang, W. K. Jones, and Q. Yang; 129(10), 1220-3 (2003).

Flow resistance
Numerical Solution of Fully Developed Flow with Vegetative Resistance. —V. S. Neary; 129(5), 558-63 (2003).

Flow visualization
Convection Velocity of Vortex Structures in the Near Wake of a Circular Cylinder. —Chang Lin and Shih-Chun Hsieh; 129(10), 1108-18 (2003).
Simultaneous Particle Image Velocimetry and Laser Doppler Velocimetry Measurements of Periodical Oscillatory Horseshoe Vortex System near Square Cylinder-Base Plate Juncture. —Chang Lin, Wen-Jiun Lai, and Kuang-An Chang; 129(10), 1173-88 (2003).

Fluid-structure interaction
Nonlinear Response of Fluid-Filled Membrane in Gravity Waves. —Amal C. Phadke and Kwok Fai Cheung; 129(7), 739-50 (2003).
Analytical Solution for Fluid-Structure Interaction in Liquid-Filled Pipes Subjected to Impact-Induced Water Hammer. —Q. S. Li, Ke Yang, and Lixiang Zhang; 129(12), 1408-17 (2003).

Flutter
Aeroelastic Analysis of Bridges: Effects of Turbulence and Aerodynamic Nonlinearities. —Xinzhong Chen and Ahsan Kareem; 129(8), 885-95 (2003).

Foundations
Dynamic Characteristics of Infinite and Finite Railways to Moving Loads. —Yung-Hsiang Chen and Yen-Hui Huang; 129(9), 987-95 (2003).

Fourier analysis
Hilbert-Huang Transform Analysis of Dynamic and Earthquake Motion Recordings. —Ray Ruichong Zhang, Shuo Ma, Erdal Safak, and Stephen Hartzell; 129(8), 861-75 (2003).

Fourier transform
Damage Detection in Concrete by Fourier and Wavelet Analyses. — Hani Melhem and Hansang Kim; 129(5), 571-7 (2003).

Fracture mechanics
Asymptotic Matching Analysis of Scaling of Structural Failure Due to Softening Hinges. I: Theory. — Zdeněk P. Bažant; 129(6), 641-50 (2003).
Asymptotic Matching Analysis of Scaling of Structural Failure Due to Softening Hinges. II: Implications. — Zdeněk P. Bažant; 129(6), 651-4 (2003).

Fractures
Fracture Model for Flexural Failure of Beams Retrofitted with CARDIFRC. — Farshid Jandaghi Alaee and Bhushan Lal Karihaloo; 129(9), 1028-38 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: I. Theory. — Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1439-48 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: II. Computation and Validation. — Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1449-58 (2003).

Frames
Asymptotic Matching Analysis of Scaling of Structural Failure Due to Softening Hinges. I: Theory. —Zdeněk P. Bažant; 129(6), 641-50 (2003).
Asymptotic Matching Analysis of Scaling of Structural Failure Due to Softening Hinges. II: Implications. — Zdeněk P. Bažant; 129(6), 651-4 (2003).
Elastic Stability and Second-Order Analysis of Three-Dimensional Frames: Effects of Column Orientation. —J. Darío Aristizábal-Ochoa; 129(11), 1254-67 (2003).

Frequency
Frequency of Functionally Graded Plates with Three-Dimensional Asymptotic Approach. —J. N. Reddy and Zhen-Qiang Cheng; 129(8), 896-900 (2003).

Friction
Energy Release Rate due to Friction at Bimaterial Interface in Dams. —V. Sujatha and J. M. Chandra Kishen; 129(7), 793-800 (2003).
Shallow Turbulent Flows by Video Imaging Method. — J.-B. Zhang and V. H. Chu; 129(10), 1164-72 (2003).
Cluster Evolution and Flow-Frictional Characteristics under Different Sediment Availabilities and Specific Gravity. —A. N. Papanicolaou and A. Schuyler; 129(10), 1206-19 (2003).

Gaussian process
Spectral Approach to Equivalent Statistical Quadratization and Cubicization Methods for Nonlinear Oscillators. —Pol D. Spanos, Giuseppe Failla, and Mario Di Paola; 129(1), 31-42 (2003).
Algorithm for Generating Samples of Homogeneous Gaussian Fields. —Mircea Grigoriu; 129(1), 43-9 (2003).
Non-Gaussian Air Gap Response Models for Floating Structures. —Bert Sweetman and Steven R. Winterstein; 129(3), 302-9 (2003).
Linear Stochastic Dynamical System under Uncertain Load: Inverse Reliability Analysis. —Abhijit Sarkar; 129(6), 665-71 (2003).

Geogrids
Finite Element Studies of Asphalt Concrete Pavement Reinforced with Geogrid. — Hoe I. Ling and Huabei Liu; 129(7), 801-11 (2003).

Geometric nonlinearity
Large-Deflection Deformation of Ferromagnetic Plates in Magnetic Fields. — Xiaojing Zheng and Xingzhe Wang; 129(2), 245-8 (2003).
Nonlinear Error Propagation Analysis for Explicit Pseudodynamic Algorithm. — Shuenn-Yih Chang; 129(8), 841-50 (2003).

Granular materials
Smooth Convex Three-Dimensional Particle for the Discrete-Element Method. — Matthew R. Kuhn; 129(5), 539-47 (2003).
Numerical Investigation of Statistical Properties of Microslips in Silos. — O. Vinogradov and Y. Leonenko; 129(6), 637-40 (2003).
Modified Shear Spring Formulation for Discontinuous Deformation Analysis of Particulate Media. — Catherine O'Sullivan and Jonathan D. Bray; 129(7), 830-4 (2003).
Heterogeneous Strain and Bonded Granular Structure Change in Triaxial Specimen Studied by Computer Tomography. —C. S. Chang, T. Matsushima, and X. Lee; 129(11), 1295-307 (2003).

Gravel
Cluster Evolution and Flow-Frictional Characteristics under Different Sediment Availabilities and Specific Gravity. —A. N. Papanicolaou and A. Schuyler; 129(10), 1206-19 (2003).

Gravity waves
Nonlinear Response of Fluid-Filled Membrane in Gravity Waves. —Amal C. Phadke and Kwok Fai Cheung; 129(7), 739-50 (2003).

Green's function
Biparametric Models for Elastic Wedge Foundation. — Joanna Marzęda, Volodymyr Pauk, and Margaret Woźniak; 129(1), 88-93 (2003).
Considerations of Multimode Structural Response for Near-Field Earthquakes. —Ching-Tung Huang; 129(4), 458-67 (2003).

Ground motion
Hilbert-Huang Transform Analysis of Dynamic and Earthquake Motion Recordings. —Ray Ruichong Zhang, Shuo Ma, Erdal Safak, and Stephen Hartzell; 129(8), 861-75 (2003).

Half space
Forced Vertical Vibration of Circular Plate in Multilayered Poroelastic Medium. —Teerapong Senjuntichai and Yasothorn Sapsathiarn; 129(11), 1330-41 (2003).

Heating
Decontamination of Radionuclides from Concrete by Microwave Heating. I: Theory. —Zdeněk P. Bažant and Goangseup Zi; 129(7), 777-84 (2003).
Decontamination of Radionuclides from Concrete by Microwave Heating. II: Computations. —Goangseup Zi and Zdeněk P. Bažant; 129(7), 785-92 (2003).

Hinges
Vibration of Timoshenko Beams with Internal Hinge. — Y. Y. Lee, C. M. Wang, and S. Kitipornchai; 129(3), 293-301 (2003).
Asymptotic Matching Analysis of Scaling of Structural Failure Due to Softening Hinges. I: Theory. —Zdeněk P. Bažant; 129(6), 641-50 (2003).
Asymptotic Matching Analysis of Scaling of Structural Failure Due to Softening Hinges. II: Implications. — Zdeněk P. Bažant; 129(6), 651-4 (2003).
Ritz Buckling Analysis of Rectangular Plates with Internal Hinge. — Y. Xiang, C. M. Wang, C. Y. Wang, and G. H. Su; 129(6), 683-8 (2003).

Holes
Stress Solution of Multiple Elliptic Hole Problem in Plane Elasticity. — L. Q. Zhang, Z. Q. Yue, C. F. Lee, L. G. Tham, and Z. F. Yang; 129(12), 1394-407 (2003).

Honeycomb structures
Control of Wave Propagation in Sandwich Plate Rows with Periodic Honeycomb Core. — Massimo Ruzzene and Panos Tsopelas; 129(9), 975-86 (2003).

Hong Kong
Field Measurement of Ship Waves in Victoria Harbor. — Allen T. Chwang and Yuhai Chen; 129(10), 1138-48 (2003).

Humidity
Aging Approach to Water Effect on Alkali–Silica Reaction Degradation of Structures. —Alexander Steffens, Kefei Li, and Olivier Coussy; 129(1), 50-9 (2003).

Hurricanes
Estimating Uncertainty in the Extreme Value Analysis of Data Generated by a Hurricane Simulation Model. —Stuart Coles and Emil Simiu; 129(11), 1288-94 (2003).

Hybrid methods
Scale Transition in Steel-Concrete Interaction. II: Applications. — Roman Lackner and Herbert A. Mang; 129(4), 403-13 (2003).

Hydrodynamics
Incipient Motion of Bivalve Shells on Sand Beds under Flowing Water. —Subhasish Dey; 129(2), 232-40 (2003).

Hysteretic systems
Exact Solution for Dynamic Response of Multi-Degree-of-Freedom Bilinear Hysteretic Systems. — J. L. Liu; 129(11), 1342-50 (2003).

Imaging techniques
Particle Image Velocimetry System with Self-Organized Feature Map Algorithm. —Yuhai Chen and Allen T. Chwang; 129(10), 1156-63 (2003).
Shallow Turbulent Flows by Video Imaging Method. — J.-B. Zhang and V. H. Chu; 129(10), 1164-72 (2003).
Simultaneous Particle Image Velocimetry and Laser Doppler Velocimetry Measurements of Periodical Oscillatory Horseshoe Vortex System near Square Cylinder-Base Plate Juncture. —Chang Lin, Wen-Jiun Lai, and Kuang-An Chang; 129(10), 1173-88 (2003).
Combined Particle Image Velocimetry/Planar Laser Induced Fluorescence for Integral Modeling of Buoyant Jets. —Adrian Wing-Keung Law, Hongwei Wang, and Herlina; 129(10), 1189-96 (2003).

Impact
Interactive Failure of Two Impacting Beams. —Xiaoqing Teng and Tomasz Wierzbicki; 129(8), 918-26 (2003).
Perforation Thickness and Ballistic Limit of Concrete Target Subjected to Rigid Projectile Impact. — Q. M. Li and D. J. Tong; 129(9), 1083-91 (2003).
Effects of Seismically Induced Pounding at Expansion Joints of Concrete Bridges. — Sang-Hoon Kim and Masanobu Shinozuka; 129(11), 1225-34 (2003).

Incipient motion
Incipient Motion of Bivalve Shells on Sand Beds under Flowing Water. — Subhasish Dey; 129(2), 232-40 (2003).

Inelastic action
Plastic Torsional Buckling of Cruciform Compression Members. — Nicos Makris; 129(6), 689-96 (2003).

Interactions
Interactive Failure of Two Impacting Beams. — Xiaoqing Teng and Tomasz Wierzbicki; 129(8), 918-26 (2003).

Interfaces
Substructural Identification Method without Interface Measurement. — C. G Koh and K. Shankar; 129(7), 769-76 (2003).
Energy Release Rate due to Friction at Bimaterial Interface in Dams. — V. Sujatha and J. M. Chandra Kishen; 129(7), 793-800 (2003).

Intermediate loads
Exact Buckling Solutions For Rectangular Plates Under Intermediate and End Uniaxial Loads. —Y. Xiang, C. M. Wang, and S. Kitipornchai; 129(7), 835-8 (2003).

Isolation
Tension Buckling in Multilayer Elastomeric Bearings. — James M. Kelly; 129(12), 1363-8 (2003).

Isotropy
Spline Semidiscretization Analysis for Orthotropic Plates and Shells. —Chunxiang Li, Weijian Si, and Zhenyu Liu; 129(1), 60-70 (2003).
Creep of Polymer Matrix Composites. I: Norton/Bailey Creep Law for Transverse Isotropy. —D. N. Robinson, W. K. Binienda, and M. B. Ruggles; 129(3), 310-7 (2003).
Creep of Polymer Matrix Composites. II: Monkman-Grant Failure Relationship for Transverse Isotropy. —W. K. Binienda, D. N. Robinson, and M. B. Ruggles; 129(3), 318-23 (2003).

Jet grouting
Thermochemomechanical Assessment of Ground Improvement by Jet Grouting in Tunneling. —Christian Pichler, Roman Lackner, Yvonne Spira, and Herbert A. Mang; 129(8), 951-62 (2003).

Jets
Stability of Periodically Unsteady Axisymmetric Jet. — M. D. Carrara and M. R. Hajj; 129(5), 578-80 (2003).
Shallow Turbulent Flows by Video Imaging Method. — J.-B. Zhang and V. H. Chu; 129(10), 1164-72 (2003).

Joints
Dynamic Bending Strains in Planar Trusses with Pinned or Rigid Joints. —Y.-H. Pao and G. Sun; 129(3), 324-32 (2003).

Kinematics
"Biaxiality Effect" on the Energy Dissipated by Elastoplastic Base-Isolators. —Mauro Sassu; 129(6), 607-12 (2003).
Heterogeneous Strain and Bonded Granular Structure Change in Triaxial Specimen Studied by Computer Tomography. —C. S. Chang, T. Matsushima, and X. Lee; 129(11), 1295-307 (2003).

Kinetics
Characteristics of Hyperconcentrated Sediment-Laden Flows. — Jinren Ni, Xiangjiang Huang, and Alistair G. L. Borthwick; 129(12), 1489-93 (2003).

Laboratory tests
Particle Image Velocimetry Measurements within a Laboratory-Generated Swash Zone. — Edwin A. Cowen, In Mei Sou, Philip L.-F. Liu, and Britt Raubenheimer; 129(10), 1119-29 (2003).
Laboratory Measurements of Void Fraction and Turbulence in the Bore Region of Surf Zone Waves. — Daniel T. Cox and Sungwon Shin; 129(10), 1197-205 (2003).

Laminar flow
Laminar Water Wave and Current Passing Over Porous Bed. — Ping-cheng Hsieh, Hsi-heng Dai, and Liang-hsiung Huang; 129(6), 655-64 (2003).

Laminates
Imperfection Sensitivity of Laminated Cylindrical Shells According to Different Shell Theories. — Izhak Sheinman and Yiska Goldfeld; 129(9), 1048-53 (2003).

Lattices
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: I. Theory. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1439-48 (2003).

Layered systems
Forced Vertical Vibration of Circular Plate in Multilayered Poroelastic Medium. —Teerapong Senjuntichai and Yasothorn Sapsathiarn; 129(11), 1330-41 (2003).

Linear programming
Bounds on System Reliability by Linear Programming. — Junho Song and Armen Der Kiureghian; 129(6), 627-36 (2003).

Linear systems
State Space Formulation for Linear Viscoelastic Dynamic Systems with Memory. —A. Palmeri, F. Ricciardelli, A. De Luca, and G. Muscolino; 129(7), 715-24 (2003).

Loads
Dynamic Behavior of Orthotropic Rectangular Plates under Moving Loads. —X. Q. Zhu and S. S. Law; 129(1), 79-87 (2003).
Effect of Base Fixity on Buckling of Heavy Column with End Load. —C. Y. Wang; 129(1), 117-9 (2003).
Linear Stochastic Dynamical System under Uncertain Load: Inverse Reliability Analysis. —Abhijit Sarkar; 129(6), 665-71 (2003).
Dynamic Characteristics of Infinite and Finite Railways to Moving Loads. —Yung-Hsiang Chen and Yen-Hui Huang; 129(9), 987-95 (2003).
Elastic Stability and Second-Order Analysis of Three-Dimensional Frames: Effects of Column Orientation. —J. Darío Aristizábal-Ochoa; 129(11), 1254-67 (2003).

Localization
Constitutive Model for Concrete with Embedded Sets of Reinforcement. —S. Pietruszczak and A. Winnicki; 129(7), 725-38 (2003).

Magnetic fields
Large-Deflection Deformation of Ferromagnetic Plates in Magnetic Fields. —Xiaojing Zheng and Xingzhe Wang; 129(2), 245-8 (2003).

Maps
Particle Image Velocimetry System with Self-Organized Feature Map Algorithm. — Yuhai Chen and Allen T. Chwang; 129(10), 1156-63 (2003).

Markov chains
Subset Simulation and its Application to Seismic Risk Based on Dynamic Analysis. — S. K. Au and J. L. Beck; 129(8), 901-17 (2003).

Material properties
Frequency of Functionally Graded Plates with Three-Dimensional Asymptotic Approach. — J. N. Reddy and Zhen-Qiang Cheng; 129(8), 896-900 (2003).
Analysis of Heterogeneous Composites Based on Moving-Window Techniques. — L. L. Graham-Brady, E. F. Siragy, and S. C. Baxter; 129(9), 1054-64 (2003).

Materials tests
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: II. Computation and Validation. — Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1449-58 (2003).

Mathematical models
Refined Solutions of Externally Induced Sloshing in Half-Full Spherical Containers. —S. Papaspyrou, D. Valougeorgis, and S. A. Karamanos; 129(12), 1369-79 (2003).

Matrix methods
Matrix Analysis of Shear Lag and Shear Deformation in Thin-Walled Box Beams. —Yaping Wu, Shizhong Liu, Yuanlin Zhu, and Yuanming Lai; 129(8), 944-50 (2003).

Measurement
Damage Detection based on Single-Input-Single-Output Measurements. —P. J. Fanning and E. P. Carden; 129(2), 202-9 (2003).
Substructural Identification Method without Interface Measurement. —C. G Koh and K. Shankar; 129(7), 769-76 (2003).
Laboratory Measurements of Void Fraction and Turbulence in the Bore Region of Surf Zone Waves. — Daniel T. Cox and Sungwon Shin; 129(10), 1197-205 (2003).

Measuring instruments
Laser-Induced Fluorescence Measurements of a Turbulent Plume. —D. R. Webster, S. Rahman, and L. P. Dasi; 129(10), 1130-7 (2003).

Mechanical properties
Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part I: Theoretical Discussions. —Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 477-88 (2003).
Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part II: Numerical Investigations. —Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 489-501 (2003).

Membrane
Nonlinear Response of Fluid-Filled Membrane in Gravity Waves. —Amal C. Phadke and Kwok Fai Cheung; 129(7), 739-50 (2003).

Metals
Analytical Prediction of Fatigue Crack Propagation in Metals. —D. V. Ramsamooj; 129(6), 672-82 (2003).

Methodology
First- and Higher-Order Correlation Detection Using Wavelet Transforms. — K. Gurley, T. Kijewski, and A. Kareem; 129(2), 188-201 (2003).
Wavelet-Galerkin Method for Free Vibrations of Elastic Cable. — M. AL-Qassab and S. Nair; 129(3), 350-7 (2003).
Thermochemomechanical Assessment of Ground Improvement by Jet Grouting in Tunneling. — Christian Pichler, Roman Lackner, Yvonne Spira, and Herbert A. Mang; 129(8), 951-62 (2003).
Analysis of Heterogeneous Composites Based on Moving-Window Techniques. — L. L. Graham-Brady, E. F. Siragy, and S. C. Baxter; 129(9), 1054-64 (2003).

Micromechanics
Micromechanical Modeling of Filament Wound Cement-Based Composites. — B. Mobasher; 129(4), 373-82 (2003).

Microscopy
Characteristics of Hyperconcentrated Sediment-Laden Flows. —Jinren Ni, Xiangjiang Huang, and Alistair G. L. Borthwick; 129(12), 1489-93 (2003).

Microstructure
Smooth Convex Three-Dimensional Particle for the Discrete-Element Method. —Matthew R. Kuhn; 129(5), 539-47 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: I. Theory. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1439-48 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: II. Computation and Validation. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1449-58 (2003).
Characterization of Cement-Based Materials Using Diffuse Ultrasound. —Jens Becker, Laurence J. Jacobs, and Jianmin Qu; 129(12), 1478-84 (2003).

Microwaves
Decontamination of Radionuclides from Concrete by Microwave Heating. I: Theory. —Zdeněk P. Bažant and Goangseup Zi; 129(7), 777-84 (2003).
Decontamination of Radionuclides from Concrete by Microwave Heating. II: Computations. —Goangseup Zi and Zdeněk P. Bažant; 129(7), 785-92 (2003).

Model analysis
Dynamic Behavior of Orthotropic Rectangular Plates under Moving Loads. —X. Q. Zhu and S. S. Law; 129(1), 79-87 (2003).
Potential for Structural Failure in the Seismic Near Field. —Matthew W. Roberts and Loren D. Lutes; 129(8), 927-34 (2003).

Models
Biparametric Models for Elastic Wedge Foundation. — Joanna Marzęda, Volodymyr Pauk, and Margaret Woźniak; 129(1), 88-93 (2003).
Non-Gaussian Air Gap Response Models for Floating Structures. —Bert Sweetman and Steven R. Winterstein; 129(3), 302-9 (2003).
Experiments on a Full-Scale Building Model using Modified Sliding Mode Control. —Jong-Cheng Wu; 129(4), 363-72 (2003).

Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part I: Theoretical Discussions. — Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 477-88 (2003).
Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part II: Numerical Investigations. — Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 489-501 (2003).
Analytical Prediction of Fatigue Crack Propagation in Metals. — D. V. Ramsamooj; 129(6), 672-82 (2003).
Computational Analysis of Quality Reduction during Drying of Lumber due to Irrecoverable Deformation. I: Orthotropic Viscoelastic-Mechanosorptive-Plastic Material Model for the Transverse Plane of Wood. — Antti Hanhijärvi and Peter Mackenzie-Helnwein; 129(9), 996-1005 (2003).
Fracture Model for Flexural Failure of Beams Retrofitted with CARDIFRC. —Farshid Jandaghi Alaee and Bhushan Lal Karihaloo; 129(9), 1028-38 (2003).
Dynamics of a Class of Horizontal Setback Buildings. — Sudhir K. Jain and Chandrashekhar K. Jain; 129(9), 1092-103 (2003).
Creep Analysis of Axially Loaded Fiber Reinforced Polymer-Confined Concrete Columns. —Wassim Naguib and Amir Mirmiran; 129(11), 1308-19 (2003).

Motion

Elasticity of Space-Time: Basis of Newton's 2nd Law of Motion. —Kirk C. Valanis; 129(9), 1039-47 (2003).

Natural frequency

Vibration of Thick and Thin Plates Using a New Triangular Element. —A. H. Sheikh, P. Dey, and D. Sengupta; 129(11), 1235-44 (2003).
Vibratory Characteristics of Timoshenko Beams with Arbitrary Number of Cracks. —Q. S. Li; 129(11), 1355-9 (2003).

Neural networks

Particle Image Velocimetry System with Self-Organized Feature Map Algorithm. —Yuhai Chen and Allen T. Chwang; 129(10), 1156-63 (2003).

Nondestructive tests

Damage Detection in Concrete by Fourier and Wavelet Analyses. —Hani Melhem and Hansang Kim; 129(5), 571-7 (2003).

Nonlinear analysis

Nonlinear Creep Damage Model for Concrete under Uniaxial Compression. —Claudio Mazzotti and Marco Savoia; 129(9), 1065-75 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: I. Theory. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1439-48 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: II. Computation and Validation. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1449-58 (2003).

Nonlinear response

Nonlinear Response of Fluid-Filled Membrane in Gravity Waves. —Amal C. Phadke and Kwok Fai Cheung; 129(7), 739-50 (2003).

Nonlinear systems

Updating Properties of Nonlinear Dynamical Systems with Uncertain Input. — Ka-Veng Yuen and James L. Beck; 129(1), 9-20 (2003).
Spectral Approach to Equivalent Statistical Quadratization and Cubicization Methods for Nonlinear Oscillators. — Pol D. Spanos, Giuseppe Failla, and Mario Di Paola; 129(1), 31-42 (2003).

Numerical analysis

Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part II: Numerical Investigations. — Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 489-501 (2003).
Numerical Evaluation of Uniform Beam Modes. — Yu Tang; 129(12), 1475-7 (2003).

Numerical models

Numerical Modeling of Coupled Hygromechanical Degradation of Cementitious Materials. — Günther Meschke and Stefan Grasberger; 129(4), 383-92 (2003).

One-dimensional flow

Overfall in U-Shaped Channels. —Subhasish Dey; 129(3), 358-62 (2003).

Open channels

Overfall in U-Shaped Channels. —Subhasish Dey; 129(3), 358-62 (2003).

Orthotropism

Spline Semidiscretization Analysis for Orthotropic Plates and Shells. —Chunxiang Li, Weijian Si, and Zhenyu Liu; 129(1), 60-70 (2003).

Oscillations

Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. I: Analysis in Two Degrees of Freedom. — Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 514-25 (2003).
Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. II: Application to Taut Cables. —Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 526-38 (2003).
Experimental Study of a Horizontal Jet in a Wavy Environment. —Nobuhito Mori and Kuang-An Chang; 129(10), 1149-55 (2003).

Oscillators

Spectral Approach to Equivalent Statistical Quadratization and Cubicization Methods for Nonlinear Oscillators. —Pol D. Spanos, Giuseppe Failla, and Mario Di Paola; 129(1), 31-42 (2003).

Panels

Wave Propagation in Orthogonally Supported Periodic Curved Panels. —Chitaranjan Pany, S. Parthan, and M. Mukhopadhyay; 129(3), 342-9 (2003).
Postbuckling of Pressure-Loaded Functionally Graded Cylindrical Panels in Thermal Environments. — Hui-Shen Shen and Andrew Y. T. Leung; 129(4), 414-25 (2003).
Dynamic Stability of Laminated Composite Curved Panels with Cutouts. —S. K. Sahu and P. K. Datta; 129(11), 1245-53 (2003).

Particle distribution

Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: I. Theory. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1439-48 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: II. Computation and Validation. — Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1449-58 (2003).

Particle full velocity

Characteristics of Hyperconcentrated Sediment-Laden Flows. — Jinren Ni, Xiangjiang Huang, and Alistair G. L. Borthwick; 129(12), 1489-93 (2003).

Particle interactions

Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: I. Theory. — Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1439-48 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: II. Computation and Validation. — Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1449-58 (2003).

Particulate media

Modified Shear Spring Formulation for Discontinuous Deformation Analysis of Particulate Media. — Catherine O'Sullivan and Jonathan D. Bray; 129(7), 830-4 (2003).

Penetration; Perforating

Perforation Thickness and Ballistic Limit of Concrete Target Subjected to Rigid Projectile Impact. — Q. M. Li and D. J. Tong; 129(9), 1083-91 (2003).

Perturbation

Dean Equations Extended to a Rotating Helical Pipe Flow. —Jinsuo Zhang and Benzhao Zhang; 129(7), 823-9 (2003).
Modal Perturbation Method and its Applications in Structural Systems. —Menglin Lou and Genda Chen; 129(8), 935-43 (2003).

Piers

Measurements of Water Surface Profile and Velocity Field at a Circular Pier. —Kent R. Johnson and Francis C. K. Ting; 129(5), 502-13 (2003).

Pipe flow

Dean Equations Extended to a Rotating Helical Pipe Flow. —Jinsuo Zhang and Benzhao Zhang; 129(7), 823-9 (2003).
Analytical Solution for Fluid-Structure Interaction in Liquid-Filled Pipes Subjected to Impact-Induced Water Hammer. —Q. S. Li, Ke Yang, and Lixiang Zhang; 129(12), 1408-17 (2003).

Plasticity

Rate-Dependent Hyperplasticity with Internal Functions. — A. M. Puzrin and G. T. Houlsby; 129(3), 252-63 (2003).
Inelastic Cyclic Model for Steel Braces. —Jun Jin and Sherif El-Tawil; 129(5), 548-57 (2003).
"Biaxiality Effect" on the Energy Dissipated by Elastoplastic Base-Isolators. —Mauro Sassu; 129(6), 607-12 (2003).
Constitutive Model for Concrete with Embedded Sets of Reinforcement. —S. Pietruszczak and A. Winnicki; 129(7), 725-38 (2003).
Finite Element Studies of Asphalt Concrete Pavement Reinforced with Geogrid. —Hoe I. Ling and Huabei Liu; 129(7), 801-11 (2003).
Pressure-Level Dependency and Densification Behavior of Sand Through Generalized Plasticity Model. — Hoe I. Ling and Huabei Liu; 129(8), 851-60 (2003).
Consistent Finite-Element Response Sensitivity

Analysis. — J. P. Conte, P. K. Vijalapura, and M. Meghella; 129(12), 1380-93 (2003).

Plates

Spline Semidiscretization Analysis for Orthotropic Plates and Shells. — Chunxiang Li, Weijian Si, and Zhenyu Liu; 129(1), 60-70 (2003).

Dynamic Behavior of Orthotropic Rectangular Plates under Moving Loads. — X. Q. Zhu and S. S. Law; 129(1), 79-87 (2003).

Exact Solutions for Buckling of Multispan Rectangular Plates. — Y. Xiang; 129(2), 181-7 (2003).

Large-Deflection Deformation of Ferromagnetic Plates in Magnetic Fields. — Xiaojing Zheng and Xingzhe Wang; 129(2), 245-8 (2003).

Postbuckling Analysis of Plates Resting on a Tensionless Elastic Foundation. — A. S. de Holanda and P. B. Gonçalves; 129(4), 438-48 (2003).

Ritz Buckling Analysis of Rectangular Plates with Internal Hinge. — Y. Xiang, C. M. Wang, C. Y. Wang, and G. H. Su; 129(6), 683-8 (2003).

Stability of Stiffened Plates with Initial Imperfections. — P. Alagusundaramoorthy, S. Aruljayachandran, and R. Sundaravadivelu; 129(7), 751-8 (2003).

Vibration of Plates with Constrained V-Notches or Cracks. —O. G. McGee, A. W. Leissa, J. W. Kim, and Y. S. Kim; 129(7), 812-22 (2003).

Exact Buckling Solutions For Rectangular Plates Under Intermediate and End Uniaxial Loads. —Y. Xiang, C. M. Wang, and S. Kitipornchai; 129(7), 835-8 (2003).

Frequency of Functionally Graded Plates with Three-Dimensional Asymptotic Approach. —J. N. Reddy and Zhen-Qiang Cheng; 129(8), 896-900 (2003).

Simultaneous Particle Image Velocimetry and Laser Doppler Velocimetry Measurements of Periodical Oscillatory Horseshoe Vortex System near Square Cylinder-Base Plate Juncture. —Chang Lin, Wen-Jiun Lai, and Kuang-An Chang; 129(10), 1173-88 (2003).

Vibration of Thick and Thin Plates Using a New Triangular Element. —A. H. Sheikh, P. Dey, and D. Sengupta; 129(11), 1235-44 (2003).

Forced Vertical Vibration of Circular Plate in Multilayered Poroelastic Medium. —Teerapong Senjuntichai and Yasothorn Sapsathiarn; 129(11), 1330-41 (2003).

Plumes

Laser-Induced Fluorescence Measurements of a Turbulent Plume. —D. R. Webster, S. Rahman, and L. P. Dasi; 129(10), 1130-7 (2003).

Poisson ratio

Analytical Solution for Fluid-Structure Interaction in Liquid-Filled Pipes Subjected to Impact-Induced Water Hammer. —Q. S. Li, Ke Yang, and Lixiang Zhang; 129(12), 1408-17 (2003).

Polymers

Creep of Polymer Matrix Composites. I: Norton/Bailey Creep Law for Transverse Isotropy. —D. N. Robinson, W. K. Binienda, and M. B. Ruggles; 129(3), 310-7 (2003).

Creep of Polymer Matrix Composites. II: Monkman-Grant Failure Relationship for Transverse Isotropy. —W. K. Binienda, D. N. Robinson, and M. B. Ruggles; 129(3), 318-23 (2003).

Pore pressure

Decontamination of Radionuclides from Concrete by Microwave Heating. I: Theory. — Zdeněk P. Bažant and Goangseup Zi; 129(7), 777-84 (2003).

Decontamination of Radionuclides from Concrete by Microwave Heating. II: Computations. — Goangseup Zi and Zdeněk P. Bažant; 129(7), 785-92 (2003).

Poroelasticity

Poromechanics of Anisotropic Hollow Cylinders. — Mazen Kanj, Younane Abousleiman, and Roger Ghanem; 129(11), 1277-87 (2003).

Forced Vertical Vibration of Circular Plate in Multilayered Poroelastic Medium. — Teerapong Senjuntichai and Yasothorn Sapsathiarn; 129(11), 1330-41 (2003).

Porous media

Laminar Water Wave and Current Passing Over Porous Bed. — Ping-cheng Hsieh, Hsi-heng Dai, and Liang-hsiung Huang; 129(6), 655-64 (2003).

Poromechanics of Anisotropic Hollow Cylinders. — Mazen Kanj, Younane Abousleiman, and Roger Ghanem; 129(11), 1277-87 (2003).

Portland cement

Characterization of Cement-Based Materials Using Diffuse Ultrasound. —Jens Becker, Laurence J. Jacobs, and Jianmin Qu; 129(12), 1478-84 (2003).

Postbuckling

Postbuckling of Pressure-Loaded Functionally Graded Cylindrical Panels in Thermal Environments. — Hui-Shen Shen and Andrew Y. T. Leung; 129(4), 414-25 (2003).

Postbuckling Analysis of Plates Resting on a Tensionless Elastic Foundation. —A. S. de Holanda and P. B. Gonçalves; 129(4), 438-48 (2003).

Inelastic Cyclic Model for Steel Braces. —Jun Jin and Sherif El-Tawil; 129(5), 548-57 (2003).

Pressure distribution

Concentrations of Pressure Between an Elastically Supported Beam and a Moving Timoshenko-Beam. — Eugenia C. Cojocaru, Hans Irschik, and Kurt Schlacher; 129(9), 1076-82 (2003).

Prestressing

Behavior of Concrete Driven by Uniaxially Embedded Shape Memory Alloy Actuators. —Zongcai Deng, Qingbin Li, Anquan Jiu, and Lei Li; 129(6), 697-703 (2003).

Probabilistic methods

Bounds on System Reliability by Linear Programming. — Junho Song and Armen Der Kiureghian; 129(6), 627-36 (2003).

Probabilistic models

Uncertain Dynamical Systems in the Medium-Frequency Range. —C. Soize; 129(9), 1017-27 (2003).

Projectiles

Perforation Thickness and Ballistic Limit of Concrete Target Subjected to Rigid Projectile Impact. — Q. M. Li and D. J. Tong; 129(9), 1083-91 (2003).

Radiography

Heterogeneous Strain and Bonded Granular Structure Change in Triaxial Specimen Studied by Computer Tomography. —C. S. Chang, T. Matsushima, and X. Lee; 129(11), 1295-307 (2003).

Rail transportation

Dynamic Characteristics of Infinite and Finite Railways to Moving Loads. — Yung-Hsiang Chen and Yen-Hui Huang; 129(9), 987-95 (2003).

Railroad tracks

Dynamic Characteristics of Infinite and Finite Railways to Moving Loads. — Yung-Hsiang Chen and Yen-Hui Huang; 129(9), 987-95 (2003).

Concentrations of Pressure Between an Elastically Supported Beam and a Moving Timoshenko-Beam. — Eugenia C. Cojocaru, Hans Irschik, and Kurt Schlacher; 129(9), 1076-82 (2003).

Random processes

Moment Equation Analysis of Base-Isolated Buildings Subjected to Support Motion. — Giulio Fatica and Claudio Floris; 129(1), 94-106 (2003).

Non-Gaussian Simulation: Cumulative Distribution Function Map-Based Spectral Correction. — Forrest Masters and Kurtis R. Gurley; 129(12), 1418-28 (2003).

Random vibration

Spectral Approach to Equivalent Statistical Quadratization and Cubicization Methods for Nonlinear Oscillators. —Pol D. Spanos, Giuseppe Failla, and Mario Di Paola; 129(1), 31-42 (2003).

Reliability

Subset Simulation and its Application to Seismic Risk Based on Dynamic Analysis. —S. K. Au and J. L. Beck; 129(8), 901-17 (2003).

Reliability analysis

Bounds on System Reliability by Linear Programming. — Junho Song and Armen Der Kiureghian; 129(6), 627-36 (2003).

Linear Stochastic Dynamical System under Uncertain Load: Inverse Reliability Analysis. —Abhijit Sarkar; 129(6), 665-71 (2003).

Consistent Finite-Element Response Sensitivity Analysis. — J. P. Conte, P. K. Vijalapura, and M. Meghella; 129(12), 1380-93 (2003).

Response spectra

Potential for Structural Failure in the Seismic Near Field. —Matthew W. Roberts and Loren D. Lutes; 129(8), 927-34 (2003).

Retrofitting

Fracture Model for Flexural Failure of Beams Retrofitted with CARDIFRC. —Farshid Jandaghi Alaee and Bhushan Lal Karihaloo; 129(9), 1028-38 (2003).

Reynolds number

Fluctuations of Turbulent Bed Shear Stress. —Nian-Sheng Cheng and Adrian Wing-Keung Law; 129(1), 126-30 (2003).

Measurements of Water Surface Profile and Velocity Field at a Circular Pier. —Kent R. Johnson and Francis C. K. Ting; 129(5), 502-13 (2003).

Rheology

Electrorheological and Magnetorheological Duct Flow in Shear-Flow Mode Using Herschel-Bulkley Constitutive Model. —Joko Widjaja, Bijan Samali, and Jianchun Li; 129(12), 1459-65 (2003).

River beds

Cluster Evolution and Flow-Frictional Characteristics under Different Sediment Availabilities and Specific Gravity. —A. N. Papanicolaou and A. Schuyler; 129(10), 1206-19 (2003).

Sand
Effects of Cross Anisotropy on Three-Dimensional Behavior of Sand. I: Stress–Strain Behavior and Shear Banding. — Andrei V. Abelev and Poul V. Lade; 129(2), 160-6 (2003).
Effects of Cross Anisotropy on Three-Dimensional Behavior of Sand. II: Volume Change Behavior and Failure. — Poul V. Lade and Andrei V. Abelev; 129(2), 167-74 (2003).
Pressure-Level Dependency and Densification Behavior of Sand Through Generalized Plasticity Model. — Hoe I. Ling and Huabei Liu; 129(8), 851-60 (2003).

Sandwich structures
Control of Wave Propagation in Sandwich Plate Rows with Periodic Honeycomb Core. — Massimo Ruzzene and Panos Tsopelas; 129(9), 975-86 (2003).

Secondary flow
Dean Equations Extended to a Rotating Helical Pipe Flow. — Jinsuo Zhang and Benzhao Zhang; 129(7), 823-9 (2003).

Sediment
Cluster Evolution and Flow-Frictional Characteristics under Different Sediment Availabilities and Specific Gravity. —A. N. Papanicolaou and A. Schuyler; 129(10), 1206-19 (2003).
Characteristics of Hyperconcentrated Sediment-Laden Flows. —Jinren Ni, Xiangjiang Huang, and Alistair G. L. Borthwick; 129(12), 1489-93 (2003).

Sediment transport
Incipient Motion of Bivalve Shells on Sand Beds under Flowing Water. —Subhasish Dey; 129(2), 232-40 (2003).

Seismic analysis
Seismic Analysis and Design with Maxwell Dampers. — Mahendra P. Singh, Navin. P. Verma, and Luis M. Moreschi; 129(3), 273-82 (2003).

Seismic design
Seismic Analysis and Design with Maxwell Dampers. — Mahendra P. Singh, Navin. P. Verma, and Luis M. Moreschi; 129(3), 273-82 (2003).
Potential for Structural Failure in the Seismic Near Field. —Matthew W. Roberts and Loren D. Lutes; 129(8), 927-34 (2003).
Dynamics of a Class of Horizontal Setback Buildings. — Sudhir K. Jain and Chandrashekhar K. Jain; 129(9), 1092-103 (2003).
Seismic Design of Structures by Bundled Columns. —G. D. Hahn and B. P. Champlin; 129(12), 1466-74 (2003).

Seismic effects
Subset Simulation and its Application to Seismic Risk Based on Dynamic Analysis. —S. K. Au and J. L. Beck; 129(8), 901-17 (2003).

Seismic response
Earthquake Response of Elastic Single-Degree-of-Freedom Systems with Nonlinear Viscoelastic Dampers. — Wen-Hsiung Lin and Anil K. Chopra; 129(6), 597-606 (2003).
Refined Solutions of Externally Induced Sloshing in Half-Full Spherical Containers. —S. Papaspyrou, D. Valougeorgis, and S. A. Karamanos; 129(12), 1369-79 (2003).
Analytical Modeling, System Identification, and Tracking Performance of Uniaxial Seismic Simulators. — Brian S. Twitchell and Michael D. Symans; 129(12), 1485-8 (2003).

Seismic tests
Analytical Modeling, System Identification, and Tracking Performance of Uniaxial Seismic Simulators. — Brian S. Twitchell and Michael D. Symans; 129(12), 1485-8 (2003).

Sensitivity analysis
Structural Damage Detection and Assessment from Modal Response. — T. Pothisiri and K. D. Hjelmstad; 129(2), 135-45 (2003).
Consistent Finite-Element Response Sensitivity Analysis. — J. P. Conte, P. K. Vijalapura, and M. Meghella; 129(12), 1380-93 (2003).

Settlement
Finite Element Studies of Asphalt Concrete Pavement Reinforced with Geogrid. — Hoe I. Ling and Huabei Liu; 129(7), 801-11 (2003).

Shape
Shapes of Submerged Funicular Arches. — T. C. Fung; 129(1), 120-5 (2003).

Shear
Effects of Cross Anisotropy on Three-Dimensional Behavior of Sand. I: Stress–Strain Behavior and Shear Banding. —Andrei V. Abelev and Poul V. Lade; 129(2), 160-6 (2003).
Effects of Cross Anisotropy on Three-Dimensional Behavior of Sand. II: Volume Change Behavior and Failure. —Poul V. Lade and Andrei V. Abelev; 129(2), 167-74 (2003).

Shear deformation
Buckling and Postbuckling of Antisymmetrically Laminated Cross-ply Shear-Deformable Cylindrical Shells under Axial Compression. —Jianwu Zhang, Yanhai Xu, and Jinsong Wu; 129(1), 107-16 (2003).
Matrix Analysis of Shear Lag and Shear Deformation in Thin-Walled Box Beams. —Yaping Wu, Shizhong Liu, Yuanlin Zhu, and Yuanming Lai; 129(8), 944-50 (2003).

Shear flow
Electrorheological and Magnetorheological Duct Flow in Shear-Flow Mode Using Herschel-Bulkley Constitutive Model. —Joko Widjaja, Bijan Samali, and Jianchun Li; 129(12), 1459-65 (2003).

Shear lag
Matrix Analysis of Shear Lag and Shear Deformation in Thin-Walled Box Beams. —Yaping Wu, Shizhong Liu, Yuanlin Zhu, and Yuanming Lai; 129(8), 944-50 (2003).

Shear stress
Fluctuations of Turbulent Bed Shear Stress. —Nian-Sheng Cheng and Adrian Wing-Keung Law; 129(1), 126-30 (2003).

Shell structures
Nonlinear Buckling Simulations of Imperfect Shell Domes by Mixed Finite Elements. —Manabu Uchiyama and Seishi Yamada; 129(7), 707-14 (2003).

Shells
Spline Semidiscretization Analysis for Orthotropic Plates and Shells. —Chunxiang Li, Weijian Si, and Zhenyu Liu; 129(1), 60-70 (2003).
Incipient Motion of Bivalve Shells on Sand Beds under Flowing Water. —Subhasish Dey; 129(2), 232-40 (2003).

Ship motion
Field Measurement of Ship Waves in Victoria Harbor. — Allen T. Chwang and Yuhai Chen; 129(10), 1138-48 (2003).

Shores
Second-Order Radiation Boundary Condition for Water Wave Simulation with Large Angle Incidence. — Tai-Wen Hsu, Yuan-Jyh Lan, Ting-Kuei Tsay, and Kuei-Pin Lin; 129(12), 1429-38 (2003).

Silos
Numerical Investigation of Statistical Properties of Microslips in Silos. — O. Vinogradov and Y. Leonenko; 129(6), 637-40 (2003).

Simulation
Cohesive Fracturing and Stresses Caused by Hydration Heat in Massive Concrete Wall. — Zdeněk P. Bažant, Jin-Keun Kim, and Sang-Eun Jeon; 129(1), 21-30 (2003).
Coupled Mechanical and Chemical Damage in Calcium Leached Cementitious Structures. — Caroline Le Bellégo, Gilles Pijaudier-Cabot, Bruno Gérard, Jean-François Dubé, and Laurent Molez; 129(3), 333-41 (2003).
Smooth Convex Three-Dimensional Particle for the Discrete-Element Method. —Matthew R. Kuhn; 129(5), 539-47 (2003).
Subset Simulation and its Application to Seismic Risk Based on Dynamic Analysis. —S. K. Au and J. L. Beck; 129(8), 901-17 (2003).
Non-Gaussian Simulation: Cumulative Distribution Function Map-Based Spectral Correction. —Forrest Masters and Kurtis R. Gurley; 129(12), 1418-28 (2003).
Analytical Modeling, System Identification, and Tracking Performance of Uniaxial Seismic Simulators. — Brian S. Twitchell and Michael D. Symans; 129(12), 1485-8 (2003).

Simulation models
Poromechanics of Anisotropic Hollow Cylinders. —Mazen Kanj, Younane Abousleiman, and Roger Ghanem; 129(11), 1277-87 (2003).
Estimating Uncertainty in the Extreme Value Analysis of Data Generated by a Hurricane Simulation Model. —Stuart Coles and Emil Simiu; 129(11), 1288-94 (2003).

Size effect
Asymptotic Matching Analysis of Scaling of Structural Failure Due to Softening Hinges. II: Implications. — Zdeněk P. Bažant; 129(6), 651-4 (2003).

Skewness
Fluctuations of Turbulent Bed Shear Stress. —Nian-Sheng Cheng and Adrian Wing-Keung Law; 129(1), 126-30 (2003).

Slabs
Two Main Methods for Yield Line Analysis of Slabs. — Valentín Quintas; 129(2), 223-31 (2003).

Slenderness ratio
Stability of Stiffened Plates with Initial Imperfections. — P. Alagusundaramoorthy, S. Aruljayachandran, and R. Sundaravadivelu; 129(7), 751-8 (2003).

Sliding
Experiments on a Full-Scale Building Model using Modified Sliding Mode Control. —Jong-Cheng Wu; 129(4), 363-72 (2003).

Slip
Numerical Investigation of Statistical Properties of Microslips in Silos. — O. Vinogradov and Y. Leonenko; 129(6), 637-40 (2003).

Sloshing
Refined Solutions of Externally Induced Sloshing in Half-Full Spherical Containers. — S. Papaspyrou, D. Valougeorgis, and S. A. Karamanos; 129(12), 1369-79 (2003).

Softening
Scale Transition in Steel-Concrete Interaction. I: Model. — Roman Lackner and Herbert A. Mang; 129(4), 393-402 (2003).
Asymptotic Matching Analysis of Scaling of Structural Failure Due to Softening Hinges. I: Theory. — Zdeněk P. Bažant; 129(6), 641-50 (2003).
Asymptotic Matching Analysis of Scaling of Structural Failure Due to Softening Hinges. II: Implications. — Zdeněk P. Bažant; 129(6), 651-4 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: I. Theory. — Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1439-48 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: II. Computation and Validation. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1449-58 (2003).

Soil improvement
Thermochemomechanical Assessment of Ground Improvement by Jet Grouting in Tunneling. —Christian Pichler, Roman Lackner, Yvonne Spira, and Herbert A. Mang; 129(8), 951-62 (2003).

Soil mechanics
Modified Shear Spring Formulation for Discontinuous Deformation Analysis of Particulate Media. — Catherine O'Sullivan and Jonathan D. Bray; 129(7), 830-4 (2003).

Soils
Dynamic Soil Stiffnesses at Side of Embedded Structures with Rectangular Base. —Toyoaki Nogami and Harn S. Chen; 129(8), 963-73 (2003).

Solidification
Nonlinear Creep Damage Model for Concrete under Uniaxial Compression. —Claudio Mazzotti and Marco Savoia; 129(9), 1065-75 (2003).

Spacing
Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part I: Theoretical Discussions. —Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 477-88 (2003).
Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part II: Numerical Investigations. —Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 489-501 (2003).

Spectral density function
Updating Properties of Nonlinear Dynamical Systems with Uncertain Input. —Ka-Veng Yuen and James L. Beck; 129(1), 9-20 (2003).

Stability
Stability of Periodically Unsteady Axisymmetric Jet. — M. D. Carrara and M. R. Hajj; 129(5), 578-80 (2003).
Elastic Stability and Second-Order Analysis of Three-Dimensional Frames: Effects of Column Orientation. — J. Darío Aristizábal-Ochoa; 129(11), 1254-67 (2003).

Stability criteria
Buckling of Columns with Intermediate Elastic Restraint. — C. M. Wang and I. M. Nazmul; 129(2), 241-4 (2003).
Stability Criteria for Euler Columns with Intermediate and End Axial Loads. — C. M. Wang, C. Y. Wang, and I. M. Nazmul; 129(4), 468-72 (2003).
Exact Buckling Solutions For Rectangular Plates Under Intermediate and End Uniaxial Loads. — Y. Xiang, C. M. Wang, and S. Kitipornchai; 129(7), 835-8 (2003).

Standing waves
Experimental Study of a Horizontal Jet in a Wavy Environment. — Nobuhito Mori and Kuang-An Chang; 129(10), 1149-55 (2003).

Statistical analysis
Numerical Investigation of Statistical Properties of Microslips in Silos. — O. Vinogradov and Y. Leonenko; 129(6), 637-40 (2003).

Steady flow
Overfall in U-Shaped Channels. —Subhasish Dey; 129(3), 358-62 (2003).
Stability of Periodically Unsteady Axisymmetric Jet. — M. D. Carrara and M. R. Hajj; 129(5), 578-80 (2003).

Steady state models
Concentrations of Pressure Between an Elastically Supported Beam and a Moving Timoshenko-Beam. — Eugenia C. Cojocaru, Hans Irschik, and Kurt Schlacher; 129(9), 1076-82 (2003).

Steel
Scale Transition in Steel-Concrete Interaction. I: Model. — Roman Lackner and Herbert A. Mang; 129(4), 393-402 (2003).
Inelastic Cyclic Model for Steel Braces. —Jun Jin and Sherif El-Tawil; 129(5), 548-57 (2003).

Steel frames
Hybrid Beam-Column Element with End Frictional Joints. —S. S. Law, Z. M. Wu, and S. L. Chan; 129(5), 564-70 (2003).

Stiffening
Scale Transition in Steel-Concrete Interaction. I: Model. — Roman Lackner and Herbert A. Mang; 129(4), 393-402 (2003).

Stiffness
Dynamic Soil Stiffnesses at Side of Embedded Structures with Rectangular Base. —Toyoaki Nogami and Harn S. Chen; 129(8), 963-73 (2003).

Stochastic processes
Linear Stochastic Dynamical System under Uncertain Load: Inverse Reliability Analysis. —Abhijit Sarkar; 129(6), 665-71 (2003).
Response of Continuous System with Stochastically Varying Surface Roughness to Moving Load. — Christian A. Schenk and Lawrence A. Bergman; 129(7), 759-68 (2003).
Non-Gaussian Simulation: Cumulative Distribution Function Map-Based Spectral Correction. —Forrest Masters and Kurtis R. Gurley; 129(12), 1418-28 (2003).

Storage tanks
Refined Solutions of Externally Induced Sloshing in Half-Full Spherical Containers. — S. Papaspyrou, D. Valougeorgis, and S. A. Karamanos; 129(12), 1369-79 (2003).

Strain
Dynamic Bending Strains in Planar Trusses with Pinned or Rigid Joints. — Y.-H. Pao and G. Sun; 129(3), 324-32 (2003).
Heterogeneous Strain and Bonded Granular Structure Change in Triaxial Specimen Studied by Computer Tomography. — C. S. Chang, T. Matsushima, and X. Lee; 129(11), 1295-307 (2003).

Strain rate
Rate-Dependent Hyperplasticity with Internal Functions. — A. M. Puzrin and G. T. Houlsby; 129(3), 252-63 (2003).

Stratified flow
Field Experiment Study of Transient Stratified Flow in an Estuary. — Wenrui Huang, W. K. Jones, and Q. Yang; 129(10), 1220-3 (2003).

Stress
Cohesive Fracturing and Stresses Caused by Hydration Heat in Massive Concrete Wall. — Zdeněk P. Bažant, Jin-Keun Kim, and Sang-Eun Jeon; 129(1), 21-30 (2003).

Stress analysis
Stress Solution of Multiple Elliptic Hole Problem in Plane Elasticity. —L. Q. Zhang, Z. Q. Yue, C. F. Lee, L. G. Tham, and Z. F. Yang; 129(12), 1394-407 (2003).

Stress concentration
Stress Solution of Multiple Elliptic Hole Problem in Plane Elasticity. —L. Q. Zhang, Z. Q. Yue, C. F. Lee, L. G. Tham, and Z. F. Yang; 129(12), 1394-407 (2003).

Stress-strain relations
Effects of Cross Anisotropy on Three-Dimensional Behavior of Sand. I: Stress–Strain Behavior and Shear Banding. —Andrei V. Abelev and Poul V. Lade; 129(2), 160-6 (2003).
Effects of Cross Anisotropy on Three-Dimensional Behavior of Sand. II: Volume Change Behavior and Failure. —Poul V. Lade and Andrei V. Abelev; 129(2), 167-74 (2003).

Structural analysis
Design-Oriented Analysis of Structures—Unified Approach. — U. Kirsch; 129(3), 264-72 (2003).
Potential for Structural Failure in the Seismic Near Field. —Matthew W. Roberts and Loren D. Lutes; 129(8), 927-34 (2003).

Structural control
Instantaneous Optimal Wilson-Θ Control Method. —O. Bahar, M. R. Banan, M. Mahzoon, and Y. Kitagawa; 129(11), 1268-76 (2003).

Structural dynamics
Random Uncertainties Model in Dynamic Substructuring Using a Nonparametric Probabilistic Model. —C. Soize and H. Chebli ; 129(4), 449-57 (2003).
Substructural Identification Method without Interface Measurement. —C. G Koh and K. Shankar; 129(7), 769-76 (2003).

Structural failures
Asymptotic Matching Analysis of Scaling of Structural Failure Due to Softening Hinges. I: Theory. —Zdeněk P. Bažant; 129(6), 641-50 (2003).
Asymptotic Matching Analysis of Scaling of Struc-

tural Failure Due to Softening Hinges. II: Implications. — Zdeněk P. Bažant; 129(6), 651-4 (2003).

Structural reliability

Bounds on System Reliability by Linear Programming. — Junho Song and Armen Der Kiureghian; 129(6), 627-36 (2003).

Consistent Finite-Element Response Sensitivity Analysis. — J. P. Conte, P. K. Vijalapura, and M. Meghella; 129(12), 1380-93 (2003).

Structures

Aging Approach to Water Effect on Alkali–Silica Reaction Degradation of Structures. — Alexander Steffens, Kefei Li, and Olivier Coussy; 129(1), 50-9 (2003).

Structural Damage Detection and Assessment from Modal Response. — T. Pothisiri and K. D. Hjelmstad; 129(2), 135-45 (2003).

Damage Detection based on Single-Input-Single-Output Measurements. — P. J. Fanning and E. P. Carden; 129(2), 202-9 (2003).

Submerging

Analysis of Water Waves Passing Over a Submerged Rectangular Dike. —I-Chi Chan, Liang-Hsiung Huang, and Ping-Cheng Hsieh; 129(6), 613-26 (2003).

Substructures

Random Uncertainties Model in Dynamic Substructuring Using a Nonparametric Probabilistic Model. —C. Soize and H. Chebli ; 129(4), 449-57 (2003).

Substructural Identification Method without Interface Measurement. —C. G Koh and K. Shankar; 129(7), 769-76 (2003).

Sulfur

Modeling Water and Sulfuric Acid Transport through Coated Cement Concrete. —J. Liu and C. Vipulanandan; 129(4), 426-37 (2003).

Surf zone

Laboratory Measurements of Void Fraction and Turbulence in the Bore Region of Surf Zone Waves. — Daniel T. Cox and Sungwon Shin; 129(10), 1197-205 (2003).

Surface roughness

Response of Continuous System with Stochastically Varying Surface Roughness to Moving Load. — Christian A. Schenk and Lawrence A. Bergman; 129(7), 759-68 (2003).

Swelling

Aging Approach to Water Effect on Alkali–Silica Reaction Degradation of Structures. —Alexander Steffens, Kefei Li, and Olivier Coussy; 129(1), 50-9 (2003).

System reliability

Bounds on System Reliability by Linear Programming. — Junho Song and Armen Der Kiureghian; 129(6), 627-36 (2003).

Temperature

Behavior of Concrete Driven by Uniaxially Embedded Shape Memory Alloy Actuators. —Zongcai Deng, Qingbin Li, Anquan Jiu, and Lei Li; 129(6), 697-703 (2003).

Tension

Postbuckling Analysis of Plates Resting on a Tensionless Elastic Foundation. —A. S. de Holanda and P. B. Gonçalves; 129(4), 438-48 (2003).

Theories

Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part I: Theoretical Discussions. — Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 477-88 (2003).

Thermal analysis

Thermal Postbuckling of Uniform Columns on Elastic Foundation—Intuitive Solution. — G. Venkateswara Rao and K. Kanaka Raju; 129(11), 1351-4 (2003).

Thermal factors

Postbuckling of Pressure-Loaded Functionally Graded Cylindrical Panels in Thermal Environments. — Hui-Shen Shen and Andrew Y. T. Leung; 129(4), 414-25 (2003).

Thermal stresses

Decontamination of Radionuclides from Concrete by Microwave Heating. I: Theory. — Zdeněk P. Bažant and Goangseup Zi; 129(7), 777-84 (2003).

Decontamination of Radionuclides from Concrete by Microwave Heating. II: Computations. — Goangseup Zi and Zdeněk P. Bažant; 129(7), 785-92 (2003).

Thermodynamics

Rate-Dependent Hyperplasticity with Internal Functions. — A. M. Puzrin and G. T. Houlsby; 129(3), 252-63 (2003).

Thickness

Effects of Weakly Nonlinear Water Waves on Soft Poroelastic Bed with Finite Thickness. —Ping-cheng Hsieh and Liang-hsiung Huang; 129(2), 210-22 (2003).

Three-dimensional analysis

Three-Dimensional Discrete Element Method of Analysis of Clays. —M. Yao and A. Anandarajah; 129(6), 585-96 (2003).

Three-dimensional models

Investigation of Two- and Three-Dimensional Models of Transitional Flow Past a Square Cylinder. — A. K. Saha, K. Muralidhar, and G. Biswas; 129(11), 1320-9 (2003).

Tracking

Particle Image Velocimetry System with Self-Organized Feature Map Algorithm. —Yuhai Chen and Allen T. Chwang; 129(10), 1156-63 (2003).

Transverse shear

Concentrations of Pressure Between an Elastically Supported Beam and a Moving Timoshenko-Beam. — Eugenia C. Cojocaru, Hans Irschik, and Kurt Schlacher; 129(9), 1076-82 (2003).

Triaxial tests

Poromechanics of Anisotropic Hollow Cylinders. —Mazen Kanj, Younane Abousleiman, and Roger Ghanem; 129(11), 1277-87 (2003).

Trusses

Dynamic Bending Strains in Planar Trusses with Pinned or Rigid Joints. —Y.-H. Pao and G. Sun; 129(3), 324-32 (2003).

Tunneling

Scale Transition in Steel-Concrete Interaction. II: Applications. — Roman Lackner and Herbert A. Mang; 129(4), 403-13 (2003).

Thermochemomechanical Assessment of Ground Improvement by Jet Grouting in Tunneling. —Christian Pichler, Roman Lackner, Yvonne Spira, and Herbert A. Mang; 129(8), 951-62 (2003).

Turbulence

Aeroelastic Balance. — Yin Zhou and Ahsan Kareem; 129(3), 283-92 (2003).

Aeroelastic Analysis of Bridges: Effects of Turbulence and Aerodynamic Nonlinearities. — Xinzhong Chen and Ahsan Kareem; 129(8), 885-95 (2003).

Convection Velocity of Vortex Structures in the Near Wake of a Circular Cylinder. — Chang Lin and Shih-Chun Hsieh; 129(10), 1108-18 (2003).

Laboratory Measurements of Void Fraction and Turbulence in the Bore Region of Surf Zone Waves. — Daniel T. Cox and Sungwon Shin; 129(10), 1197-205 (2003).

Turbulent flow

Shallow Turbulent Flows by Video Imaging Method. — J.-B. Zhang and V. H. Chu; 129(10), 1164-72 (2003).

Two-dimensional models

Investigation of Two- and Three-Dimensional Models of Transitional Flow Past a Square Cylinder. — A. K. Saha, K. Muralidhar, and G. Biswas; 129(11), 1320-9 (2003).

Ultimate loads

Scale Transition in Steel-Concrete Interaction. II: Applications. — Roman Lackner and Herbert A. Mang; 129(4), 403-13 (2003).

Ultrasonic tests

Characterization of Cement-Based Materials Using Diffuse Ultrasound. —Jens Becker, Laurence J. Jacobs, and Jianmin Qu; 129(12), 1478-84 (2003).

Uncertainty

Random Uncertainties Model in Dynamic Substructuring Using a Nonparametric Probabilistic Model. —C. Soize and H. Chebli ; 129(4), 449-57 (2003).

Uncertain Dynamical Systems in the Medium-Frequency Range. —C. Soize; 129(9), 1017-27 (2003).

Estimating Uncertainty in the Extreme Value Analysis of Data Generated by a Hurricane Simulation Model. —Stuart Coles and Emil Simiu; 129(11), 1288-94 (2003).

Uncertainty analysis

Poromechanics of Anisotropic Hollow Cylinders. —Mazen Kanj, Younane Abousleiman, and Roger Ghanem; 129(11), 1277-87 (2003).

Underwater structures

Shapes of Submerged Funicular Arches. —T. C. Fung; 129(1), 120-5 (2003).

Unsteady flow

Stability of Periodically Unsteady Axisymmetric Jet. — M. D. Carrara and M. R. Hajj; 129(5), 578-80 (2003).

Shallow Turbulent Flows by Video Imaging Method. — J.-B. Zhang and V. H. Chu; 129(10), 1164-72 (2003).

Vegetation

Numerical Solution of Fully Developed Flow with Vegetative Resistance. —V. S. Neary; 129(5), 558-63 (2003).

Velocity

Measurements of Water Surface Profile and Velocity Field at a Circular Pier. —Kent R. Johnson and Francis C. K. Ting; 129(5), 502-13 (2003).

Convection Velocity of Vortex Structures in the

Near Wake of a Circular Cylinder. — Chang Lin and Shih-Chun Hsieh; 129(10), 1108-18 (2003).
Combined Particle Image Velocimetry/Planar Laser Induced Fluorescence for Integral Modeling of Buoyant Jets. — Adrian Wing-Keung Law, Hongwei Wang, and Herlina; 129(10), 1189-96 (2003).
Investigation of Two- and Three-Dimensional Models of Transitional Flow Past a Square Cylinder. — A. K. Saha, K. Muralidhar, and G. Biswas; 129(11), 1320-9 (2003).

Vibration

Vibration of Timoshenko Beams with Internal Hinge. — Y. Y. Lee, C. M. Wang, and S. Kitipornchai; 129(3), 293-301 (2003).
Wave Propagation in Orthogonally Supported Periodic Curved Panels. — Chitaranjan Pany, S. Parthan, and M. Mukhopadhyay; 129(3), 342-9 (2003).
Wavelet-Galerkin Method for Free Vibrations of Elastic Cable. — M. AL-Qassab and S. Nair; 129(3), 350-7 (2003).
Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. I: Analysis in Two Degrees of Freedom. — Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 514-25 (2003).
Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. II: Application to Taut Cables. —Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 526-38 (2003).
Vibration of Plates with Constrained V-Notches or Cracks. —O. G. McGee, A. W. Leissa, J. W. Kim, and Y. S. Kim; 129(7), 812-22 (2003).
Frequency of Functionally Graded Plates with Three-Dimensional Asymptotic Approach. —J. N. Reddy and Zhen-Qiang Cheng; 129(8), 896-900 (2003).
Dynamic Characteristics of Infinite and Finite Railways to Moving Loads. —Yung-Hsiang Chen and Yen-Hui Huang; 129(9), 987-95 (2003).
Vibration of Thick and Thin Plates Using a New Triangular Element. —A. H. Sheikh, P. Dey, and D. Sengupta; 129(11), 1235-44 (2003).
Dynamic Stability of Laminated Composite Curved Panels with Cutouts. —S. K. Sahu and P. K. Datta; 129(11), 1245-53 (2003).
Forced Vertical Vibration of Circular Plate in Multilayered Poroelastic Medium. —Teerapong Senjuntichai and Yasothorn Sapsathiarn; 129(11), 1330-41 (2003).
Numerical Evaluation of Uniform Beam Modes. —Yu Tang; 129(12), 1475-7 (2003).

Viscoelasticity

State Space Formulation for Linear Viscoelastic Dynamic Systems with Memory. —A. Palmeri, F. Ricciardelli, A. De Luca, and G. Muscolino; 129(7), 715-24 (2003).

Viscoplasticity

Rate-Dependent Hyperplasticity with Internal Functions. — A. M. Puzrin and G. T. Houlsby; 129(3), 252-63 (2003).

Viscosity

Laminar Water Wave and Current Passing Over Porous Bed. —Ping-cheng Hsieh, Hsi-heng Dai, and Liang-hsiung Huang; 129(6), 655-64 (2003).

Viscous flow

Analysis of Water Waves Passing Over a Submerged Rectangular Dike. — I-Chi Chan, Liang-Hsiung Huang, and Ping-Cheng Hsieh; 129(6), 613-26 (2003).

Vortices

Convection Velocity of Vortex Structures in the Near Wake of a Circular Cylinder. — Chang Lin and Shih-Chun Hsieh; 129(10), 1108-18 (2003).
Simultaneous Particle Image Velocimetry and Laser Doppler Velocimetry Measurements of Periodical Oscillatory Horseshoe Vortex System near Square Cylinder-Base Plate Juncture. — Chang Lin, Wen-Jiun Lai, and Kuang-An Chang; 129(10), 1173-88 (2003).

Walls

Cohesive Fracturing and Stresses Caused by Hydration Heat in Massive Concrete Wall. — Zdeněk P. Bažant, Jin-Keun Kim, and Sang-Eun Jeon; 129(1), 21-30 (2003).

Water

Modeling Water and Sulfuric Acid Transport through Coated Cement Concrete. — J. Liu and C. Vipulanandan; 129(4), 426-37 (2003).

Water pipelines

Analytical Solution for Fluid-Structure Interaction in Liquid-Filled Pipes Subjected to Impact-Induced Water Hammer. —Q. S. Li, Ke Yang, and Lixiang Zhang; 129(12), 1408-17 (2003).

Water surface profiles

Measurements of Water Surface Profile and Velocity Field at a Circular Pier. —Kent R. Johnson and Francis C. K. Ting; 129(5), 502-13 (2003).

Water waves

Effects of Weakly Nonlinear Water Waves on Soft Poroelastic Bed with Finite Thickness. —Ping-cheng Hsieh and Liang-hsiung Huang; 129(2), 210-22 (2003).
Analysis of Water Waves Passing Over a Submerged Rectangular Dike. —I-Chi Chan, Liang-Hsiung Huang, and Ping-Cheng Hsieh; 129(6), 613-26 (2003).
Laminar Water Wave and Current Passing Over Porous Bed. —Ping-cheng Hsieh, Hsi-heng Dai, and Liang-hsiung Huang; 129(6), 655-64 (2003).
Second-Order Radiation Boundary Condition for Water Wave Simulation with Large Angle Incidence. — Tai-Wen Hsu, Yuan-Jyh Lan, Ting-Kuei Tsay, and Kuei-Pin Lin; 129(12), 1429-38 (2003).

Wave measurement

Field Measurement of Ship Waves in Victoria Harbor. — Allen T. Chwang and Yuhai Chen; 129(10), 1138-48 (2003).

Wave propagation

Wave Propagation in Orthogonally Supported Periodic Curved Panels. —Chitaranjan Pany, S. Parthan, and M. Mukhopadhyay; 129(3), 342-9 (2003).
Control of Wave Propagation in Sandwich Plate Rows with Periodic Honeycomb Core. —Massimo Ruzzene and Panos Tsopelas; 129(9), 975-86 (2003).
Analytical Solution for Fluid-Structure Interaction in Liquid-Filled Pipes Subjected to Impact-Induced Water Hammer. —Q. S. Li, Ke Yang, and Lixiang Zhang; 129(12), 1408-17 (2003).
Second-Order Radiation Boundary Condition for Water Wave Simulation with Large Angle Incidence. — Tai-Wen Hsu, Yuan-Jyh Lan, Ting-Kuei Tsay, and Kuei-Pin Lin; 129(12), 1429-38 (2003).

Wave runup

Particle Image Velocimetry Measurements within a Laboratory-Generated Swash Zone. — Edwin A. Cowen, In Mei Sou, Philip L.-F. Liu, and Britt Raubenheimer; 129(10), 1119-29 (2003).

Wave spectra

Field Measurement of Ship Waves in Victoria Harbor. — Allen T. Chwang and Yuhai Chen; 129(10), 1138-48 (2003).

Waves

Flexible Porous Wave Barrier for Enhanced Wetlands Habitat Restoration. — A. N. Williams and K. H. Wang; 129(1), 1-8 (2003).

Wedges

Biparametric Models for Elastic Wedge Foundation. — Joanna Marzęda, Volodymyr Pauk, and Margaret Woźniak; 129(1), 88-93 (2003).

Wetlands

Flexible Porous Wave Barrier for Enhanced Wetlands Habitat Restoration. —A. N. Williams and K. H. Wang; 129(1), 1-8 (2003).

Wildlife habitats

Flexible Porous Wave Barrier for Enhanced Wetlands Habitat Restoration. —A. N. Williams and K. H. Wang; 129(1), 1-8 (2003).

Wind forces

Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. I: Analysis in Two Degrees of Freedom. — Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 514-25 (2003).
Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. II: Application to Taut Cables. —Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 526-38 (2003).
Aeroelastic Analysis of Bridges: Effects of Turbulence and Aerodynamic Nonlinearities. —Xinzhong Chen and Ahsan Kareem; 129(8), 885-95 (2003).

Wind loads

Aeroelastic Balance. —Yin Zhou and Ahsan Kareem; 129(3), 283-92 (2003).

Wind speed

Estimating Uncertainty in the Extreme Value Analysis of Data Generated by a Hurricane Simulation Model. —Stuart Coles and Emil Simiu; 129(11), 1288-94 (2003).

Wind tunnels

Aeroelastic Balance. —Yin Zhou and Ahsan Kareem; 129(3), 283-92 (2003).

Wood

Computational Analysis of Quality Reduction during Drying of Lumber due to Irrecoverable Deformation. I: Orthotropic Viscoelastic-Mechanosorptive-Plastic Material Model for the Transverse Plane of Wood. —Antti Hanhijärvi and Peter Mackenzie-Helnwein; 129(9), 996-1005 (2003).
Computational Analysis of Quality Reduction during Drying of Lumber due to Irrecoverable Deformation. II: Algorithmic Aspects and Practical Application. —Peter Mackenzie-Helnwein and Antti Hanhijärvi; 129(9), 1006-16 (2003).

Author Index

Abe, Masato
Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. I: Analysis in Two Degrees of Freedom. — Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 514-25 (2003).
Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. II: Application to Taut Cables. —Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 526-38 (2003).

Abelev, Andrei V.
Effects of Cross Anisotropy on Three-Dimensional Behavior of Sand. I: Stress–Strain Behavior and Shear Banding. —Andrei V. Abelev and Poul V. Lade; 129(2), 160-6 (2003).
Effects of Cross Anisotropy on Three-Dimensional Behavior of Sand. II: Volume Change Behavior and Failure. —Poul V. Lade and Andrei V. Abelev; 129(2), 167-74 (2003).

Abousleiman, Younane
Poromechanics of Anisotropic Hollow Cylinders. —Mazen Kanj, Younane Abousleiman, and Roger Ghanem; 129(11), 1277-87 (2003).

Ahmad, S.
Closure to "BEM Analysis of Two-Dimensional Elastodynamic Problems of Anisotropic Solids" by S. Ahmad, F. Leyte and R. K. N. D. Rajapakse. — S. Ahmad and F. Leyte; 129(1), 133-4 (2003).

Alaee, Farshid Jandaghi
Fracture Model for Flexural Failure of Beams Retrofitted with CARDIFRC. —Farshid Jandaghi Alaee and Bhushan Lal Karihaloo; 129(9), 1028-38 (2003).

Alagusundaramoorthy, P.
Stability of Stiffened Plates with Initial Imperfections. — P. Alagusundaramoorthy, S. Aruljayachandran, and R. Sundaravadivelu; 129(7), 751-8 (2003).

AL-Qassab, M.
Wavelet-Galerkin Method for Free Vibrations of Elastic Cable. —M. AL-Qassab and S. Nair; 129(3), 350-7 (2003).

Anandarajah, A.
Three-Dimensional Discrete Element Method of Analysis of Clays. —M. Yao and A. Anandarajah; 129(6), 585-96 (2003).

Aristizábal-Ochoa, J. Darío
Elastic Stability and Second-Order Analysis of Three-Dimensional Frames: Effects of Column Orientation. —J. Darío Aristizábal-Ochoa; 129(11), 1254-67 (2003).

Aruljayachandran, S.
Stability of Stiffened Plates with Initial Imperfections. — P. Alagusundaramoorthy, S. Aruljayachandran, and R. Sundaravadivelu; 129(7), 751-8 (2003).

Au, S. K.
Subset Simulation and its Application to Seismic Risk Based on Dynamic Analysis. — S. K. Au and J. L. Beck; 129(8), 901-17 (2003).
Discussion of "Redundancy Index of Lifeline Systems" by Masaru Hoshiya and Kinya Yamamoto. — S. K. Au; 129(9), 1104 (2003).

Averbuh, I.
Dynamics of Cable Structures. — K. Yu. Volokh, O. Vilnay, and I. Averbuh; 129(2), 175-80 (2003).

Bahar, O.
Instantaneous Optimal Wilson-Θ Control Method. — O. Bahar, M. R. Banan, M. Mahzoon, and Y. Kitagawa; 129(11), 1268-76 (2003).

Banan, M. R.
Instantaneous Optimal Wilson-Θ Control Method. -- O. Bahar, M. R. Banan, M. Mahzoon, and Y. Kitagawa; 129(11), 1268-76 (2003).

Barros, Pérsio Leister de Almeida
Discussion of "BEM Analysis of Two-Dimensional Elastodynamic Problems of Anisotropic Solids" by S. Ahmad, F. Leyte, and R. K. N. D. Rajapakse. —Pérsio Leister de Almeida Barros; 129(1), 131-2 (2003).

Baxter, S. C.
Analysis of Heterogeneous Composites Based on Moving-Window Techniques. —L. L. Graham-Brady, E. F. Siragy, and S. C. Baxter; 129(9), 1054-64 (2003).

Bažant, Zdeněk P.
Cohesive Fracturing and Stresses Caused by Hydration Heat in Massive Concrete Wall. —Zdeněk P. Bažant, Jin-Keun Kim, and Sang-Eun Jeon; 129(1), 21-30 (2003).
Asymptotic Matching Analysis of Scaling of Structural Failure Due to Softening Hinges. I: Theory. —Zdeněk P. Bažant; 129(6), 641-50 (2003).
Asymptotic Matching Analysis of Scaling of Structural Failure Due to Softening Hinges. II: Implications. — Zdeněk P. Bažant; 129(6), 651-4 (2003).
Decontamination of Radionuclides from Concrete by Microwave Heating. I: Theory. —Zdeněk P. Bažant and Goangseup Zi; 129(7), 777-84 (2003).
Decontamination of Radionuclides from Concrete by Microwave Heating. II: Computations. —Goangseup Zi and Zdeněk P. Bažant; 129(7), 785-92 (2003).
Closure to "Why Did the World Trade Center Collapse?—Simple Analysis" by Zdeněk P. Bažant and Yong Zhou. —Zdeněk P. Bažant and Yong Zhou; 129(7), 839-40 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: I. Theory. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1439-48 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: II. Computation and Validation. — Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1449-58 (2003).

Beck, J. L.
Subset Simulation and its Application to Seismic Risk Based on Dynamic Analysis. — S. K. Au and J. L. Beck; 129(8), 901-17 (2003).

Beck, James L.
Updating Properties of Nonlinear Dynamical Systems with Uncertain Input. — Ka-Veng Yuen and James L. Beck; 129(1), 9-20 (2003).

Becker, Jens
Characterization of Cement-Based Materials Using Diffuse Ultrasound. — Jens Becker, Laurence J. Jacobs, and Jianmin Qu; 129(12), 1478-84 (2003).

Bergman, Lawrence A.
Sliding Mode Control of Cable-Stayed Bridge Subjected to Seismic Excitation. — Seok J. Moon, Lawrence A. Bergman, and Petros G. Voulgaris; 129(1), 71-8 (2003).
Response of Continuous System with Stochastically Varying Surface Roughness to Moving Load. — Christian A. Schenk and Lawrence A. Bergman; 129(7), 759-68 (2003).

Betti, Raimondo
Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part I: Theoretical Discussions. —Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 477-88 (2003).
Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part II: Numerical Investigations. —Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 489-501 (2003).

Binienda, W. K.
Creep of Polymer Matrix Composites. I: Norton/Bailey Creep Law for Transverse Isotropy. —D. N. Robinson, W. K. Binienda, and M. B. Ruggles; 129(3), 310-7 (2003).
Creep of Polymer Matrix Composites. II: Monkman-Grant Failure Relationship for Transverse Isotropy. —W. K. Binienda, D. N. Robinson, and M. B. Ruggles; 129(3), 318-23 (2003).

Biswas, G.
Investigation of Two- and Three-Dimensional Models of Transitional Flow Past a Square Cylinder. — A. K. Saha, K. Muralidhar, and G. Biswas; 129(11), 1320-9 (2003).

Borthwick, Alistair G. L.
Characteristics of Hyperconcentrated Sediment-Laden Flows. —Jinren Ni, Xiangjiang Huang, and Alistair G. L. Borthwick; 129(12), 1489-93 (2003).

Bray, Jonathan D.
Modified Shear Spring Formulation for Discontinuous Deformation Analysis of Particulate Media. — Catherine O'Sullivan and Jonathan D. Bray; 129(7), 830-4 (2003).

Carden, E. P.
Damage Detection based on Single-Input-Single-Output Measurements. — P. J. Fanning and E. P. Carden; 129(2), 202-9 (2003).

Carrara, M. D.
Stability of Periodically Unsteady Axisymmetric Jet. — M. D. Carrara and M. R. Hajj; 129(5), 578-80 (2003).

Cebon, David
Closure to "Could the World Trade Center Have Been Modified to Prevent its Collapse?" by David E. Newland and David Cebon. — David E. Newland and David Cebon; 129(11), 1360-1 (2003).

Cedolin, Luigi
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: I. Theory. — Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1439-48 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: II. Computation and Validation. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1449-58 (2003).

Champlin, B. P.
Seismic Design of Structures by Bundled Columns. —G. D. Hahn and B. P. Champlin; 129(12), 1466-74 (2003).

Chan, I-Chi
Analysis of Water Waves Passing Over a Submerged Rectangular Dike. —I-Chi Chan, Liang-Hsiung Huang, and Ping-Cheng Hsieh; 129(6), 613-26 (2003).

Chan, S. L.
Hybrid Beam-Column Element with End Frictional Joints. —S. S. Law, Z. M. Wu, and S. L. Chan; 129(5), 564-70 (2003).

Chang, C. S.
Heterogeneous Strain and Bonded Granular Structure Change in Triaxial Specimen Studied by Computer Tomography. —C. S. Chang, T. Matsushima, and X. Lee; 129(11), 1295-307 (2003).

Chang, Kuang-An
Experimental Study of a Horizontal Jet in a Wavy Environment. —Nobuhito Mori and Kuang-An Chang; 129(10), 1149-55 (2003).
Simultaneous Particle Image Velocimetry and Laser Doppler Velocimetry Measurements of Periodical Oscillatory Horseshoe Vortex System near Square Cylinder-Base Plate Juncture. —Chang Lin, Wen-Jiun Lai, and Kuang-An Chang; 129(10), 1173-88 (2003).

Chang, Shuenn-Yih
Nonlinear Error Propagation Analysis for Explicit Pseudodynamic Algorithm. —Shuenn-Yih Chang; 129(8), 841-50 (2003).

Chebli , H.
Random Uncertainties Model in Dynamic Substructuring Using a Nonparametric Probabilistic Model. —C. Soize and H. Chebli ; 129(4), 449-57 (2003).

Chen, Genda
Modal Perturbation Method and its Applications in Structural Systems. — Menglin Lou and Genda Chen; 129(8), 935-43 (2003).

Chen, Hamn-Ching
Study of Environmental Fluid Mechanics Using State-of-the-Art Experimental Techniques and Instrumentation. — Keh-Han Wang, Michelle H. Teng, and Hamn-Ching Chen; 129(10), 1107 (2003).

Chen, Harn S.
Dynamic Soil Stiffnesses at Side of Embedded Structures with Rectangular Base. — Toyoaki Nogami and Harn S. Chen; 129(8), 963-73 (2003).

Chen, Xinzhong
Curve Veering of Eigenvalue Loci of Bridges with Aeroelastic Effects. — Xinzhong Chen and Ahsan Kareem; 129(2), 146-59 (2003).
Aeroelastic Analysis of Bridges: Effects of Turbulence and Aerodynamic Nonlinearities. — Xinzhong Chen and Ahsan Kareem; 129(8), 885-95 (2003).

Chen, Yuhai
Field Measurement of Ship Waves in Victoria Harbor. — Allen T. Chwang and Yuhai Chen; 129(10), 1138-48 (2003).
Particle Image Velocimetry System with Self-Organized Feature Map Algorithm. —Yuhai Chen and Allen T. Chwang; 129(10), 1156-63 (2003).

Chen, Yung-Hsiang
Dynamic Characteristics of Infinite and Finite Railways to Moving Loads. —Yung-Hsiang Chen and Yen-Hui Huang; 129(9), 987-95 (2003).

Cheng, Nian-Sheng
Fluctuations of Turbulent Bed Shear Stress. —Nian-Sheng Cheng and Adrian Wing-Keung Law; 129(1), 126-30 (2003).

Cheng, Zhen-Qiang
Frequency of Functionally Graded Plates with Three-Dimensional Asymptotic Approach. —J. N. Reddy and Zhen-Qiang Cheng; 129(8), 896-900 (2003).

Cheung, Kwok Fai
Nonlinear Response of Fluid-Filled Membrane in Gravity Waves. —Amal C. Phadke and Kwok Fai Cheung; 129(7), 739-50 (2003).

Chopra, Anil K.
Earthquake Response of Elastic Single-Degree-of-Freedom Systems with Nonlinear Viscoelastic Dampers. — Wen-Hsiung Lin and Anil K. Chopra; 129(6), 597-606 (2003).

Chu, V. H.
Shallow Turbulent Flows by Video Imaging Method. — J.-B. Zhang and V. H. Chu; 129(10), 1164-72 (2003).

Chwang, Allen T.
Field Measurement of Ship Waves in Victoria Harbor. — Allen T. Chwang and Yuhai Chen; 129(10), 1138-48 (2003).
Particle Image Velocimetry System with Self-Organized Feature Map Algorithm. —Yuhai Chen and Allen T. Chwang; 129(10), 1156-63 (2003).

Cojocaru, Eugenia C.
Concentrations of Pressure Between an Elastically Supported Beam and a Moving Timoshenko-Beam. — Eugenia C. Cojocaru, Hans Irschik, and Kurt Schlacher; 129(9), 1076-82 (2003).

Coles, Stuart
Estimating Uncertainty in the Extreme Value Analysis of Data Generated by a Hurricane Simulation Model. — Stuart Coles and Emil Simiu; 129(11), 1288-94 (2003).

Conte, J. P.
Consistent Finite-Element Response Sensitivity Analysis. — J. P. Conte, P. K. Vijalapura, and M. Meghella; 129(12), 1380-93 (2003).

Coussy, Olivier
Aging Approach to Water Effect on Alkali–Silica Reaction Degradation of Structures. — Alexander Steffens, Kefei Li, and Olivier Coussy; 129(1), 50-9 (2003).

Cowen, Edwin A.
Particle Image Velocimetry Measurements within a Laboratory-Generated Swash Zone. — Edwin A. Cowen, In Mei Sou, Philip L.-F. Liu, and Britt Raubenheimer; 129(10), 1119-29 (2003).

Cox, Daniel T.
Laboratory Measurements of Void Fraction and Turbulence in the Bore Region of Surf Zone Waves. — Daniel T. Cox and Sungwon Shin; 129(10), 1197-205 (2003).

Cusatis, Gianluca
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: I. Theory. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1439-48 (2003).
Confinement-Shear Lattice Model for Concrete Damage in Tension and Compression: II. Computation and Validation. —Gianluca Cusatis, Zdeněk P. Bažant, and Luigi Cedolin; 129(12), 1449-58 (2003).

Dai, Hsi-heng
Laminar Water Wave and Current Passing Over Porous Bed. —Ping-cheng Hsieh, Hsi-heng Dai, and Liang-hsiung Huang; 129(6), 655-64 (2003).

Dasi, L. P.
Laser-Induced Fluorescence Measurements of a Turbulent Plume. —D. R. Webster, S. Rahman, and L. P. Dasi; 129(10), 1130-7 (2003).

Datta, P. K.
Dynamic Stability of Laminated Composite Curved Panels with Cutouts. —S. K. Sahu and P. K. Datta; 129(11), 1245-53 (2003).

De Angelis, Maurizio
Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part I: Theoretical Discussions. —Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 477-88 (2003).
Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part II: Numerical Investigations. —Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 489-501 (2003).

de Holanda, A. S.
Postbuckling Analysis of Plates Resting on a Tensionless Elastic Foundation. —A. S. de Holanda and P. B. Gonçalves; 129(4), 438-48 (2003).

De Luca, A.
State Space Formulation for Linear Viscoelastic Dynamic Systems with Memory. — A. Palmeri, F. Ricciardelli, A. De Luca, and G. Muscolino; 129(7), 715-24 (2003).

Deng, Zongcai
Behavior of Concrete Driven by Uniaxially Embedded Shape Memory Alloy Actuators. — Zongcai Deng, Qingbin Li, Anquan Jiu, and Lei Li; 129(6), 697-703 (2003).

Der Kiureghian, Armen
Bounds on System Reliability by Linear Programming. — Junho Song and Armen Der Kiureghian; 129(6), 627-36 (2003).

Deschapelles, Bernardo
Discussion of "Solution Method for Beams on Nonuniform Elastic Foundation" by Ya-Jun Guo and Y. Jack Weitsman. — Bernardo Deschapelles; 129(8), 974 (2003).

Dey, P.
Vibration of Thick and Thin Plates Using a New Triangular Element. —A. H. Sheikh, P. Dey, and D. Sengupta; 129(11), 1235-44 (2003).

Dey, Subhasish
Incipient Motion of Bivalve Shells on Sand Beds under Flowing Water. —Subhasish Dey; 129(2), 232-40 (2003).
Overfall in U-Shaped Channels. —Subhasish Dey; 129(3), 358-62 (2003).

Di Paola, Mario
Spectral Approach to Equivalent Statistical Quadratization and Cubicization Methods for Nonlinear Oscillators. —Pol D. Spanos, Giuseppe Failla, and Mario Di Paola; 129(1), 31-42 (2003).

Dubé, Jean-François
Coupled Mechanical and Chemical Damage in Calcium Leached Cementitious Structures. —Caroline Le Bellégo, Gilles Pijaudier-Cabot, Bruno Gérard, Jean-François Dubé, and Laurent Molez; 129(3), 333-41 (2003).

El-Tawil, Sherif
Inelastic Cyclic Model for Steel Braces. —Jun Jin and Sherif El-Tawil; 129(5), 548-57 (2003).

Failla, Giuseppe
Spectral Approach to Equivalent Statistical Quadratization and Cubicization Methods for Nonlinear Oscillators. —Pol D. Spanos, Giuseppe Failla, and Mario Di Paola; 129(1), 31-42 (2003).

Fanning, P. J.
Damage Detection based on Single-Input-Single-Output Measurements. —P. J. Fanning and E. P. Carden; 129(2), 202-9 (2003).

Fatica, Giulio
Moment Equation Analysis of Base-Isolated Buildings Subjected to Support Motion. —Giulio Fatica and Claudio Floris; 129(1), 94-106 (2003).

Floris, Claudio
Moment Equation Analysis of Base-Isolated Buildings Subjected to Support Motion. —Giulio Fatica and Claudio Floris; 129(1), 94-106 (2003).

Fujino, Yozo
Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. I: Analysis in Two Degrees of Freedom. — Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 514-25 (2003).
Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. II: Application to Taut Cables. — Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 526-38 (2003).

Fung, T. C.
Shapes of Submerged Funicular Arches. — T. C. Fung; 129(1), 120-5 (2003).

Gérard, Bruno
Coupled Mechanical and Chemical Damage in Calcium Leached Cementitious Structures. — Caroline Le Bellégo, Gilles Pijaudier-Cabot, Bruno Gérard, Jean-François Dubé, and Laurent Molez; 129(3), 333-41 (2003).

Ghanem, Roger
Poromechanics of Anisotropic Hollow Cylinders. — Mazen Kanj, Younane Abousleiman, and Roger Ghanem; 129(11), 1277-87 (2003).

Goldfeld, Yiska
Imperfection Sensitivity of Laminated Cylindrical Shells According to Different Shell Theories. —Izhak Sheinman and Yiska Goldfeld; 129(9), 1048-53 (2003).

Gonçalves, P. B.
Postbuckling Analysis of Plates Resting on a Tensionless Elastic Foundation. —A. S. de Holanda and P. B. Gonçalves; 129(4), 438-48 (2003).

Graham-Brady, L. L.
Analysis of Heterogeneous Composites Based on Moving-Window Techniques. —L. L. Graham-Brady, E. F. Siragy, and S. C. Baxter; 129(9), 1054-64 (2003).

Grasberger, Stefan
Numerical Modeling of Coupled Hygromechanical Degradation of Cementitious Materials. —Günther Meschke and Stefan Grasberger; 129(4), 383-92 (2003).

Grigoriu, Mircea
Algorithm for Generating Samples of Homogeneous Gaussian Fields. —Mircea Grigoriu; 129(1), 43-9 (2003).
Editor's Note. —Mircea Grigoriu; 129(3), 251 (2003).

Guo, Ya-Jun
Closure to "Solution Method for Beams on Nonuniform Elastic Foundations" by Ya-Jun Guo and Y. Jack Weitsman. —Ya-Jun Guo and Y. Jack Weitsman; 129(8), 974 (2003).

Gurley, K.
First- and Higher-Order Correlation Detection Using Wavelet Transforms. —K. Gurley, T. Kijewski, and A. Kareem; 129(2), 188-201 (2003).

Gurley, Kurtis R.
Non-Gaussian Simulation: Cumulative Distribution Function Map-Based Spectral Correction. —Forrest Masters and Kurtis R. Gurley; 129(12), 1418-28 (2003).

Hahn, G. D.
Seismic Design of Structures by Bundled Columns. —G. D. Hahn and B. P. Champlin; 129(12), 1466-74 (2003).

Hajj, M. R.
Stability of Periodically Unsteady Axisymmetric Jet. — M. D. Carrara and M. R. Hajj; 129(5), 578-80 (2003).

Hanhijärvi, Antti
Computational Analysis of Quality Reduction during Drying of Lumber due to Irrecoverable Deformation. I: Orthotropic Viscoelastic-Mechanosorptive-Plastic Material Model for the Transverse Plane of Wood. — Antti Hanhijärvi and Peter Mackenzie-Helnwein; 129(9), 996-1005 (2003).
Computational Analysis of Quality Reduction during Drying of Lumber due to Irrecoverable Deformation. II: Algorithmic Aspects and Practical Application. — Peter Mackenzie-Helnwein and Antti Hanhijärvi; 129(9), 1006-16 (2003).

Hartzell, Stephen
Hilbert-Huang Transform Analysis of Dynamic and Earthquake Motion Recordings. — Ray Ruichong Zhang, Shuo Ma, Erdal Safak, and Stephen Hartzell; 129(8), 861-75 (2003).

Herlina
Combined Particle Image Velocimetry/Planar Laser Induced Fluorescence for Integral Modeling of Buoyant Jets. —Adrian Wing-Keung Law, Hongwei Wang, and Herlina; 129(10), 1189-96 (2003).

Hjelmstad, K. D.
Structural Damage Detection and Assessment from Modal Response. —T. Pothisiri and K. D. Hjelmstad; 129(2), 135-45 (2003).

Hörmann, Matthias
Closure to "Numerical Investigation of Fiber Reinforced Polymers Poststrengthened Concrete Slabs" by Matthias Hörmann, Horst Menrath, and Ekkehard Ramm. —Matthias Hörmann, Horst Menrath, and Ekkehard Ramm; 129(5), 583 (2003).

Hoshiya, Masaru
Closure to "Redundancy Index of Lifeline Systems" by Masaru Hoshiya and Kinya Yamamoto. — Masaru Hoshiya and Kinya Yamamoto; 129(9), 1105 (2003).

Houlsby, G. T.
Rate-Dependent Hyperplasticity with Internal Functions. — A. M. Puzrin and G. T. Houlsby; 129(3), 252-63 (2003).

Hsieh, Ping-Cheng
Analysis of Water Waves Passing Over a Submerged Rectangular Dike. —I-Chi Chan, Liang-Hsiung Huang, and Ping-Cheng Hsieh; 129(6), 613-26 (2003).

Hsieh, Ping-cheng
Effects of Weakly Nonlinear Water Waves on Soft Poroelastic Bed with Finite Thickness. —Ping-cheng Hsieh and Liang-hsiung Huang; 129(2), 210-22 (2003).
Laminar Water Wave and Current Passing Over Porous Bed. —Ping-cheng Hsieh, Hsi-heng Dai, and Liang-hsiung Huang; 129(6), 655-64 (2003).

Hsieh, Shih-Chun
Convection Velocity of Vortex Structures in the Near Wake of a Circular Cylinder. —Chang Lin and Shih-Chun Hsieh; 129(10), 1108-18 (2003).

Hsu, Tai-Wen
Second-Order Radiation Boundary Condition for Water Wave Simulation with Large Angle Incidence. — Tai-Wen Hsu, Yuan-Jyh Lan, Ting-Kuei Tsay, and Kuei-Pin Lin; 129(12), 1429-38 (2003).

Huang, Ching-Tung
Considerations of Multimode Structural Response for Near-Field Earthquakes. — Ching-Tung Huang; 129(4), 458-67 (2003).

Huang, Liang-Hsiung
Analysis of Water Waves Passing Over a Submerged Rectangular Dike. — I-Chi Chan, Liang-Hsiung Huang, and Ping-Cheng Hsieh; 129(6), 613-26 (2003).

Huang, Liang-hsiung
Effects of Weakly Nonlinear Water Waves on Soft Poroelastic Bed with Finite Thickness. — Ping-cheng Hsieh and Liang-hsiung Huang; 129(2), 210-22 (2003).
Laminar Water Wave and Current Passing Over Porous Bed. — Ping-cheng Hsieh, Hsi-heng Dai, and Liang-hsiung Huang; 129(6), 655-64 (2003).

Huang, Wenrui
Field Experiment Study of Transient Stratified Flow in an Estuary. —Wenrui Huang, W. K. Jones, and Q. Yang; 129(10), 1220-3 (2003).

Huang, Xiangjiang
Characteristics of Hyperconcentrated Sediment-Laden Flows. —Jinren Ni, Xiangjiang Huang, and Alistair G. L. Borthwick; 129(12), 1489-93 (2003).

Huang, Yen-Hui
Dynamic Characteristics of Infinite and Finite Railways to Moving Loads. —Yung-Hsiang Chen and Yen-Hui Huang; 129(9), 987-95 (2003).

Irschik, Hans
Concentrations of Pressure Between an Elastically Supported Beam and a Moving Timoshenko-Beam. — Eugenia C. Cojocaru, Hans Irschik, and Kurt Schlacher; 129(9), 1076-82 (2003).

Jacobs, Laurence J.
Characterization of Cement-Based Materials Using Diffuse Ultrasound. —Jens Becker, Laurence J. Jacobs, and Jianmin Qu; 129(12), 1478-84 (2003).

Jain, Chandrashekhar K.
Dynamics of a Class of Horizontal Setback Buildings. — Sudhir K. Jain and Chandrashekhar K. Jain; 129(9), 1092-103 (2003).

Jain, Sudhir K.
Dynamics of a Class of Horizontal Setback Buildings. — Sudhir K. Jain and Chandrashekhar K. Jain; 129(9), 1092-103 (2003).

Jeon, Sang-Eun
Cohesive Fracturing and Stresses Caused by Hydration Heat in Massive Concrete Wall. —Zdeněk P. Bažant, Jin-Keun Kim, and Sang-Eun Jeon; 129(1), 21-30 (2003).

Jin, Jun
Inelastic Cyclic Model for Steel Braces. —Jun Jin and Sherif El-Tawil; 129(5), 548-57 (2003).

Jiu, Anquan
Behavior of Concrete Driven by Uniaxially Embedded Shape Memory Alloy Actuators. — Zongcai Deng, Qingbin Li, Anquan Jiu, and Lei Li; 129(6), 697-703 (2003).

Johnson, Kent R.
Measurements of Water Surface Profile and Velocity Field at a Circular Pier. — Kent R. Johnson and Francis C. K. Ting; 129(5), 502-13 (2003).

Jones, W. K.
Field Experiment Study of Transient Stratified Flow in an Estuary. — Wenrui Huang, W. K. Jones, and Q. Yang; 129(10), 1220-3 (2003).

Kanj, Mazen
Poromechanics of Anisotropic Hollow Cylinders. — Mazen Kanj, Younane Abousleiman, and Roger Ghanem; 129(11), 1277-87 (2003).

Karamanos, S. A.
Refined Solutions of Externally Induced Sloshing in Half-Full Spherical Containers. — S. Papaspyrou, D. Valougeorgis, and S. A. Karamanos; 129(12), 1369-79 (2003).

Kareem, A.
First- and Higher-Order Correlation Detection Using Wavelet Transforms. — K. Gurley, T. Kijewski, and A. Kareem; 129(2), 188-201 (2003).

Kareem, Ahsan
Curve Veering of Eigenvalue Loci of Bridges with Aeroelastic Effects. —Xinzhong Chen and Ahsan Kareem; 129(2), 146-59 (2003).
Aeroelastic Balance. —Yin Zhou and Ahsan Kareem; 129(3), 283-92 (2003).
Aeroelastic Analysis of Bridges: Effects of Turbulence and Aerodynamic Nonlinearities. —Xinzhong Chen and Ahsan Kareem; 129(8), 885-95 (2003).

Karihaloo, Bhushan Lal
Fracture Model for Flexural Failure of Beams Retrofitted with CARDIFRC. —Farshid Jandaghi Alaee and Bhushan Lal Karihaloo; 129(9), 1028-38 (2003).

Kelly, James M.
Tension Buckling in Multilayer Elastomeric Bearings. — James M. Kelly; 129(12), 1363-8 (2003).

Kijewski, T.
First- and Higher-Order Correlation Detection Using Wavelet Transforms. —K. Gurley, T. Kijewski, and A. Kareem; 129(2), 188-201 (2003).

Kim, Hansang
Damage Detection in Concrete by Fourier and Wavelet Analyses. —Hani Melhem and Hansang Kim; 129(5), 571-7 (2003).

Kim, J. W.
Vibration of Plates with Constrained V-Notches or Cracks. —O. G. McGee, A. W. Leissa, J. W. Kim, and Y. S. Kim; 129(7), 812-22 (2003).

Kim, Jin-Keun
Cohesive Fracturing and Stresses Caused by Hydration Heat in Massive Concrete Wall. —Zdeněk P. Bažant, Jin-Keun Kim, and Sang-Eun Jeon; 129(1), 21-30 (2003).

Kim, Sang-Hoon
Effects of Seismically Induced Pounding at Expansion Joints of Concrete Bridges. — Sang-Hoon Kim and Masanobu Shinozuka; 129(11), 1225-34 (2003).

Kim, Y. S.
Vibration of Plates with Constrained V-Notches or Cracks. — O. G. McGee, A. W. Leissa, J. W. Kim, and Y. S. Kim; 129(7), 812-22 (2003).

Kirsch, U.
Design-Oriented Analysis of Structures—Unified Approach. — U. Kirsch; 129(3), 264-72 (2003).

Kishen, J. M. Chandra
Energy Release Rate due to Friction at Bimaterial Interface in Dams. — V. Sujatha and J. M. Chandra Kishen; 129(7), 793-800 (2003).

Kitagawa, Y.
Instantaneous Optimal Wilson-Θ Control Method. — O. Bahar, M. R. Banan, M. Mahzoon, and Y. Kitagawa; 129(11), 1268-76 (2003).

Kitipornchai, S.
Vibration of Timoshenko Beams with Internal Hinge. — Y. Y. Lee, C. M. Wang, and S. Kitipornchai; 129(3), 293-301 (2003).
Exact Buckling Solutions For Rectangular Plates Under Intermediate and End Uniaxial Loads. —Y. Xiang, C. M. Wang, and S. Kitipornchai; 129(7), 835-8 (2003).
Buckling of Vertical Cylindrical Shells Under Combined End Pressure and Body Force. —C. W. Lim, Y. F. Ma, S. Kitipornchai, C. M. Wang, and R. K. K. Yuen; 129(8), 876-84 (2003).

Koh, C. G
Substructural Identification Method without Interface Measurement. —C. G Koh and K. Shankar; 129(7), 769-76 (2003).

Kuhn, Matthew R.
Smooth Convex Three-Dimensional Particle for the Discrete-Element Method. —Matthew R. Kuhn; 129(5), 539-47 (2003).

Lackner, Roman
Scale Transition in Steel-Concrete Interaction. I: Model. — Roman Lackner and Herbert A. Mang; 129(4), 393-402 (2003).
Scale Transition in Steel-Concrete Interaction. II: Applications. — Roman Lackner and Herbert A. Mang; 129(4), 403-13 (2003).
Thermochemomechanical Assessment of Ground Improvement by Jet Grouting in Tunneling. —Christian Pichler, Roman Lackner, Yvonne Spira, and Herbert A. Mang; 129(8), 951-62 (2003).

Lade, Poul V.
Effects of Cross Anisotropy on Three-Dimensional Behavior of Sand. I: Stress–Strain Behavior and Shear Banding. —Andrei V. Abelev and Poul V. Lade; 129(2), 160-6 (2003).
Effects of Cross Anisotropy on Three-Dimensional Behavior of Sand. II: Volume Change Behavior and Failure. —Poul V. Lade and Andrei V. Abelev; 129(2), 167-74 (2003).
Closure to "Analysis of Shear Banding in True Triaxial Tests on Sand" by Poul V. Lade and Qiong Wang. —Poul V. Lade and Qiong Wang; 129(4), 474-5 (2003).

Lai, Wen-Jiun
Simultaneous Particle Image Velocimetry and Laser Doppler Velocimetry Measurements of Periodical Oscillatory Horseshoe Vortex System near Square Cylinder-Base Plate Juncture. — Chang Lin, Wen-Jiun Lai, and Kuang-An Chang; 129(10), 1173-88 (2003).

Lai, Yuanming
Matrix Analysis of Shear Lag and Shear Deformation in Thin-Walled Box Beams. — Yaping Wu, Shizhong Liu, Yuanlin Zhu, and Yuanming Lai; 129(8), 944-50 (2003).

Lan, Yuan-Jyh
Second-Order Radiation Boundary Condition for Water Wave Simulation with Large Angle Incidence. — Tai-Wen Hsu, Yuan-Jyh Lan, Ting-Kuei Tsay, and Kuei-Pin Lin; 129(12), 1429-38 (2003).

Law, Adrian Wing-Keung
Fluctuations of Turbulent Bed Shear Stress. — Nian-Sheng Cheng and Adrian Wing-Keung Law; 129(1), 126-30 (2003).
Combined Particle Image Velocimetry/Planar Laser Induced Fluorescence for Integral Modeling of Buoyant Jets. —Adrian Wing-Keung Law, Hongwei Wang, and Herlina; 129(10), 1189-96 (2003).

Law, S. S.
Dynamic Behavior of Orthotropic Rectangular Plates under Moving Loads. —X. Q. Zhu and S. S. Law; 129(1), 79-87 (2003).
Hybrid Beam-Column Element with End Frictional Joints. —S. S. Law, Z. M. Wu, and S. L. Chan; 129(5), 564-70 (2003).

Le Bellégo, Caroline
Coupled Mechanical and Chemical Damage in Calcium Leached Cementitious Structures. —Caroline Le Bellégo, Gilles Pijaudier-Cabot, Bruno Gérard, Jean-François Dubé, and Laurent Molez; 129(3), 333-41 (2003).

Le Diouron, Thomas
Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. I: Analysis in Two Degrees of Freedom. — Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 514-25 (2003).
Control of Wind-Induced Self-Excited Oscillations by Transfer of Internal Energy to Higher Modes of Vibration. II: Application to Taut Cables. —Thomas Le Diouron, Yozo Fujino, and Masato Abe; 129(5), 526-38 (2003).

Lee, C. F.
Stress Solution of Multiple Elliptic Hole Problem in Plane Elasticity. —L. Q. Zhang, Z. Q. Yue, C. F. Lee, L. G. Tham, and Z. F. Yang; 129(12), 1394-407 (2003).

Lee, X.
Heterogeneous Strain and Bonded Granular Structure Change in Triaxial Specimen Studied by Computer Tomography. —C. S. Chang, T. Matsushima, and X. Lee; 129(11), 1295-307 (2003).

Lee, Y. Y.
Vibration of Timoshenko Beams with Internal Hinge. — Y. Y. Lee, C. M. Wang, and S. Kitipornchai; 129(3), 293-301 (2003).

Leissa, A. W.
Vibration of Plates with Constrained V-Notches or Cracks. — O. G. McGee, A. W. Leissa, J. W. Kim, and Y. S. Kim; 129(7), 812-22 (2003).

Leonenko, Y.
Numerical Investigation of Statistical Properties of Microslips in Silos. — O. Vinogradov and Y. Leonenko; 129(6), 637-40 (2003).

Leung, Andrew Y. T.
Postbuckling of Pressure-Loaded Functionally Graded Cylindrical Panels in Thermal Environments. — Hui-Shen Shen and Andrew Y. T. Leung; 129(4), 414-25 (2003).

Leyte, F.
Closure to "BEM Analysis of Two-Dimensional Elastodynamic Problems of Anisotropic Solids" by S. Ahmad, F. Leyte and R. K. N. D. Rajapakse. — S. Ahmad and F. Leyte; 129(1), 133-4 (2003).

Li, Chunxiang
Spline Semidiscretization Analysis for Orthotropic Plates and Shells. — Chunxiang Li, Weijian Si, and Zhenyu Liu; 129(1), 60-70 (2003).

Li, Jianchun
Electrorheological and Magnetorheological Duct Flow in Shear-Flow Mode Using Herschel-Bulkley Constitutive Model. —Joko Widjaja, Bijan Samali, and Jianchun Li; 129(12), 1459-65 (2003).

Li, Kefei
Aging Approach to Water Effect on Alkali–Silica Reaction Degradation of Structures. —Alexander Steffens, Kefei Li, and Olivier Coussy; 129(1), 50-9 (2003).

Li, Lei
Behavior of Concrete Driven by Uniaxially Embedded Shape Memory Alloy Actuators. —Zongcai Deng, Qingbin Li, Anquan Jiu, and Lei Li; 129(6), 697-703 (2003).

Li, Q. M.
Perforation Thickness and Ballistic Limit of Concrete Target Subjected to Rigid Projectile Impact. — Q. M. Li and D. J. Tong; 129(9), 1083-91 (2003).

Li, Q. S.
Vibratory Characteristics of Timoshenko Beams with Arbitrary Number of Cracks. —Q. S. Li; 129(11), 1355-9 (2003).
Analytical Solution for Fluid-Structure Interaction in Liquid-Filled Pipes Subjected to Impact-Induced Water Hammer. —Q. S. Li, Ke Yang, and Lixiang Zhang; 129(12), 1408-17 (2003).

Li, Qingbin
Behavior of Concrete Driven by Uniaxially Embedded Shape Memory Alloy Actuators. —Zongcai Deng, Qingbin Li, Anquan Jiu, and Lei Li; 129(6), 697-703 (2003).

Lim, C. W.
Buckling of Vertical Cylindrical Shells Under Combined End Pressure and Body Force. —C. W. Lim, Y. F. Ma, S. Kitipornchai, C. M. Wang, and R. K. K. Yuen; 129(8), 876-84 (2003).

Lin, Chang
Convection Velocity of Vortex Structures in the Near Wake of a Circular Cylinder. —Chang Lin and Shih-Chun Hsieh; 129(10), 1108-18 (2003).
Simultaneous Particle Image Velocimetry and Laser Doppler Velocimetry Measurements of Periodical Oscillatory Horseshoe Vortex System near Square Cylinder-Base Plate Juncture. — Chang Lin, Wen-Jiun Lai, and Kuang-An Chang; 129(10), 1173-88 (2003).

Lin, Kuei-Pin
Second-Order Radiation Boundary Condition for Water Wave Simulation with Large Angle Incidence. — Tai-Wen Hsu, Yuan-Jyh Lan, Ting-Kuei Tsay, and Kuei-Pin Lin; 129(12), 1429-38 (2003).

Lin, Wen-Hsiung
Earthquake Response of Elastic Single-Degree-of-Freedom Systems with Nonlinear Viscoelastic Dampers. — Wen-Hsiung Lin and Anil K. Chopra; 129(6), 597-606 (2003).

Ling, Hoe I.
Finite Element Studies of Asphalt Concrete Pavement Reinforced with Geogrid. — Hoe I. Ling and Huabei Liu; 129(7), 801-11 (2003).
Pressure-Level Dependency and Densification Behavior of Sand Through Generalized Plasticity Model. — Hoe I. Ling and Huabei Liu; 129(8), 851-60 (2003).

Liu, Huabei
Finite Element Studies of Asphalt Concrete Pavement Reinforced with Geogrid. —Hoe I. Ling and Huabei Liu; 129(7), 801-11 (2003).
Pressure-Level Dependency and Densification Behavior of Sand Through Generalized Plasticity Model. — Hoe I. Ling and Huabei Liu; 129(8), 851-60 (2003).

Liu, J.
Modeling Water and Sulfuric Acid Transport through Coated Cement Concrete. —J. Liu and C. Vipulanandan; 129(4), 426-37 (2003).

Liu, J. L.
Exact Solution for Dynamic Response of Multi-Degree-of-Freedom Bilinear Hysteretic Systems. — J. L. Liu; 129(11), 1342-50 (2003).

Liu, Philip L.-F.
Particle Image Velocimetry Measurements within a Laboratory-Generated Swash Zone. —Edwin A. Cowen, In Mei Sou, Philip L.-F. Liu, and Britt Raubenheimer; 129(10), 1119-29 (2003).

Liu, Shizhong
Matrix Analysis of Shear Lag and Shear Deformation in Thin-Walled Box Beams. —Yaping Wu, Shizhong Liu, Yuanlin Zhu, and Yuanming Lai; 129(8), 944-50 (2003).

Liu, Zhenyu
Spline Semidiscretization Analysis for Orthotropic Plates and Shells. —Chunxiang Li, Weijian Si, and Zhenyu Liu; 129(1), 60-70 (2003).

Longman, Richard W.
Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part I: Theoretical Discussions. —Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 477-88 (2003).
Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part II: Numerical Investigations. —Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 489-501 (2003).

López Cela, J. J.
Discussion of "Analysis of Shear Banding in True Triaxial Tests on Sand" by Poul V. Lade and Qiong Wang. — J. J. López Cela; 129(4), 473-4 (2003).

Lou, Menglin
Modal Perturbation Method and its Applications in Structural Systems. — Menglin Lou and Genda Chen; 129(8), 935-43 (2003).

Luş, Hilmi
Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part I: Theoretical Discussions. — Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 477-88 (2003).
Constructing Second-Order Models of Mechanical Systems from Identified State Space Realizations. Part II: Numerical Investigations. — Hilmi Luş, Maurizio De Angelis, Raimondo Betti, and Richard W. Longman; 129(5), 489-501 (2003).

Lutes, Loren D.
Potential for Structural Failure in the Seismic Near Field. — Matthew W. Roberts and Loren D. Lutes; 129(8), 927-34 (2003).

Ma, Shuo
Hilbert-Huang Transform Analysis of Dynamic and Earthquake Motion Recordings. —Ray Ruichong Zhang, Shuo Ma, Erdal Safak, and Stephen Hartzell; 129(8), 861-75 (2003).

Ma, Y. F.
Buckling of Vertical Cylindrical Shells Under Combined End Pressure and Body Force. —C. W. Lim, Y. F. Ma, S. Kitipornchai, C. M. Wang, and R. K. K. Yuen; 129(8), 876-84 (2003).

Mackenzie-Helnwein, Peter
Computational Analysis of Quality Reduction during Drying of Lumber due to Irrecoverable Deformation. I: Orthotropic Viscoelastic-Mechanosorptive-Plastic Material Model for the Transverse Plane of Wood. —Antti Hanhijärvi and Peter Mackenzie-Helnwein; 129(9), 996-1005 (2003).
Computational Analysis of Quality Reduction during Drying of Lumber due to Irrecoverable Deformation. II: Algorithmic Aspects and Practical Application. —Peter Mackenzie-Helnwein and Antti Hanhijärvi; 129(9), 1006-16 (2003).

Mahzoon, M.
Instantaneous Optimal Wilson-Θ Control Method. —O. Bahar, M. R. Banan, M. Mahzoon, and Y. Kitagawa; 129(11), 1268-76 (2003).

Makris, Nicos
Plastic Torsional Buckling of Cruciform Compression Members. —Nicos Makris; 129(6), 689-96 (2003).

Mang, Herbert A.
Scale Transition in Steel-Concrete Interaction. I: Model. — Roman Lackner and Herbert A. Mang; 129(4), 393-402 (2003).
Scale Transition in Steel-Concrete Interaction. II: Applications. — Roman Lackner and Herbert A. Mang; 129(4), 403-13 (2003).
Thermochemomechanical Assessment of Ground Improvement by Jet Grouting in Tunneling. —Christian Pichler, Roman Lackner, Yvonne Spira, and Herbert A. Mang; 129(8), 951-62 (2003).

Marzęda, Joanna
Biparametric Models for Elastic Wedge Foundation. — Joanna Marzęda, Volodymyr Pauk, and Margaret Woźniak; 129(1), 88-93 (2003).

Masters, Forrest
Non-Gaussian Simulation: Cumulative Distribution Function Map-Based Spectral Correction. — Forrest Masters and Kurtis R. Gurley; 129(12), 1418-28 (2003).

Maisushima, T.
Heterogeneous Strain and Bonded Granular Structure Change in Triaxial Specimen Studied by Computer Tomography. — C. S. Chang, T. Matsushima, and X. Lee; 129(11), 1295-307 (2003).

Mazzotti, Claudio
Nonlinear Creep Damage Model for Concrete under Uniaxial Compression. — Claudio Mazzotti and Marco Savoia; 129(9), 1065-75 (2003).

McGee, O. G.
Vibration of Plates with Constrained V-Notches or Cracks. —O. G. McGee, A. W. Leissa, J. W. Kim, and Y. S. Kim; 129(7), 812-22 (2003).

Meghella, M.
Consistent Finite-Element Response Sensitivity Analysis. — J. P. Conte, P. K. Vijalapura, and M. Meghella; 129(12), 1380-93 (2003).

Mei Sou, In
Particle Image Velocimetry Measurements within a Laboratory-Generated Swash Zone. —Edwin A. Cowen, In Mei Sou, Philip L.-F. Liu, and Britt Raubenheimer; 129(10), 1119-29 (2003).

Melhem, Hani
Damage Detection in Concrete by Fourier and Wavelet Analyses. —Hani Melhem and Hansang Kim; 129(5), 571-7 (2003).

Menrath, Horst
Closure to "Numerical Investigation of Fiber Reinforced Polymers Poststrengthened Concrete Slabs" by Matthias Hörmann, Horst Menrath, and Ekkehard Ramm. —Matthias Hörmann, Horst Menrath, and Ekkehard Ramm; 129(5), 583 (2003).

Meschke, Günther
Numerical Modeling of Coupled Hygromechanical Degradation of Cementitious Materials. —Günther Meschke and Stefan Grasberger; 129(4), 383-92 (2003).

Mirmiran, Amir
Creep Analysis of Axially Loaded Fiber Reinforced Polymer-Confined Concrete Columns. —Wassim Naguib and Amir Mirmiran; 129(11), 1308-19 (2003).

Mobasher, B.
Micromechanical Modeling of Filament Wound Cement-Based Composites. —B. Mobasher; 129(4), 373-82 (2003).

Molez, Laurent
Coupled Mechanical and Chemical Damage in Calcium Leached Cementitious Structures. —Caroline Le Bellégo, Gilles Pijaudier-Cabot, Bruno Gérard, Jean-François Dubé, and Laurent Molez; 129(3), 333-41 (2003).

Moon, Seok J.
Sliding Mode Control of Cable-Stayed Bridge Subjected to Seismic Excitation. —Seok J. Moon, Lawrence A. Bergman, and Petros G. Voulgaris; 129(1), 71-8 (2003).

Moreschi, Luis M.
Seismic Analysis and Design with Maxwell Dampers. — Mahendra P. Singh, Navin. P. Verma, and Luis M. Moreschi; 129(3), 273-82 (2003).

Mori, Nobuhito
Experimental Study of a Horizontal Jet in a Wavy Environment. — Nobuhito Mori and Kuang-An Chang; 129(10), 1149-55 (2003).

Mukhopadhyay, M.
Wave Propagation in Orthogonally Supported Periodic Curved Panels. — Chitaranjan Pany, S. Parthan, and M. Mukhopadhyay; 129(3), 342-9 (2003).

Muralidhar, K.
Investigation of Two- and Three-Dimensional Models of Transitional Flow Past a Square Cylinder. — A. K. Saha, K. Muralidhar, and G. Biswas; 129(11), 1320-9 (2003).

Muscolino, G.
State Space Formulation for Linear Viscoelastic Dynamic Systems with Memory. —A. Palmeri, F. Ricciardelli, A. De Luca, and G. Muscolino; 129(7), 715-24 (2003).

Naguib, Wassim
Creep Analysis of Axially Loaded Fiber Reinforced Polymer-Confined Concrete Columns. —Wassim Naguib and Amir Mirmiran; 129(11), 1308-19 (2003).

Nair, S.
Wavelet-Galerkin Method for Free Vibrations of Elastic Cable. —M. AL-Qassab and S. Nair; 129(3), 350-7 (2003).

Nazmul, I. M.
Buckling of Columns with Intermediate Elastic Restraint. — C. M. Wang and I. M. Nazmul; 129(2), 241-4 (2003).
Stability Criteria for Euler Columns with Intermediate and End Axial Loads. —C. M. Wang, C. Y. Wang, and I. M. Nazmul; 129(4), 468-72 (2003).

Neary, V. S.
Numerical Solution of Fully Developed Flow with Vegetative Resistance. —V. S. Neary; 129(5), 558-63 (2003).

Newland, David E.
Closure to "Could the World Trade Center Have Been Modified to Prevent its Collapse?" by David E. Newland and David Cebon. —David E. Newland and David Cebon; 129(11), 1360-1 (2003).

Ni, Jinren
Characteristics of Hyperconcentrated Sediment-Laden Flows. —Jinren Ni, Xiangjiang Huang, and Alistair G. L. Borthwick; 129(12), 1489-93 (2003).

Nogami, Toyoaki
Dynamic Soil Stiffnesses at Side of Embedded Structures with Rectangular Base. —Toyoaki Nogami and Harn S. Chen; 129(8), 963-73 (2003).

O'Sullivan, Catherine
Modified Shear Spring Formulation for Discontinuous Deformation Analysis of Particulate Media. — Catherine O'Sullivan and Jonathan D. Bray; 129(7), 830-4 (2003).

Palmeri, A.
State Space Formulation for Linear Viscoelastic Dynamic Systems with Memory. — A. Palmeri, F. Ricciardelli, A. De Luca, and G. Muscolino; 129(7), 715-24 (2003).

Pany, Chitaranjan
Wave Propagation in Orthogonally Supported Periodic Curved Panels. — Chitaranjan Pany, S. Parthan, and M. Mukhopadhyay; 129(3), 342-9 (2003).

Pao, Y.-H.
Dynamic Bending Strains in Planar Trusses with Pinned or Rigid Joints. — Y.-H. Pao and G. Sun; 129(3), 324-32 (2003).

Papanicolaou, A. N.
Cluster Evolution and Flow-Frictional Characteristics under Different Sediment Availabilities and Specific Gravity. — A. N. Papanicolaou and A. Schuyler; 129(10), 1206-19 (2003).

Papaspyrou, S.
Refined Solutions of Externally Induced Sloshing in Half-Full Spherical Containers. — S. Papaspyrou, D. Valougeorgis, and S. A. Karamanos; 129(12), 1369-79 (2003).

Parthan, S.
Wave Propagation in Orthogonally Supported Periodic Curved Panels. —Chitaranjan Pany, S. Parthan, and M. Mukhopadhyay; 129(3), 342-9 (2003).

Pauk, Volodymyr
Biparametric Models for Elastic Wedge Foundation. — Joanna Marzęda, Volodymyr Pauk, and Margaret Woźniak; 129(1), 88-93 (2003).

Pfeiffer, Uwe
Discussion of "Numerical Investigation of Fiber Reinforced Polymers Poststrengthened Concrete Slabs" by Matthias Hörmann, Horst Menrath, and Ekkehard Ramm. —Uwe Pfeiffer and Ulrich Quast; 129(5), 581-2 (2003).

Phadke, Amal C.
Nonlinear Response of Fluid-Filled Membrane in Gravity Waves. —Amal C. Phadke and Kwok Fai Cheung; 129(7), 739-50 (2003).

Pichler, Christian
Thermochemomechanical Assessment of Ground Improvement by Jet Grouting in Tunneling. —Christian Pichler, Roman Lackner, Yvonne Spira, and Herbert A. Mang; 129(8), 951-62 (2003).

Pietruszczak, S.
Constitutive Model for Concrete with Embedded Sets of Reinforcement. —S. Pietruszczak and A. Winnicki; 129(7), 725-38 (2003).

Pijaudier-Cabot, Gilles
Coupled Mechanical and Chemical Damage in Calcium Leached Cementitious Structures. —Caroline Le Bellégo, Gilles Pijaudier-Cabot, Bruno Gérard, Jean-François Dubé, and Laurent Molez; 129(3), 333-41 (2003).

Pothisiri, T.
Structural Damage Detection and Assessment from Modal Response. —T. Pothisiri and K. D. Hjelmstad; 129(2), 135-45 (2003).

Puzrin, A. M.
Rate-Dependent Hyperplasticity with Internal Functions. — A. M. Puzrin and G. T. Houlsby; 129(3), 252-63 (2003).

Qu, Jianmin
Characterization of Cement-Based Materials Using Diffuse Ultrasound. — Jens Becker, Laurence J. Jacobs, and Jianmin Qu; 129(12), 1478-84 (2003).

Quast, Ulrich
Discussion of "Numerical Investigation of Fiber Reinforced Polymers Poststrengthened Concrete Slabs" by Matthias Hörmann, Horst Menrath, and Ekkehard Ramm. — Uwe Pfeiffer and Ulrich Quast; 129(5), 581-2 (2003).

Quintas, Valentín
Two Main Methods for Yield Line Analysis of Slabs. — Valentín Quintas; 129(2), 223-31 (2003).

Rahman, S.
Laser-Induced Fluorescence Measurements of a Turbulent Plume. — D. R. Webster, S. Rahman, and L. P. Dasi; 129(10), 1130-7 (2003).

Rajapakse, R. K. N. D.
Discussion of "BEM Analysis of Two-Dimensional Elastodynamic Problems of Anisotropic Solids" by S. Ahmad, F. Leyte, and R. K. N. D. Rajapakse. —R. K. N. D. Rajapakse; 129(1), 132-3 (2003).

Rajasekaran, Sundaramoorthy
Discussion of "Formulation of Cracked Beam Element for Structural Analysis" by E. Viola, L. Nobile, and L. Federici. —Sundaramoorthy Rajasekaran; 129(6), 704-5 (2003).

Raju, K. Kanaka
Thermal Postbuckling of Uniform Columns on Elastic Foundation—Intuitive Solution. —G. Venkateswara Rao and K. Kanaka Raju; 129(11), 1351-4 (2003).

Ramm, Ekkehard
Closure to "Numerical Investigation of Fiber Reinforced Polymers Poststrengthened Concrete Slabs" by Matthias Hörmann, Horst Menrath, and Ekkehard Ramm. —Matthias Hörmann, Horst Menrath, and Ekkehard Ramm; 129(5), 583 (2003).

Ramsamooj, D. V.
Analytical Prediction of Fatigue Crack Propagation in Metals. —D. V. Ramsamooj; 129(6), 672-82 (2003).

Rao, G. Venkateswara
Thermal Postbuckling of Uniform Columns on Elastic Foundation—Intuitive Solution. —G. Venkateswara Rao and K. Kanaka Raju; 129(11), 1351-4 (2003).

Raubenheimer, Britt
Particle Image Velocimetry Measurements within a Laboratory-Generated Swash Zone. —Edwin A. Cowen, In Mei Sou, Philip L.-F. Liu, and Britt Raubenheimer; 129(10), 1119-29 (2003).

Reddy, J. N.
Frequency of Functionally Graded Plates with Three-Dimensional Asymptotic Approach. —J. N. Reddy and Zhen-Qiang Cheng; 129(8), 896-900 (2003).

Ricciardelli, F.
State Space Formulation for Linear Viscoelastic Dynamic Systems with Memory. —A. Palmeri, F. Ricciardelli, A. De Luca, and G. Muscolino; 129(7), 715-24 (2003).

Roberts, Matthew W.
Potential for Structural Failure in the Seismic Near Field. — Matthew W. Roberts and Loren D. Lutes; 129(8), 927-34 (2003).

Robinson, D. N.
Creep of Polymer Matrix Composites. I: Norton/Bailey Creep Law for Transverse Isotropy. — D. N. Robinson, W. K. Binienda, and M. B. Ruggles; 129(3), 310-7 (2003).
Creep of Polymer Matrix Composites. II: Monkman-Grant Failure Relationship for Transverse Isotropy. — W. K. Binienda, D. N. Robinson, and M. B. Ruggles; 129(3), 318-23 (2003).

Ruggles, M. B.
Creep of Polymer Matrix Composites. I: Norton/Bailey Creep Law for Transverse Isotropy. — D. N. Robinson, W. K. Binienda, and M. B. Ruggles; 129(3), 310-7 (2003).
Creep of Polymer Matrix Composites. II: Monkman-Grant Failure Relationship for Transverse Isotropy. — W. K. Binienda, D. N. Robinson, and M. B. Ruggles; 129(3), 318-23 (2003).

Ruzzene, Massimo
Control of Wave Propagation in Sandwich Plate Rows with Periodic Honeycomb Core. —Massimo Ruzzene and Panos Tsopelas; 129(9), 975-86 (2003).

Safak, Erdal
Hilbert-Huang Transform Analysis of Dynamic and Earthquake Motion Recordings. —Ray Ruichong Zhang, Shuo Ma, Erdal Safak, and Stephen Hartzell; 129(8), 861-75 (2003).

Saha, A. K.
Investigation of Two- and Three-Dimensional Models of Transitional Flow Past a Square Cylinder. — A. K. Saha, K. Muralidhar, and G. Biswas; 129(11), 1320-9 (2003).

Sahu, S. K.
Dynamic Stability of Laminated Composite Curved Panels with Cutouts. —S. K. Sahu and P. K. Datta; 129(11), 1245-53 (2003).

Samali, Bijan
Electrorheological and Magnetorheological Duct Flow in Shear-Flow Mode Using Herschel-Bulkley Constitutive Model. —Joko Widjaja, Bijan Samali, and Jianchun Li; 129(12), 1459-65 (2003).

Sapsathiarn, Yasothorn
Forced Vertical Vibration of Circular Plate in Multilayered Poroelastic Medium. —Teerapong Senjuntichai and Yasothorn Sapsathiarn; 129(11), 1330-41 (2003).

Sarkar, Abhijit
Linear Stochastic Dynamical System under Uncertain Load: Inverse Reliability Analysis. —Abhijit Sarkar; 129(6), 665-71 (2003).

Sassu, Mauro
"Biaxiality Effect" on the Energy Dissipated by Elastoplastic Base-Isolators. —Mauro Sassu; 129(6), 607-12 (2003).

Savoia, Marco
Nonlinear Creep Damage Model for Concrete under Uniaxial Compression. —Claudio Mazzotti and Marco Savoia; 129(9), 1065-75 (2003).

Schenk, Christian A.
Response of Continuous System with Stochastically Varying Surface Roughness to Moving Load. — Christian A. Schenk and Lawrence A. Bergman; 129(7), 759-68 (2003).

Schlacher, Kurt
Concentrations of Pressure Between an Elastically Supported Beam and a Moving Timoshenko-Beam. — Eugenia C. Cojocaru, Hans Irschik, and Kurt Schlacher; 129(9), 1076-82 (2003).

Schuyler, A.
Cluster Evolution and Flow-Frictional Characteristics under Different Sediment Availabilities and Specific Gravity. — A. N. Papanicolaou and A. Schuyler; 129(10), 1206-19 (2003).

Sengupta, D.
Vibration of Thick and Thin Plates Using a New Triangular Element. — A. H. Sheikh, P. Dey, and D. Sengupta; 129(11), 1235-44 (2003).

Senjuntichai, Teerapong
Forced Vertical Vibration of Circular Plate in Multilayered Poroelastic Medium. — Teerapong Senjuntichai and Yasothorn Sapsathiarn; 129(11), 1330-41 (2003).

Shankar, K.
Substructural Identification Method without Interface Measurement. —C. G Koh and K. Shankar; 129(7), 769-76 (2003).

Sheikh, A. H.
Vibration of Thick and Thin Plates Using a New Triangular Element. —A. H. Sheikh, P. Dey, and D. Sengupta; 129(11), 1235-44 (2003).

Sheinman, Izhak
Imperfection Sensitivity of Laminated Cylindrical Shells According to Different Shell Theories. —Izhak Sheinman and Yiska Goldfeld; 129(9), 1048-53 (2003).

Shen, Hui-Shen
Postbuckling of Pressure-Loaded Functionally Graded Cylindrical Panels in Thermal Environments. — Hui-Shen Shen and Andrew Y. T. Leung; 129(4), 414-25 (2003).

Shin, Sungwon
Laboratory Measurements of Void Fraction and Turbulence in the Bore Region of Surf Zone Waves. — Daniel T. Cox and Sungwon Shin; 129(10), 1197-205 (2003).

Shinozuka, Masanobu
Effects of Seismically Induced Pounding at Expansion Joints of Concrete Bridges. —Sang-Hoon Kim and Masanobu Shinozuka; 129(11), 1225-34 (2003).

Si, Weijian
Spline Semidiscretization Analysis for Orthotropic Plates and Shells. —Chunxiang Li, Weijian Si, and Zhenyu Liu; 129(1), 60-70 (2003).

Simiu, Emil
Estimating Uncertainty in the Extreme Value Analysis of Data Generated by a Hurricane Simulation Model. —Stuart Coles and Emil Simiu; 129(11), 1288-94 (2003).

Singh, Mahendra P.
Seismic Analysis and Design with Maxwell Dampers. — Mahendra P. Singh, Navin. P. Verma, and Luis M. Moreschi; 129(3), 273-82 (2003).

Siragy, E. F.
Analysis of Heterogeneous Composites Based on Moving-Window Techniques. — L. L. Graham-Brady, E. F. Siragy, and S. C. Baxter; 129(9), 1054-64 (2003).

Sivakumar, K.
Discussion of "Why Did the World Trade Center Collapse?—Simple Analysis" by Zdeněk P. Bažant and Yong Zhou. — K. Sivakumar; 129(7), 839 (2003).
Discussion of "Could the World Trade Center Have Been Modified to Prevent its Collapse?" by David E. Newland and David Cebon. — K. Sivakumar; 129(11), 1360 (2003).

Soize, C.
Random Uncertainties Model in Dynamic Substructuring Using a Nonparametric Probabilistic Model. — C. Soize and H. Chebli ; 129(4), 449-57 (2003).
Uncertain Dynamical Systems in the Medium-Frequency Range. — C. Soize; 129(9), 1017-27 (2003).

Song, Junho
Bounds on System Reliability by Linear Programming. — Junho Song and Armen Der Kiureghian; 129(6), 627-36 (2003).

Spanos, Pol D.
Spectral Approach to Equivalent Statistical Quadratization and Cubicization Methods for Nonlinear Oscillators. —Pol D. Spanos, Giuseppe Failla, and Mario Di Paola; 129(1), 31-42 (2003).

Spira, Yvonne
Thermochemomechanical Assessment of Ground Improvement by Jet Grouting in Tunneling. —Christian Pichler, Roman Lackner, Yvonne Spira, and Herbert A. Mang; 129(8), 951-62 (2003).

Steffens, Alexander
Aging Approach to Water Effect on Alkali–Silica Reaction Degradation of Structures. —Alexander Steffens, Kefei Li, and Olivier Coussy; 129(1), 50-9 (2003).

Su, G. H.
Ritz Buckling Analysis of Rectangular Plates with Internal Hinge. —Y. Xiang, C. M. Wang, C. Y. Wang, and G. H. Su; 129(6), 683-8 (2003).

Sujatha, V.
Energy Release Rate due to Friction at Bimaterial Interface in Dams. —V. Sujatha and J. M. Chandra Kishen; 129(7), 793-800 (2003).

Sun, G.
Dynamic Bending Strains in Planar Trusses with Pinned or Rigid Joints. —Y.-H. Pao and G. Sun; 129(3), 324-32 (2003).

Sundaravadivelu, R.
Stability of Stiffened Plates with Initial Imperfections. — P. Alagusundaramoorthy, S. Aruljayachandran, and R. Sundaravadivelu; 129(7), 751-8 (2003).

Sweetman, Bert
Non-Gaussian Air Gap Response Models for Floating Structures. —Bert Sweetman and Steven R. Winterstein; 129(3), 302-9 (2003).

Symans, Michael D.
Analytical Modeling, System Identification, and Tracking Performance of Uniaxial Seismic Simulators. — Brian S. Twitchell and Michael D. Symans; 129(12), 1485-8 (2003).

Tang, Yu
Numerical Evaluation of Uniform Beam Modes. — Yu Tang; 129(12), 1475-7 (2003).

Teng, Michelle H.
Study of Environmental Fluid Mechanics Using State-of-the-Art Experimental Techniques and Instrumentation. — Keh-Han Wang, Michelle H. Teng, and Hamn-Ching Chen; 129(10), 1107 (2003).

Teng, Xiaoqing
Interactive Failure of Two Impacting Beams. — Xiaoqing Teng and Tomasz Wierzbicki; 129(8), 918-26 (2003).

Tham, L. G.
Stress Solution of Multiple Elliptic Hole Problem in Plane Elasticity. — L. Q. Zhang, Z. Q. Yue, C. F. Lee, L. G. Tham, and Z. F. Yang; 129(12), 1394-407 (2003).

Ting, Francis C. K.
Measurements of Water Surface Profile and Velocity Field at a Circular Pier. —Kent R. Johnson and Francis C. K. Ting; 129(5), 502-13 (2003).

Tong, D. J.
Perforation Thickness and Ballistic Limit of Concrete Target Subjected to Rigid Projectile Impact. — Q. M. Li and D. J. Tong; 129(9), 1083-91 (2003).

Tsay, Ting-Kuei
Second-Order Radiation Boundary Condition for Water Wave Simulation with Large Angle Incidence. — Tai-Wen Hsu, Yuan-Jyh Lan, Ting-Kuei Tsay, and Kuei-Pin Lin; 129(12), 1429-38 (2003).

Tsopelas, Panos
Control of Wave Propagation in Sandwich Plate Rows with Periodic Honeycomb Core. —Massimo Ruzzene and Panos Tsopelas; 129(9), 975-86 (2003).

Twitchell, Brian S.
Analytical Modeling, System Identification, and Tracking Performance of Uniaxial Seismic Simulators. — Brian S. Twitchell and Michael D. Symans; 129(12), 1485-8 (2003).

Uchiyama, Manabu
Nonlinear Buckling Simulations of Imperfect Shell Domes by Mixed Finite Elements. —Manabu Uchiyama and Seishi Yamada; 129(7), 707-14 (2003).

Valanis, Kirk C.
Elasticity of Space-Time: Basis of Newton's 2nd Law of Motion. —Kirk C. Valanis; 129(9), 1039-47 (2003).

Valougeorgis, D.
Refined Solutions of Externally Induced Sloshing in Half-Full Spherical Containers. —S. Papaspyrou, D. Valougeorgis, and S. A. Karamanos; 129(12), 1369-79 (2003).

Verma, Navin. P.
Seismic Analysis and Design with Maxwell Dampers. — Mahendra P. Singh, Navin. P. Verma, and Luis M. Moreschi; 129(3), 273-82 (2003).

Vijalapura, P. K.
Consistent Finite-Element Response Sensitivity Analysis. — J. P. Conte, P. K. Vijalapura, and M. Meghella; 129(12), 1380-93 (2003).

Vilnay, O.
Dynamics of Cable Structures. — K. Yu. Volokh, O. Vilnay, and I. Averbuh; 129(2), 175-80 (2003).

Vinogradov, O.
Numerical Investigation of Statistical Properties of Microslips in Silos. — O. Vinogradov and Y. Leonenko; 129(6), 637-40 (2003).

Vipulanandan, C.
Modeling Water and Sulfuric Acid Transport through Coated Cement Concrete. — J. Liu and C. Vipulanandan; 129(4), 426-37 (2003).

Volokh, K. Yu.
Dynamics of Cable Structures. — K. Yu. Volokh, O. Vilnay, and I. Averbuh; 129(2), 175-80 (2003).

Voulgaris, Petros G.
Sliding Mode Control of Cable-Stayed Bridge Subjected to Seismic Excitation. — Seok J. Moon, Lawrence A. Bergman, and Petros G. Voulgaris; 129(1), 71-8 (2003).

Wang, C. M.
Buckling of Columns with Intermediate Elastic Restraint. — C. M. Wang and I. M. Nazmul; 129(2), 241-4 (2003).
Vibration of Timoshenko Beams with Internal Hinge. — Y. Y. Lee, C. M. Wang, and S. Kitipornchai; 129(3), 293-301 (2003).
Stability Criteria for Euler Columns with Intermediate and End Axial Loads. —C. M. Wang, C. Y. Wang, and I. M. Nazmul; 129(4), 468-72 (2003).
Ritz Buckling Analysis of Rectangular Plates with Internal Hinge. —Y. Xiang, C. M. Wang, C. Y. Wang, and G. H. Su; 129(6), 683-8 (2003).
Exact Buckling Solutions For Rectangular Plates Under Intermediate and End Uniaxial Loads. —Y. Xiang, C. M. Wang, and S. Kitipornchai; 129(7), 835-8 (2003).
Buckling of Vertical Cylindrical Shells Under Combined End Pressure and Body Force. —C. W. Lim, Y. F. Ma, S. Kitipornchai, C. M. Wang, and R. K. K. Yuen; 129(8), 876-84 (2003).

Wang, C. Y.
Effect of Base Fixity on Buckling of Heavy Column with End Load. —C. Y. Wang; 129(1), 117-9 (2003).
Stability Criteria for Euler Columns with Intermediate and End Axial Loads. —C. M. Wang, C. Y. Wang, and I. M. Nazmul; 129(4), 468-72 (2003).
Ritz Buckling Analysis of Rectangular Plates with Internal Hinge. —Y. Xiang, C. M. Wang, C. Y. Wang, and G. H. Su; 129(6), 683-8 (2003).

Wang, Hongwei
Combined Particle Image Velocimetry/Planar Laser Induced Fluorescence for Integral Modeling of Buoyant Jets. —Adrian Wing-Keung Law, Hongwei Wang, and Herlina; 129(10), 1189-96 (2003).

Wang, K. H.
Flexible Porous Wave Barrier for Enhanced Wetlands Habitat Restoration. —A. N. Williams and K. H. Wang; 129(1), 1-8 (2003).

Wang, Keh-Han
Study of Environmental Fluid Mechanics Using State-of-the-Art Experimental Techniques and Instrumentation. — Keh-Han Wang, Michelle H. Teng, and Hamn-Ching Chen; 129(10), 1107 (2003).

Wang, Qiong
Closure to "Analysis of Shear Banding in True Triaxial Tests on Sand" by Poul V. Lade and Qiong Wang. — Poul V. Lade and Qiong Wang; 129(4), 474-5 (2003).

Wang, Xingzhe
Large-Deflection Deformation of Ferromagnetic Plates in Magnetic Fields. — Xiaojing Zheng and Xingzhe Wang; 129(2), 245-8 (2003).

Webster, D. R.
Laser-Induced Fluorescence Measurements of a Turbulent Plume. — D. R. Webster, S. Rahman, and L. P. Dasi; 129(10), 1130-7 (2003).

Weitsman, Y. Jack
Closure to "Solution Method for Beams on Nonuniform Elastic Foundations" by Ya-Jun Guo and Y. Jack Weitsman. — Ya-Jun Guo and Y. Jack Weitsman; 129(8), 974 (2003).

Widjaja, Joko
Electrorheological and Magnetorheological Duct Flow in Shear-Flow Mode Using Herschel-Bulkley Constitutive Model. —Joko Widjaja, Bijan Samali, and Jianchun Li; 129(12), 1459-65 (2003).

Wierzbicki, Tomasz
Interactive Failure of Two Impacting Beams. —Xiaoqing Teng and Tomasz Wierzbicki; 129(8), 918-26 (2003).

Williams, A. N.
Flexible Porous Wave Barrier for Enhanced Wetlands Habitat Restoration. —A. N. Williams and K. H. Wang; 129(1), 1-8 (2003).

Winnicki, A.
Constitutive Model for Concrete with Embedded Sets of Reinforcement. —S. Pietruszczak and A. Winnicki; 129(7), 725-38 (2003).

Winterstein, Steven R.
Non-Gaussian Air Gap Response Models for Floating Structures. —Bert Sweetman and Steven R. Winterstein; 129(3), 302-9 (2003).

Woźniak, Margaret
Biparametric Models for Elastic Wedge Foundation. — Joanna Marzęda, Volodymyr Pauk, and Margaret Woźniak; 129(1), 88-93 (2003).

Wu, Jinsong
Buckling and Postbuckling of Antisymmetrically Laminated Cross-ply Shear-Deformable Cylindrical Shells under Axial Compression. —Jianwu Zhang, Yanhai Xu, and Jinsong Wu; 129(1), 107-16 (2003).

Wu, Jong-Cheng
Experiments on a Full-Scale Building Model using Modified Sliding Mode Control. —Jong-Cheng Wu; 129(4), 363-72 (2003).

Wu, Yaping
Matrix Analysis of Shear Lag and Shear Deformation in Thin-Walled Box Beams. —Yaping Wu, Shizhong Liu, Yuanlin Zhu, and Yuanming Lai; 129(8), 944-50 (2003).

Wu, Z. M.
Hybrid Beam-Column Element with End Frictional Joints. — S. S. Law, Z. M. Wu, and S. L. Chan; 129(5), 564-70 (2003).

Xiang, Y.
Exact Solutions for Buckling of Multispan Rectangular Plates. — Y. Xiang; 129(2), 181-7 (2003).
Ritz Buckling Analysis of Rectangular Plates with Internal Hinge. — Y. Xiang, C. M. Wang, C. Y. Wang, and G. H. Su; 129(6), 683-8 (2003).
Exact Buckling Solutions For Rectangular Plates Under Intermediate and End Uniaxial Loads. — Y. Xiang, C. M. Wang, and S. Kitipornchai; 129(7), 835-8 (2003).

Xu, Yanhai
Buckling and Postbuckling of Antisymmetrically Laminated Cross-ply Shear-Deformable Cylindrical Shells under Axial Compression. — Jianwu Zhang, Yanhai Xu, and Jinsong Wu; 129(1), 107-16 (2003).

Yamada, Seishi
Nonlinear Buckling Simulations of Imperfect Shell Domes by Mixed Finite Elements. —Manabu Uchiyama and Seishi Yamada; 129(7), 707-14 (2003).

Yamamoto, Kinya
Closure to "Redundancy Index of Lifeline Systems" by Masaru Hoshiya and Kinya Yamamoto. — Masaru Hoshiya and Kinya Yamamoto; 129(9), 1105 (2003).

Yang, Ke
Analytical Solution for Fluid-Structure Interaction in Liquid-Filled Pipes Subjected to Impact-Induced Water Hammer. —Q. S. Li, Ke Yang, and Lixiang Zhang; 129(12), 1408-17 (2003).

Yang, Q.
Field Experiment Study of Transient Stratified Flow in an Estuary. —Wenrui Huang, W. K. Jones, and Q. Yang; 129(10), 1220-3 (2003).

Yang, Z. F.
Stress Solution of Multiple Elliptic Hole Problem in Plane Elasticity. —L. Q. Zhang, Z. Q. Yue, C. F. Lee, L. G. Tham, and Z. F. Yang; 129(12), 1394-407 (2003).

Yao, M.
Three-Dimensional Discrete Element Method of Analysis of Clays. —M. Yao and A. Anandarajah; 129(6), 585-96 (2003).

Yue, Z. Q.
Stress Solution of Multiple Elliptic Hole Problem in Plane Elasticity. —L. Q. Zhang, Z. Q. Yue, C. F. Lee, L. G. Tham, and Z. F. Yang; 129(12), 1394-407 (2003).

Yuen, Ka-Veng
Updating Properties of Nonlinear Dynamical Systems with Uncertain Input. —Ka-Veng Yuen and James L. Beck; 129(1), 9-20 (2003).

Yuen, R. K. K.
Buckling of Vertical Cylindrical Shells Under Combined End Pressure and Body Force. —C. W. Lim, Y. F. Ma, S. Kitipornchai, C. M. Wang, and R. K. K. Yuen; 129(8), 876-84 (2003).

Zhang, Benzhao
Dean Equations Extended to a Rotating Helical Pipe Flow. —Jinsuo Zhang and Benzhao Zhang; 129(7), 823-9 (2003).

Zhang, J.-B.
Shallow Turbulent Flows by Video Imaging Method. — J.-B. Zhang and V. H. Chu; 129(10), 1164-72 (2003).

Zhang, Jianwu
Buckling and Postbuckling of Antisymmetrically Laminated Cross-ply Shear-Deformable Cylindrical Shells under Axial Compression. — Jianwu Zhang, Yanhai Xu, and Jinsong Wu; 129(1), 107-16 (2003).

Zhang, Jinsuo
Dean Equations Extended to a Rotating Helical Pipe Flow. — Jinsuo Zhang and Benzhao Zhang; 129(7), 823-9 (2003).

Zhang, L. Q.
Stress Solution of Multiple Elliptic Hole Problem in Plane Elasticity. — L. Q. Zhang, Z. Q. Yue, C. F. Lee, L. G. Tham, and Z. F. Yang; 129(12), 1394-407 (2003).

Zhang, Lixiang
Analytical Solution for Fluid-Structure Interaction in Liquid-Filled Pipes Subjected to Impact-Induced Water Hammer. — Q. S. Li, Ke Yang, and Lixiang Zhang; 129(12), 1408-17 (2003).

Zhang, Ray Ruichong
Hilbert-Huang Transform Analysis of Dynamic and Earthquake Motion Recordings. — Ray Ruichong Zhang, Shuo Ma, Erdal Safak, and Stephen Hartzell; 129(8), 861-75 (2003).

Zheng, Xiaojing
Large-Deflection Deformation of Ferromagnetic Plates in Magnetic Fields. — Xiaojing Zheng and Xingzhe Wang; 129(2), 245-8 (2003).

Zhou, Yin
Aeroelastic Balance. — Yin Zhou and Ahsan Kareem; 129(3), 283-92 (2003).

Zhou, Yong
Closure to "Why Did the World Trade Center Collapse?—Simple Analysis" by Zdeněk P. Bažant and Yong Zhou. — Zdeněk P. Bažant and Yong Zhou; 129(7), 839-40 (2003).

Zhu, X. Q.
Dynamic Behavior of Orthotropic Rectangular Plates under Moving Loads. — X. Q. Zhu and S. S. Law; 129(1), 79-87 (2003).

Zhu, Yuanlin
Matrix Analysis of Shear Lag and Shear Deformation in Thin-Walled Box Beams. — Yaping Wu, Shizhong Liu, Yuanlin Zhu, and Yuanming Lai; 129(8), 944-50 (2003).

Zi, Goangseup
Decontamination of Radionuclides from Concrete by Microwave Heating. I: Theory. — Zdeněk P. Bažant and Goangseup Zi; 129(7), 777-84 (2003).
Decontamination of Radionuclides from Concrete by Microwave Heating. II: Computations. — Goangseup Zi and Zdeněk P. Bažant; 129(7), 785-92 (2003).
